7,404

Four lenses, one bridge, one valuation date

Lens 2 is on the TRAILING metric so it borrows no discount factor from lens 1. Lens 3
cash added at face outside the multiple. Lens 4 uses the same cost-of-equity glide lens

Base-year EBITDA	2,629
Enterprise value at spot	9,310
The company's OWN trailing EV/EBITDA	3.54x
Justified multiple = trailing x (1 + re-rating)	**3.54x**
LENS 1 — discounted cash flow	**4.88**
LENS 2 — relative multiples, on the trailing metric	10,509
LENS 3 — normalised earnings power, DISCOUNTED	1,868
LENS 4 — book value and sustainable return	3.71
WEIGHTED CENTRAL	**5.53**
against spot	-39.2%

The weighted range on the Summary sheet is the bear and bull columns weighted with these san
from the cash-flow lens alone — so the word "weighted" applied to the centre and not to the ends

is forward-dated and is therefore DISCOUNTED to the valuation date at the cost
1 uses. All formulas.

8.14			
1.027	**5.08**		
23.39%	1.25x	**4.64**	

ne weights. The previous edition labelled a row "weighted central" and then took the minim
s, and the published spread was about two and a half times too wide.

of equity, with net

um and maximum across the four lenses — both of which came
