Testahil · Arabian Cement Company S.A.E. (EGX: ARCC) — Source Register 6 August 2026

Where every number came from. This register accompanies the valuation study and the companion model. Each input carries the source it was taken from, the type of that source, and the date the source itself bears — not the date it was read.

What this study is built on

The audited consolidated financial statements. That is a change from the first edition of this work, and the change is worth stating at the top rather than buried.

The first edition was written without opening a source document: every outbound request was refused by the network policy in force, so every company figure reached the model as relayed in a web-search summary of reporting about the accounts — two steps from the audited print, not one. Four documents were subsequently supplied and this edition is rebuilt on them line by line:

- Consolidated financial statements for the year ended 31 December 2025, audited by Deloitte (Wafik, Ramy & Partners), unqualified opinion signed in Cairo on 25 February 2026. 47 pages including 33 notes.
- Consolidated financial statements for the year ended 31 December 2024, same auditor, unqualified opinion signed 23 March 2025, carrying the FY2023 comparatives.
- Consolidated financial statements for the year ended 31 December 2023.
- Condensed consolidated interim financial statements for the three months ended 31 March 2026, limited review by the same auditor, concluded 25 May 2026.

Every figure in the input register below that carries a Company ring is now read from one of those four documents, with the note number given. Nothing historical is reconstructed. What remains estimated is named in section 3 and is short: two prices, a set of forecast paths, and the cost-of-capital parameters.

Four things the reconstructed edition got materially wrong, recorded because they show where reconstruction fails rather than to dwell on it: non-controlling interests were deducted at EGP 150mn against an audited EGP 158,005; the effective tax rate was inferred at 29.43% against a disclosed 23.82%; the cost of debt was assumed at 21.5% against a 91%-euro-denominated book contracted at about 7.5%; and kiln capacity was assumed at 3.6Mt against a disclosed 4.2Mt. Three things it got right and are now confirmed: the share count of 374,867,445, FY2025 operating income of EGP 4,595.82mn to the pound, and total liabilities of EGP 4,140.99mn — which it DERIVED as assets less equity after rejecting an aggregator print of EGP 2,894.13mn that would not close. That print turns out to be total CURRENT liabilities.

1 Input register — every figure in the model

#	Input	Value	Ring	Source	Source date
1	spot	77	Market	Closing price on the Egyptian Exchange, 3 September 2026. The previous edition was struck on the 6 August close of 59.00	2026-09-03
2	auc_altfuel_fy25	240.2354	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — note 13, assets under construction: alternative-fuel system for production line 2	2025-12-31

4	auc_h1_26	897.0842	Company	Reviewed condensed consolidated interim financial statements for the six months ended 30 June 2026, Wafik, Ramy & Partners (Deloitte), limited review report attached; filed 13 August 2026 — assets under construction at 30 June 2026, against 391.543753 at 31 December 2025	2026-06-30
5	auc_silo_fy25	146.2385	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — note 13, assets under construction: new steel cement silo for production line 1	2025-12-31
6	cap_cement_mt	5	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — note 1: '...that can produce 5 million tons per annum of cement'	2025-12-31
7	cap_clinker_mt	4.2	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — note 1: 'a cement producer with a clinker capacity of 4.2 million tons per annum'	2025-12-31
8	capex_fy23	58.544	Company	Audited consolidated financial statements for the year ended 31 December 2024, Deloitte (Wafik, Ramy & Partners), signed 23 March 2025 — cash flow, comparative: purchases of property 56.808 plus assets under construction 1.736	2023-12-31
9	capex_fy24	912.0154	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — cash flow, comparative: 206.543 plus 705.473	2024-12-31
10	capex_fy25	796.4708	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — cash flow: purchases of property 329.893 plus assets under construction 466.578	2025-12-31
11	capex_h1_26	608.4339	Company	Reviewed condensed consolidated interim financial statements for the six months ended 30 June 2026, Wafik, Ramy & Partners (Deloitte), limited review report attached; filed 13 August 2026 — cash flow statement: payments for purchase of property, plant and equipment 102.893492 plus payments for assets under construction 505.540414	2026-06-30
12	capex_usd_t_cap	3.23	Company	Maintenance capital expenditure in US dollars per tonne of installed capacity, SET AT THE MOST RECENT FULL YEAR'S TOTAL CAPITAL SPENDING PER TONNE — EGP 796.471mn on 5.0Mt at USD/EGP 49.26. REVISION 4 CORRECTS THE REASONING BEHIND THIS INPUT, WHICH WAS BACKWARDS. Revision 3 observed that FY2024 (USD 3.70/t) and FY2025 (USD 3.23/t) 'both carry the alternative-fuel and silo programmes' and then set maintenance at USD 4.00 — the MIDDLE of a band it had just said was inflated by growth spending, and above both observed years. If both observations INCLUDE growth capital, they are an UPPER BOUND on maintenance, so the maintenance level belongs at or below them, not above. The H1-2026 cash-flow statement settles the direction: it splits the spend into payments for property, plant and equipment of EGP 102.893mn and payments for ASSETS UNDER CONSTRUCTION of EGP 505.540mn, so 83% of six months' capital spending is the growth programme and the sustaining line is running near USD 0.8/t annualised. That is a deferral rather than a sustainable rate, so the input is NOT cut to it; it is set at the most recent full year's TOTAL, which remains an upper bound on maintenance and is still above the industry sustaining norm of about USD 3/t. Worth EGP 1.77 a share against revision 3's figure, and the whole range is published as a sensitivity	2025-12-31
13	capital_h1_26	749.7349	Company	Reviewed condensed consolidated interim financial statements for the six months ended 30 June 2026, Wafik, Ramy & Partners (Deloitte), limited review report attached; filed 13 August 2026 —	2026-06-30

				issued and paid-up capital at 30 June 2026, against 757.479400 at 31 December 2025, the treasury shares having been CANCELLED. At the EGP 2 par value this is 374,867,445 shares — exactly the count this study already used (issued less treasury), so the cancellation confirms the share count rather than changing it	
14	cash_fy23	561.0997	Company	Audited consolidated financial statements for the year ended 31 December 2024, Deloitte (Wafik, Ramy & Partners), signed 23 March 2025 — cash and bank balances, comparative	2023-12-31
15	cash_fy24	1,687.0629	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — cash and bank balances, comparative	2024-12-31
16	cash_fy25	3,459.3912	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — cash and bank balances, note 19: local-currency current accounts 1,839.630, foreign-currency current accounts 1,599.702, deposits 8.733, cash in hand 11.325	2025-12-31
17	cash_h1_26	1,970.5011	Company	Reviewed condensed consolidated interim financial statements for the six months ended 30 June 2026, Wafik, Ramy & Partners (Deloitte), limited review report attached; filed 13 August 2026 — cash and bank balances at 30 June 2026	2026-06-30
18	cash_q1_26	4,379.6274	Company	Reviewed condensed consolidated interim financial statements for the three months ended 31 March 2026, Deloitte (Wafik, Ramy & Partners), 25 May 2026 — cash and bank balances	2026-03-31
19	cem_export_share	0.1772, 0.18, 0.18, 0.175, 0.17, 0.165	Company	Share of cement SOLD that is exported. FY2025 is DISCLOSED: FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) gives cement exports of 629.5 kt against local sales of 2,923.6 kt, i.e. 17.72% of the 3,553.1 kt of cement sold. Well inside the 30% statutory cap; revision 3's single-product build put exports at 31.5% of volume and BREACHED the cap its own text called binding	2026-03-01
20	cem_stock_draw	0.0725, 0, 0, 0, 0, 0	Company	Cement sold LESS cement produced, in Mt. FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) discloses cement production of 3,480.6 kt against sales of 3,553.1 kt (2,923.6 local plus 629.5 exported), so FY2025 drew 72.5 kt out of finished-goods inventory. Revision 4 equated sales to production and understated despatches by 1.5%. Held at zero across the forecast: a stock draw is a one-off by construction and the inventory note shows only EGP 320.8mn of finished goods at the year end	2026-03-01
21	clinker_factor	0.7329	Company	Tonnes of clinker per tonne of cement PRODUCED. Revision 3 used 0.84, taken from the ratio of the two nameplate capacities in note 1 and described as 'observed'. It is not observed and it is not a clinker factor: 4.2/5.0 is a ratio of two DESIGN capacities, and a clinker factor is a production-composition ratio. 0.84 also sits above the 0.65-0.80 band typical of blended cement, and the study then called this producer 'low-clinker' three sections later. The figure carried here is the production ratio implied by the FY2025 physical disclosure: clinker produced less clinker exported, over cement produced: FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) gives clinker production 3,851.6 kt less clinker exports 1,300.5 kt = 2,551.1 kt ground into 3,480.6 kt of cement	2026-03-01
22	clk_export_share	0.3377, 0.33, 0.32, 0.31, 0.305, 0.3	Company	Share of clinker production sold AS CLINKER rather than ground into cement. FY2025 is DISCLOSED: FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) gives clinker exports of 1,300.5 kt on production of 3,851.6 kt = 33.77%. This is the central operating lever and revision 3 could not see it at all: clinker exports and domestic cement compete for the same kiln, and a tonne of clinker realises a fraction of the tonne of cement it could have become. Note the direction of travel — clinker exports FELL 37% in FY2025 (2,074.4 kt to 1,300.5) while cement exports rose 74%, so the mix was already shifting toward the higher-value product before this forecast starts	2026-03-01
23	cogs_fy22	3,789.8162	Company	Audited consolidated financial statements for the year ended 31 December 2022 — cost of sales	2022-12-31

51	ebrd_margin	0.0435	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 note 10, facility schedule — the European Bank for Reconstruction and Development euro facility prices at three-month Euribor plus this margin	2025-12-31
52	ecl_fy23	4.7458	Company	Audited consolidated financial statements for the year ended 31 December 2024, Deloitte (Wafik, Ramy & Partners), signed 23 March 2025 — expected credit losses on trade receivables, comparative	2023-12-31
53	ecl_fy24	-1.1065	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — REVERSAL of expected credit losses, comparative (negative, i.e. a credit)	2024-12-31
54	ecl_fy25	3.6036	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — expected credit losses on trade receivables, note 17	2025-12-31
55	eff_rate_disclosed_fy24	0.2296	Company	Audited consolidated financial statements for the year ended 31 December 2024, Deloitte (Wafik, Ramy & Partners), signed 23 March 2025 note 10.2 — the same disclosure for 2024	2024-12-31
56	eff_rate_disclosed_fy25	0.2333	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 note 10.2 — the average effective interest rate the company itself states for 2025, distinct from the rate this study computes from the charge and the balance	2025-12-31
57	eff_rate_disclosed_q126	0.2592	Company	Reviewed condensed consolidated interim financial statements for the three months ended 31 March 2026, Deloitte (Wafik, Ramy & Partners), 25 May 2026 — the same disclosure annualised for the first quarter of 2026	2026-03-31
58	egy_cons_mt	53.9	Company	Egyptian domestic cement sales 2025. FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) page 12 gives 53.9Mt, against the 54.0 previously carried on trade estimate	2026-03-01

59	egy_exports_mt	18.6	Company	Egyptian cement AND clinker export sales 2025. FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) page 12. The two products are reported together, which is why the earlier balance failed: it set a cement-plus-clinker export figure against a cement-only production figure	2026-03-01
60	egy_prod_mt	72.6	Company	Egyptian cement and clinker SALES 2025 — local plus export. FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) page 12 gives local 53.9Mt and exports 18.6Mt, total 72.6Mt. Revisions 1 to 4 carried 65.0Mt as 'production' against exports of 18.5Mt and consumption of 54Mt, a balance that does not close: 65 less 54 is 11Mt, not 18.5. One reviewer caught the gap and the disclosure now closes it. This changes the sector picture materially — see the utilisation note	2026-03-01
61	eps_fy23	1.81	Company	Audited consolidated financial statements for the year ended 31 December 2024, Deloitte (Wafik, Ramy & Partners), signed 23 March 2025 — earnings per share, comparative	2023-12-31

116	price_local_path	1, 1.08, 1.21, 1.318, 1.417, 1.517	Company	Local realised price index on the FY2025 base: the FY2026 step of 8.0% is evidenced, and FY2027 onward escalate on the house inflation path at ZERO real growth, the same path the cost index carries. The retired ladder grew 9.0%, 8.0%, 7.0% and 6.5% — below the cost path in every year, with no mechanism offered for the gap, which against the house path is an 11.0% cumulative real price decline nobody wrote down. THE EVIDENCE FOR THE FY2026 STEP. FY2025 Investor Presentation, Arabian Cement Company S.A.E., investor relations library, page 5 (sales volumes and production indicators) and page 4 give local revenue and local volume for both years and both fourth quarters, so the realised local price can be computed rather than assumed: FY2024 EGP 1,810/t, FY2025 EGP 2,909/t — a rise of 60.7% on volume up 11.7%. The FY2025 margin explosion was PRICE, not volume, which settles a question three revisions argued about without evidence. More useful still is the exit rate: the fourth quarter of 2025 realised EGP 3,118/t, 7.2% ABOVE the full-year average. Simply holding the Q4 exit flat through 2026 therefore produces a full-year average 7.2% higher, so the 8.0% carried here is only 0.8 points above a no-further-increase path. Revision 3 assumed 3.0% against 11.5% cost inflation and had nothing behind it; revision 4 assumed 8.0% and had only a plausibility argument. The number is unchanged from revision 4 — but it is now the conservative reading of a disclosed run rate rather than a guess that happened to land in the right place	2026-03-01

150	svc_share	0.0633	Company	Services revenue (transportation) as a share of goods revenue, derived from the disclosed FY2025 split	2025-12-31
151	ta_fy23	3,887.5274	Company	Audited consolidated financial statements for the year ended 31 December 2024, Deloitte (Wafik, Ramy & Partners), signed 23 March 2025 — total assets, comparative	2023-12-31
152	ta_fy24	5,848.6161	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — total assets, comparative	2024-12-31
153	ta_fy25	8,783.7218	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — total assets	2025-12-31
154	tax_eff	0.2382	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — income tax of EGP 1,125.468mn over pre-tax profit of EGP 4,725.158mn. Note 10.2 separately discloses an average effective rate of 23.33% (2024: 22.96%); Q1-2026 ran at 25.92%. Revision 1 inferred 29.43% by closing a MODELLED net finance income against disclosed profit, and over-taxed every forecast year by 5.6 points	2025-12-31
155	tax_fy23	232.7328	Company	Audited consolidated financial statements for the year ended 31 December 2024, Deloitte (Wafik, Ramy & Partners), signed 23 March 2025 — income tax, comparative	2023-12-31
156	tax_fy24	345.731	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — income tax, comparative	2024-12-31
157	tax_fy25	1,125.4677	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — income tax, note 10.1: current 1,111.30 plus deferred 14.17	2025-12-31
158	tax_h1_26	690.2295	Company	Reviewed condensed consolidated interim financial statements for the six months ended 30 June 2026, Wafik, Ramy & Partners (Deloitte), limited review report attached; filed 13 August 2026 — income tax	2026-06-30
159	tax_q1_26	329.9435	Company	Reviewed condensed consolidated interim financial statements for the three months ended 31 March 2026, Deloitte (Wafik, Ramy & Partners), 25 May 2026 — income tax	2026-03-31
160	tl_fy25	4,140.9896	Company	Audited consolidated financial statements for the year ended 31 December 2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026 — TOTAL liabilities (non-current 1,246.860 plus current 2,894.130). Revision 1 was offered EGP 2,894.13mn as 'total liabilities' by an aggregator and rejected it because it would not close against assets and equity; the statements show that figure is total CURRENT liabilities, so both the rejection and the derived 4,140.99 were right	2025-12-31
161	clk_price_ratio	0.65	Industry	Export clinker price as a fraction of the export cement price. Clinker is the unground intermediate and trades at a discount; 0.65 sits in the middle of the range the trade press reports. This is the one splitting assumption the export leg needs, and the two export prices are DERIVED from it and the audited export revenue, not asserted	2026-01-15
162	egy_capacity_mt	76	Industry	Egyptian nameplate cement capacity	2025-10-01
163	egy_revival_mt	12.6	Industry	Dormant Egyptian capacity under revival from the second half of 2026	2025-10-01
164	peer_mbsc_mcap	13,730	Industry	Misr Beni Suef Cement market capitalisation	2026-08-06

165	peer_mbsc_pat	3,946	Industry	Misr Beni Suef Cement FY2025 attributable profit	2026-03-01
166	peer_mbsc_rev	5,700	Industry	Misr Beni Suef Cement FY2025 net sales	2026-03-01
167	peer_scem_mcap	20,604.19	Industry	Sinai Cement market capitalisation at 06-Aug-2026	2026-08-06
168	peer_scem_pat	2,290	Industry	Sinai Cement FY2025 profit after tax	2026-03-10
169	peer_scem_rev	9,090	Industry	Sinai Cement FY2025 revenue	2026-03-10
170	price_exp_path	1, 0.968, 0.944, 0.927, 0.911, 0.895	Industry	Export price index in US dollars on the FY2025 base, declining because the EU carbon border mechanism raises the landed cost of Egyptian cement in Europe; set shallower than a high-clinker peer would face because this producer's alternative-fuel and hydrogen programmes are funded and under construction	2026-01-01
171	repl_usd_t	130	Industry	Replacement cost per annual tonne of cement capacity, USD 120-150 band	2026-08-06
172	cost_infl	1, 1.115, 1.249, 1.361, 1.463, 1.566	Country	Cumulative local cost-inflation index from the FY2025 base. The FY2026 step of 11.5% is unchanged; FY2027 onward escalate on the house inflation path, the SAME path the local price index carries, so the operating margin is an output of the two rather than the residual of two separately chosen ladders. This is an INPUT-PRICE path and is deliberately left at headline inflation even though the company's own audited cash cost grew only 12.5% in FY2025 on volume that rose — i.e. its realised unit cost inflation ran below the national rate. Crediting that outperformance here would double-count it, because the company-specific efficiency is carried separately and explicitly in af_saving, which is anchored to a funded, under-construction asset rather than to a trend	2026-07-10
173	egy_gdp_egp_bn	18,000	Country	Egyptian nominal gross domestic product, order of magnitude, used only for the terminal-growth crossover arithmetic	2026-01-01
174	egy_gdp_growth	0.18	Country	Egyptian nominal GDP growth, same arithmetic	2026-01-01
175	erp_cds	0.0941	Country	Egypt equity risk premium, CDS-based, Damodaran January-2026	2026-01-05
176	euribor	0.0249	Country	Three-month Euribor, the reference rate on the EBRD facility. Revision 3 carried 2.10%, which sits BELOW the ECB deposit facility rate of 2.25% and is therefore impossible as a term rate. It also applied one reference to both a 3-month and a 6-month facility; 6-month Euribor is nearer 2.72%, and the difference is carried as a known simplification	2026-08-06
177	fx	50.3	Country	USD/EGP at the valuation date	2026-08-06
178	fx_path	49.26, 55.11, 60.22, 64.04, 67.17, 70.11	Country	USD/EGP path: FY2025 actual average, then the house currency path — relative purchasing-power parity on the house inflation path against long-run foreign inflation, DERIVED and never hand-set. The retired path was typed (50.60 to 61.50 by FY2030) and depreciated the pound at roughly two-thirds of the inflation differential the same model applied to costs, which is one event counted once and ignored once	2026-09-02
179	rf	0.2295	Country	Egypt 10-year local-currency government bond yield. Revision 3 carried 22.31% dated 21 July; three independent reviewers put the 10-year at 22.88-22.98% on 3-5 August, and the curve is inverted above it (1-year near 25.6%). 22.95% is the midpoint of the three, at the valuation date rather than sixteen days before it	2026-08-05
180	rf_reviewer_high	0.2298	Country	Highest of the same three readings. The adopted figure is their midpoint, struck at the valuation date.	2026-08-05
181	rf_reviewer_low	0.2288	Country	Lowest of three independent reviewers' readings of the Egyptian 10-year on 3-5 August 2026.	2026-08-05
182	sov_spread_cds	0.034	Country	Egypt CDS-implied sovereign default spread, Damodaran January-2026 country risk file, CDS column. NETTED OUT of the local risk-free rate so sovereign default risk is charged once, not twice	2026-01-05
183	tax_stat	0.225	Country	Egypt statutory corporate income tax rate	2026-01-01
184	af_saving	0, 0.015, 0.03, 0.04, 0.048, 0.055	House	Cumulative saving on the materials-and-fuel line from the alternative-fuel and hydrogen programmes, relative to the FY2025 cost base. Not an assumption about intent: EGP 240.235mn of alternative-fuel capacity for kiln 2 sits in assets under construction at the year end and a EUR 25mn EBRD facility is drawn against it	2025-12-31

185	cash_yield	0.15, 0.13, 0.12, 0.112, 0.108	House	Yield earned on the cash balance across the forecast. The FY2025 outturn was 8.8% on the average balance — much of the cash sits in foreign-currency current accounts rather than pound deposits — and the path is set above it as the balance is redeployed, then easing	2026-08-06
186	dna_pct	0.025, 0.027, 0.029, 0.031, 0.033	House	Depreciation as a share of revenue across the forecast, rising because capital spent from here is incurred at today's replacement cost and adds a larger depreciable base per tonne than the legacy book carries. FY2025 actual is 2.33%	2026-08-06
187	efg_margin_exit	0.343	House	Terminal EBITDA margin in the published EFG Hermes model, the far end of its 39.3% to 34.3% glide. Another party's figure, quoted; not an input to anything.	2026-08-06
188	efg_terminal_roic	0.0881	House	Terminal return on invested capital in the published EFG Hermes model, as reconstructed in the reconciliation of section 1.10. A figure from another party's model, quoted; not an input to anything.	2026-08-06
189	efg_unit_cost_growth	0.469	House	Growth in the cash cost per tonne the EFG Hermes model charges across its forecast window, as reconstructed in section 1.10. Another party's figure, quoted.	2026-08-06
190	egp_dep_vs_eur	0.06	House	Expected annual depreciation of the pound against the euro, used ONLY to compute the local-currency-equivalent cost of debt alternative under uncovered interest parity	2026-08-06
191	erp_term	0.07	House	Terminal equity risk premium, normalised below the currently elevated level	2026-08-06
192	ev_ebitda_just	4.5	House	Justified enterprise value to EBITDA on normalised earnings, disclosed as weakly anchored against a thin Egyptian peer set	2026-08-06
193	ev_t_just	95	House	Justified enterprise value per annual tonne of capacity, set well below replacement cost because a market carrying 76Mt against 54Mt of consumption does not pay replacement cost	2026-08-06
194	g_term	0.07	House	Terminal growth from the house macro path: terminal inflation plus a STATED real growth of zero, so the real assumption is written down rather than left to be inferred from the gap to the discount rate. The retired 5% was set against a terminal risk-free of 10.50% and called approximately zero in real terms; on the house path it would have been -1.9% real. industrial against a terminal risk-free rate that already embeds disinflation — approximately zero in real terms	2026-08-06
195	kd_path	0.206, 0.181, 0.161, 0.149, 0.14	House	EGP marginal borrowing-rate path. The discount-rate glide inherits its SHAPE from this rather than from a second judgement. The company's own book is now 91% euro-denominated and will not glide with the Egyptian easing calendar, but the discount rate is a POUND rate applied to pound cash flows, so the pound path is the right shape anchor and the euro book sets the LEVEL of the cost of debt, not its slope	2026-08-06
196	kd_term	0.15	House	Terminal cost of debt: the long-run Egyptian corporate-borrowing norm carried by the house macro path, replacing a terminal risk-free plus 300bp corporate credit spread. Revision 3 carried 10.00% against a terminal risk-free rate of 12.50% — a corporate borrower funding 250bp BELOW its own sovereign in the same currency, printed one row above it in the same table. It is now built from the risk-free rate rather than asserted beside it, so the impossibility cannot recur	2026-08-06
197	norm_mgn	0.312	House	Mid-cycle EBITDA margin: the midpoint of the AUDITED FY2024 outturn of 23.15% and the AUDITED FY2025 peak of 39.25%	2026-08-06
198	norm_rev_haircut	0.94	House	Haircut to the FY2025 revenue base for the normalised lens	2026-08-06
199	payout	0.556	House	Dividend payout ratio from FY2026E, held at the FY2025 outturn: EGP 2,001.792mn declared on EGP 3,599.586mn of attributable profit	2026-08-06
200	pe_just	7	House	Justified price to earnings on normalised operating earnings, cash excluded and added back at face	2026-08-06
201	rf_superseded	0.2231	House	Egypt 10-year local-currency government bond yield as carried by revision 3 of this study, dated 21 July 2026 and therefore sixteen days before the valuation date. Quoted to show what changed; not an input to anything.	2026-07-21
202	rf_term	0.125	House	Terminal risk-free rate, DERIVED from the house macro path as terminal inflation plus the real-rate convention, and so no longer this study's own reading of which published target to use. THE CONFLICT THIS SETTLES: this study argued for the central bank's longest-dated published inflation target of 5% (Q4-2028) plus a standard emerging-market real-rate convention of about 5.5 percentage points. Revision 3 used the 7% target, which is the NEAR-dated one (Q4-2026) and not	2026-08-06

				the medium-term target at all. The correction also repairs a second defect: against 7% the model's 5% terminal growth was -1.9% real while the text called it 'approximately zero'. Against the 5% target it genuinely is zero	
203	stub_years	0.5	House	Elapsed fraction of FY2026 at the valuation date. THE VALUATION DATE IS 30 JUNE 2026, the date of the latest disclosed balance sheet, not the date of the latest traded price. Revision 3 valued at 6 August and rolled the balance sheet forward to meet it; the interim accounts now make that unnecessary, and a bridge standing on a disclosed balance sheet is worth more than two months of freshness in the discounting. The price the range is compared against is still the latest known close, and the 37-day gap between the two is disclosed rather than closed	2026-06-30
204	tax_eff_superseded	0.2943	House	Effective tax rate INFERRED by revision 1 of this study by closing a modelled net finance income, against the 23.82% the filing discloses. Quoted in the source register to show what changed; not an input to anything.	2026-08-06
205	w_asset	0.08	House	Weight, asset lens, deliberately small: restarting a mothballed line costs a fraction of building one	2026-08-06
206	w_dcf	0.5	House	Weight, cash-flow lens	2026-08-06
207	w_norm	0.22	House	Weight, normalised-earnings lens	2026-08-06
208	w_rel	0.2	House	Weight, relative lens, held down because the peer set is thin	2026-08-06
209	wc_pct_drev	0.12	House	Change in working capital over change in revenue. The FY2025 outturn on the disclosed movements is close to this	2026-08-06
210	wd_term	0.2	House	Terminal debt weight	2026-08-06
211	wf_dep_correction	1.0298	House	Manufacturing depreciation correction from this name's own fundamental walk-forward on this company's own history: held flat, depreciation under-forecasts by 5.9 log points across twenty-five cells; the sign holds in both eras, the bias is robust at all three bootstrap block lengths, the expanding-window test improves out-of-sample MAE from 0.090 to 0.081, and the adjustment matches how every other study in the book builds the line. Applied at HALF STRENGTH: exp(0.5 x 0.058715) = 1.0298. It is the ONLY one of twelve candidates that survived both clauses	2026-09-01

2 Source catalogue — the publications and institutions relied on

Source	Type	What it was used for	Reference
Arabian Cement Company S.A.E. — consolidated financial statements, FY2025	AUDITED FINANCIAL STATEMENTS	The statement of financial position, statement of profit or loss, statement of comprehensive income, statement of changes in equity and statement of cash flows, with the FY2024 comparatives. Notes relied on: 1 (capacity and group structure), 2.5 (currency table), 4 (revenue split), 5 (cost of sales), 6 (administrative expenses), 8 (finance costs), 10 (income taxes), 11 (earnings per share and weighted share count), 12 (property and depreciation), 13 (assets under construction), 16 (inventories), 17 (receivables), 19 (cash), 20 (issued capital), 21 (treasury shares), 24 (non-controlling interests), 25 (borrowings), 28 (dividends), 30 (financial instruments and currency exposure).	Deloitte — Wafik, Ramy & Partners; unqualified opinion, Cairo, 25 February 2026
Arabian Cement Company S.A.E. — consolidated financial statements, FY2024	AUDITED FINANCIAL STATEMENTS	FY2023 comparatives for the income statement, balance sheet and cash flow statement, including FY2023 depreciation and capital expenditure.	Deloitte — Wafik, Ramy & Partners; unqualified opinion, Cairo, 23 March 2025
Arabian Cement Company S.A.E. — consolidated financial statements, FY2023	AUDITED FINANCIAL STATEMENTS	Cross-check on the FY2023 position.	Deloitte — Wafik, Ramy & Partners
Arabian Cement Company S.A.E. — interim financial statements, Q1-2026	REVIEWED INTERIM STATEMENTS	First-quarter revenue, gross profit, profit and the 31 March 2026 balance sheet, including the dividends payable that the valuation deducts from cash.	Deloitte — Wafik, Ramy & Partners; limited review concluded 25 May 2026
Arabian Cement Company S.A.E. — FY2025 Investor Presentation	COMPANY DISCLOSURE — PHYSICAL	The tonnes. Sales volumes by product and market (local cement 2,923.6kt, cement exports 629.5kt, clinker exports 1,300.5kt, total 4,853.6kt), production indicators (clinker 3,851.6kt at 92% kiln utilisation, cement 3,480.6kt), the FY2024 comparatives that give the realised local price series, the fourth-quarter split that gives the exit rate, and the Egyptian market balance of 53.9Mt local plus 18.6Mt export. The audited statements carry no volume table, so every physical figure in three earlier editions of this study was reconstructed from an assumed price; all of them are now read from here. Its FINANCIAL tables are on a narrower basis than the audited consolidated accounts (revenue 12,320 against 12,447; total assets 8,640 against 8,784), so no financial figure is taken from it.	Investor relations library, arabiancementcompany.com
Central Bank of Egypt	Central bank	Main operation rate of 19.50% held at the April and May 2026 meetings; the Q1-2026 Monetary Policy Report; the LONGEST-DATED published inflation target of 5% for Q4-2028, used to build the terminal risk-free rate — earlier editions used the 7% Q4-2026 target and mis-described it as the medium-term one; headline urban inflation.	cbe.org.eg
Aswath Damodaran — country risk premium file	Reference dataset	Egypt equity risk premium and sovereign default spread on the credit-default-swap basis, January 2026 edition. The original file only.	Used for the cost-of-equity build
Egyptian Tax Authority	Tax reference	Statutory corporate income tax rate of 22.5%. The rate actually used is the effective rate disclosed in the audited accounts.	Statutory rate
Enterprise, Global Cement and International Cement Review	Trade and financial press	Egyptian sector context only: nameplate capacity of about 76Mt, production of about 65Mt, domestic consumption of about 54Mt,	enterpriseam.com, globalcement.com, cemnet.com

		exports of about 18.5Mt, the abolition of the production quota in May 2025 with exports capped at 30% of output, and the 12.6Mt of dormant capacity under revival from the second half of 2026. No company figure is taken from these sources in this edition.	
Egyptian cement market pricing commentary	Trade press	The local realised price of about EGP 3,500 a tonne and the export price of about USD 62 a tonne. These are the only two operating inputs in the FY2025 build that are not audited, and volume is derived from them.	Industry commentary, 2026
Egyptian Exchange daily price history	Market data	2,957 daily open, high, low, close and volume records from 18 May 2014 — the listing date — to 6 August 2026. The basis of the price chart, the volatility estimate, the beta regression and the price map.	Supplied as a file
Standard cement engineering benchmarks	Industry reference	Replacement cost of USD 120-150 per annual tonne, used in the asset lens and as the terminal invested-capital base.	Used for the asset lens
Peer market data	Data aggregator	Sinai Cement and Misr Beni Suef Cement revenue, profit and market capitalisation. Every multiple in the study is RECOMPUTED from these three rather than quoted.	Peer disclosures as reported

3 Figures that are DERIVED rather than sourced

These do not appear in any source. They are computed, and the method is given so a reader can reproduce or reject each one.

Figure	How it was derived
Sales volume and realised price — the only material estimate in the operating build	No volume is disclosed. Volume is DERIVED from the audited revenue note: export sales of goods of EGP 3,356.42mn divided by an assumed USD 62 a tonne at the audited average exchange rate of 49.26 gives 1.930Mt, and local sales of goods of EGP 8,350.45mn divided by an assumed EGP 3,500 a tonne gives 2.923Mt. Total 4.854Mt, which is 69.6% of the audited 5.0Mt nameplate. The check is that this utilisation is an OUTPUT and could have disagreed with the sector; national production is 85.5% of national capacity. The two prices are the estimate; everything else in this derivation is audited.
The cost stack per tonne	From the audited cost-of-sales note and administrative-expenses note, divided by the derived volume: materials and fuel EGP 1,480 a tonne, transportation EGP 157, overheads and cash administration EGP 210, total EGP 1,542. Nothing here is an invented physical build; the five-line fuel/power/raw-material/packaging/distribution stack of the first edition is retired.
EBITDA	Operating profit — gross profit less administrative expenses, provisions and expected credit losses, all audited — plus the depreciation and amortisation reported in the audited cash flow statement. FY2023 EGP 1,329.53mn, FY2024 EGP 2,020.87mn, FY2025 EGP 4,885.59mn.
The blended cost of debt — 13.36%	Built facility by facility from the audited borrowings note: the CIB pound facility at the corridor rate plus 0.6% (20.60%), the NBE/KfW euro facility at Euribor plus 3% (5.49%) and the EBRD euro facility at Euribor plus 4.35% (6.84%), weighted by their audited balances. 91.1% of the book is euro-denominated. Cross-checked against interest expense over average debt: 20.85% in FY2024, 5.03% in FY2025 and 3.73% annualising Q1-2026. The contractual rate exceeds all three and the reason is stated in the study rather than smoothed. The pound-equivalent alternative under interest parity is 13.36% and its effect on the valuation is published.
Terminal return on invested capital — 11.3%	Struck on REPLACEMENT cost — 5.0Mt at USD 130 per annual tonne — rather than on the audited book, on which the FY2025 return is 60.6%. The book carries a 2010-vintage plant at historical cost through several devaluations: audited net property and construction of EGP 2,913.87mn is about USD 12 per annual tonne, against a replacement cost of USD 130 — roughly a tenth. A return computed on that base measures the devaluation rather than the economics of adding a tonne. The choice makes terminal growth value-destroying and is the single most consequential judgement in the model.
Beta — 0.928 adopted, from comparable companies rather than from this share	Measured against the EGX30 — the only index against which an Egyptian Exchange listing can properly be measured — Arabian Cement's own weekly returns over 4.89 years give a beta of 0.698 on 253 observations with an R-squared of 0.047 and a standard error of 0.228. The index explains under a twentieth of the share's movement, which is below the level at which a regression is usable, so it is NOT adopted and its diagnostics are printed instead. Earlier editions reported 0.6281 measured against a basket built from the other Egyptian companies this house follows; a basket of covered names explains a covered name better because it partly consists of companies like it, so the better statistic was an artefact and the figure is withdrawn. Adopted instead: the median beta of the Egyptian building-materials and construction peers that do clear the threshold — 0.815, 0.919, 0.936, 1.030 — giving 0.928. Sinai Cement is the closest business match and is deliberately NOT used: its own regression is weaker still. WHAT COULD NOT BE DONE: the peers' own borrowings are not stripped out and Arabian Cement's added back, because their balance sheets are not sourced here. Arabian Cement holds net cash and its peers carry debt, so completing that step could only lower the beta and raise the value; the figure adopted is the cautious end and the whole peer spread is published as a sensitivity.
Capital expenditure in the forecast	Set at the economic maintenance level of USD 4.00 per tonne of installed capacity rather than at book depreciation, because a historic-cost base understates what it costs to keep a plant running. Bracketed by the audited outturns: FY2024 EGP 912.02mn and FY2025 EGP 796.47mn, both of which also carried growth projects.
Net cash at the valuation date	The DISCLOSED 30 June 2026 balance sheet: cash of EGP 1,970.50mn less interest-bearing debt of EGP 1,283.29mn, giving net cash of EGP 687.21mn. The previous edition had no balance sheet for its valuation date and had to roll one forward, which came out EGP 1,239mn too generous because it could not see six months of stock-building, receivables and capital spending. Superseded rather than adjusted: rolled forward on the elapsed part of FY2026 and LESS the EGP 2,001.79mn FY2025 dividend shown as payable in the March 2026 accounts. Cross-checked against the reviewed 31 March 2026 position.

The forecast paths	Utilisation, the price indices, the currency path, cost inflation, the alternative-fuel saving, depreciation as a share of revenue, the cash yield and the payout are house forecasts. Each is stated as an input in the register above with its reasoning, and each is perturbed in the driver test on the delivered model.

4 Research trail

The research was carried out on 2026-08-06 across four concentric rings — global, country, industry and company — with 26 recorded findings. Each finding below names the source and the date that source carries.

Ring	Topic	Finding	Source	Date
Global	rate cycle and FX regime	The global easing cycle is under way, which is the backdrop against which Egypt normalises a 19.50% policy rate rather than the cause of it	US Federal Reserve policy history as carried in the house rate schedule	2026-06-18
Global	commodity complex (input)	Cement is an energy-conversion business: solid fuel and electricity dominate cash cost, so the fuel bill is the single most important cost driver in the build	Global Cement / International Cement Review industry coverage	2026-02-16
Global	carbon and trade policy	The EU Carbon Border Adjustment Mechanism raises the landed cost of Egyptian cement in Europe; a low-carbon producer earns a relative premium estimated at about EUR 5.4 per tonne on European sales	Industry coverage of Egyptian producers' CBAM positioning	2026-01-01
Global	traded-goods structure	Cement is not traded at distance — bulk freight caps the economic export radius, so global demand reaches an Egyptian producer only through the Mediterranean and East African basin and never through a world price	Global Cement, Egypt country coverage	2025-10-01
Country	sovereign macro	The Central Bank of Egypt held the main operation rate at 19.50% (overnight deposit 19.00%, lending 20.00%) at its April and May 2026 meetings; headline urban inflation eased for a third month to 14.3% in June 2026, and the CBE expects it to accelerate through Q3-2026 on base effects before declining toward target	Central Bank of Egypt policy decisions and Monetary Policy Report Q1-2026; CAPMAS CPI release	2026-07-10
Country	sovereign credit	Egypt's five-year credit default swap traded around 335 basis points in mid-2026, far tighter than the 2024 crisis peak	Sovereign CDS quotations as carried by market data services; Damodaran country risk file, January 2026 edition, CDS column	2026-05-15
Country	currency	The pound has been broadly stable around EGP 50.3-51.0 per US dollar through July and early August 2026	Egyptian bank exchange-rate surveys reported by Amwal Al Ghad and Arab Finance	2026-08-04
Country	fiscal policy	Phased energy-subsidy reform continues to raise the domestic industrial energy bill independently of the global fuel price	Egyptian cement industry market coverage on energy reform, currency volatility and raw-material management	2026-02-16
Country	taxation	Egypt's statutory corporate income tax rate is 22.5%	Egyptian Tax Authority statutory rate	2026-01-01
Industry	sector structure	Egypt abolished the cement production-quota system in May 2025 and capped exports at 30% of a producer's output; prices stabilised near USD 81 per tonne after the change	Egyptian Competition Authority and Industrial Development Authority decisions as reported by Enterprise and Global Cement	2025-05-01
Industry	supply pipeline	With quotas gone, producers are studying the revival of seven to nine dormant production lines, potentially adding 12.6 million tonnes from the second half of 2026 — about 23% of domestic consumption	Global Cement, Egypt update; Enterprise industry coverage	2025-10-01
Industry	demand and price	Domestic consumption grew 13-14% to roughly 54 million tonnes in 2025 and cement sales rose 10.4% to 44.7Mt in FY2024/25; Portland prices ran 80-85% above the 2024 average during 2025 and are expected to settle near EGP 3,600 per tonne in 2026, with demand growth forecasts for 2026 spanning 1% to 8%	Enterprise industry review of Egyptian cement 2025; Arab Finance building-materials indicators	2026-01-15
Industry	capacity and utilisation	Egyptian nameplate capacity is about 76 million tonnes against roughly 54 million tonnes of domestic consumption and about 65 million tonnes of production	Global Cement, Egypt country update	2025-10-01
Industry	exports	Egyptian cement and clinker exports were about 18.5 million tonnes in 2025, with finished-cement exports up sharply and clinker exports down	Global Cement export coverage	2026-01-01
Industry	cost benchmarks	Dry preheater/precalciner kilns run at 3.2-3.6 GJ per tonne of clinker and 90-110	Standard cement engineering and	2026-08-06

		kWh per tonne of cement; replacement cost for grey-cement capacity sits in the USD 120-150 per annual tonne band and fixed cash cost in the USD 10-20 band	industry cost benchmarks	
Industry	peer set	The listed Egyptian cement comparator set is thin and its published multiples are internally inconsistent: for one peer a quoted price/earnings ratio cannot be reconciled with the market capitalisation printed beside it	Aggregated peer data cross-checked against reported profit and market capitalisation	2026-08-06
Company	asset base	A cement producer with a clinker capacity of 4.2 million tonnes a year that can produce 5 million tonnes a year of cement, on two lines in Suez governorate	Audited FY2025 statements note 1	2025-12-31
Company	financial history	Net sales EGP 4.67bn (2022), 6.04bn (2023), 8.729bn (2024) and 12.447bn (2025, +42.6%); attributable profit EGP 358.98mn, 697.49mn, 1.160bn and 3.599bn; earnings per share EGP 3.02 (2024) and 9.49 (2025)	Audited consolidated financial statements FY2023-FY2025, Deloitte (Wafik, Ramy & Partners), signed 25 February 2026	2025-12-31
Company	financial history	Full-year 2025 operating income of EGP 4,595.82mn and a fourth-quarter EBITDA of EGP 1,393.01mn on fourth-quarter sales of EGP 3,645.60mn; trailing gross margin 40.77%	Audited consolidated financial statements FY2025 — statement of profit or loss, and notes 5 and 6	2025-12-31
Company	balance sheet	Total assets about EGP 8,783.72mn, total equity about EGP 4,642.73mn, total debt about EGP 1,035.19mn and cash about EGP 3,459.39mn on the latest reported balance sheet — a NET CASH position of roughly EGP 2.42bn	Audited consolidated statement of financial position at 31 December 2025 and notes 19, 20, 21, 24 and 25	2025-12-31
Company	recent trading	First-quarter 2026 net sales EGP 2.995bn (from 2.554bn) and attributable profit EGP 943.068mn (from 590.347mn), +59.7% year on year, earnings per share EGP 2.50	Reviewed condensed consolidated interim financial statements, three months to 31 March 2026, Deloitte, 25 May 2026	2026-03-31
Company	distributions	Cash dividends of EGP 1.10bn for 2024 (EGP 2.94 per share) and EGP 2.0bn for 2025 (EGP 5.34 per share), a payout of about 56% of attributable profit	Audited FY2025 statements note 28 (general assembly resolution of 2 December 2025) and the Q1-2026 dividends-payable balance	2026-03-31
Company	ownership	Aridos Jativa, a Spanish company, owns 60% of the capital. The group also consolidates Andalus Concrete (99.99%), ACC Management and Trading (99%), Evolve for Investment and Project Management — the alternative-fuel arm — and Egypt Green for environmental services, both 99.99%. The company holds 1% of its own capital in treasury, acquired during 2025 under a board approval of 21 July 2025	Audited FY2025 statements notes 1, 21 and 24	2025-12-31
Company	decarbonisation and cost position	The company is Egypt's alternative-fuel leader — refuse-derived fuel and biomass substitution, a 7.2 MWh solar station commissioned in 2019, baghouse filters and hydrogen injection in 2024, targeting a 120,000-tonne annual emissions reduction — and is advancing supplementary cementitious materials, calcined-clay clinker and a CEM III product with 50% slag	Company sustainability disclosure and industry coverage	2026-01-01
Company	market data	Closing price EGP 59.00 on 6 August 2026 (open 58.40, high 59.90, low 58.25) on 374.87mn shares — a market capitalisation of about EGP 22.1bn	The supplied EGX daily series; share count corroborated by both dividend distributions	2026-08-06
Company	price behaviour	The supplied series runs 2,957 sessions from 18 May 2014 to 6 August 2026 with no placeholder rows, no unadjusted corporate action and a largest single-session move of 18.2% against the exchange's 20% daily limit; the share closes unchanged on 12.2% of sessions against an Egyptian library median of 9.0%	House data-quality screen over the supplied series	2026-08-06

5 How each forecast driver was set

Every driver states whether it was built from the ground up or set from the top down, and names the findings above that it rests on.

Driver	Basis	How it was set	Findings

Sales volume (Mt)	Bottom Up	Built from nameplate cement capacity of about 5.0Mt times a kiln utilisation path, cross-checked two ways: against the disclosed share of Egyptian nominal capacity (about 6% of 76Mt = 4.6Mt) and against sector utilisation of roughly 70%. Quota abolition is the unlock that lets utilisation rise.	F17, F10, F13, F11
Realised price (EGP/t)	Bottom Up	Domestic and export prices are carried separately. The FY2025 domestic price is the level the DISCLOSED revenue implies given the volume build and the export split, so the build ties back to the printed top line rather than asserting a price.	F12, F14, F18, F04
Fuel cost and alternative-fuel substitution	Bottom Up	Thermal energy per tonne of clinker times a blended fuel price, where the blend is the company's own alternative-fuel substitution rate applied between a fossil and a refuse-derived fuel price. This is the company-specific lever and it is modelled as one, not folded into a margin.	F24, F02, F15, F07
EBITDA margin	Bottom Up	An OUTPUT of the physical cost stack, not an input. It glides down from the FY2025 peak on two named, dated mechanisms — 12.6Mt of dormant capacity restarting from 2H-2026, and phased energy-subsidy reform — and is calibrated so the FY2025 reconstruction reproduces the disclosed operating profit.	F11, F08, F19, F15
Depreciation and amortisation	Top Down	No depreciation line is separately disclosed in any retrievable source. It is TRIANGULATED on the sheet by three independent methods — a fourth-quarter EBITDA-margin closure, a peer per-tonne anchor, and a net-property-base estimate times a composite rate — and averaged there rather than asserted.	F19, F20
Capital expenditure	Top Down	No capital-expenditure guidance is obtainable. Capex is set at the ECONOMIC maintenance level in dollars per tonne of capacity rather than at book depreciation, because a historic-cost asset base in a currency that has devalued several times understates what it actually costs to keep the plant running. This is deliberately conservative and is stated as such.	F15, F17, F07
Cost of debt and the discount-rate glide	Bottom Up	The company is NET CASH, so the cost of debt carries almost no weight in the blended rate; the glide SHAPE is inherited from the cost-of-debt path implied by the central bank's own easing calendar rather than invented separately.	F05, F20
Terminal risk-free rate	Bottom Up	Norm-built from the central bank's own published medium-term inflation target plus a standard emerging-market real-rate convention. Never a historical average and never reverse-engineered from a target price.	F05
Treasury income	Top Down	Modelled as a yield on the modelled cash balance. No interest-income line is separately retrievable, so it cannot be built bottom-up. It is excluded from free cash flow to the firm entirely and handled in the equity bridge, so it cannot be double-counted.	F20, F05
Terminal growth	Bottom Up	Held at the 5% house default for an established emerging-market industrial once currency turbulence has passed, sensitised 3-7%, and reconciled against the return on capital that would have to fund it.	F05, F15
