Savola Group Company (Saudi Exchange: 2050) — Bibliography and Source Register

Companion document to the valuation study dated 19 August 2026 (second edition — critique response; supersedes the 18 August first edition). It records where every number in that study came from.

READ FIRST

This document exists so that a reader can check the study rather than trust it. It lists every input the valuation model uses, together with the value, the source, the date of that source, and the research layer it belongs to. Nothing in the study is computed from a figure that does not appear here.

Two things are worth knowing before reading the tables. First, inputs marked "House" are judgements or derivations made by the analyst, not disclosures by the company — each carries the reasoning that produced it, and the reader is free to disagree and re-run the model (the companion workbook reprices live). Second, where a disclosure could not be reached or does not exist, that is recorded as a negative result at the end of this document rather than quietly filled in.

The research layers

Layer	What it holds
Company	the company's own audited/reviewed statements, releases, presentations and exchange filings — the only permitted source for its reported history
Company/derived	arithmetic on audited figures (ratios, day counts, residuals that must foot to an audited total — each derivation is stated)
Market	traded prices and rates: the share price, Herfy's price, peer multiples, interbank rates, the study's own beta regression
Country	sovereign data: yields, spreads, risk premia, inflation
Global	the dollar curve and the commodity complex
House	the analyst's judgements: growth paths, held margins, weights, the terminal — each with its reasoning and its overturn condition

Primary documents

Document	Publisher / auditor	Dated	What was taken
FY2025 consolidated financial statements (audited)	Savola Group; Deloitte & Touche, unmodified opinion	05-Mar-2026	the base year in full: statements, five-segment note, category detail, notes 1-46
FY2024 consolidated financial statements (audited)	Savola Group; KPMG	10-Mar-2025	FY2023 comparatives; the rights issue, capital reduction and Almarai distribution mechanics
FY2023 consolidated financial statements (audited)	Savola Group	14-Mar-2024	FY2022 comparatives; the pre-reset balance sheet
Q1-2026 interim condensed statements (reviewed)	Savola Group	06-May-2026	first-quarter actuals and the 31-Mar-2026 balance sheet
Q2-2026 interim condensed statements (reviewed)	Savola Group	05-Aug-2026	the Al Mehbaj consideration (note 19: SR 11.4mn); the 30-Jun-2026 balance sheet (loans 2,664.5, leases 3,716.8, equity 5,360.5 — the WACC weights and the book-lens base); the ex-

			treasury EPS divisor (296.682mn); the Tiryaki share settlement
H1-2026 earnings release	Savola Group	06-Aug-2026	half-year actuals, net debt, capital expenditure, the Sudan exit, the Mehbaj acquisition, the second-half cost warning
Q2-2026 investor presentation	Savola Group	06-Aug-2026	category volumes and unit gross profits, the store network, segment debt/leases
FY2025 investor presentation	Savola Group	09-Mar-2026	full-year category units, the reported-to-recurring bridge, capex by unit
Annual Report 2025	Savola Group	30-Mar-2026	the dividend policy, governance and related-party context, the store programme
Saudi Exchange announcements (FY2025 results; FY2025 dividend; Q1-2026 results)	Saudi Exchange / Savola Group	Mar-May 2026	the official results tables and the dividend terms (SAR 1.70, ex 07-May-2026)
US Treasury constant-maturity yields	Federal Reserve (FRED)	14-Aug-2026	US 10Y 4.68% and 1Y 3.98% — the risk-free construction's dollar leg
FTSE Saudi Government Bond Index (SAGBI) factsheet	FTSE Russell	31-Jul-2026	the OBSERVED SAR sovereign curve: 7-10y bucket yield 5.52% at 8.24y average life (whole index 5.48%; curve 5.22-5.83%) — the risk-free rate
iBoxx Tadawul SAR Government Sukuk Index publications	Saudi Exchange / S&P DJI	31-Mar-2026	corroboration: 5.44% annual yield at 6.07y duration
Sovereign risk dataset (July 2026 update)	NYU Stern (Damodaran)	01-Jul-2026	Saudi Aa3 adjusted default spread 0.48%; total equity risk premium 4.94% (4.20% mature + 0.74% country) — the rating-basis legs
Sovereign risk dataset (January 2026 update)	NYU Stern (Damodaran)	05-Jan-2026	the CDS-basis legs only (CDS 0.98% / ERP 5.72%) — the July CDS file was not retrievable; flagged wherever the CDS basis is quoted
Saudi sovereign issuance	Emirates NBD Research note; NDMC announcements	Jan / Aug 2026	context for the retired proxy construction; the 1Y SAR savings-sukuk rate (4.70%) still anchors the surplus-cash yield
FAO Food Price Index	FAO	07-Aug-2026	vegetable oils at a four-year high; sugar −8% year on year; wheat firming
Consumer price index, July 2026	GASTAT (via press reports of the release)	14-Aug-2026	Saudi CPI +1.8%
Market quotes (Savola, Herfy, Almarai, Al Othaim, BinDawood, NADEC, Wilmar; 3M SAIBOR) — SETTLED closes of 18-Aug-2026, each verified against the following session's prior-close field	Argaam (prior-close verification); stockanalysis.com; TradingEconomics — market data only	19-Aug-2026	prices and trailing multiples for the cross-checks and the bridge's Herfy leg — never a source for any Savola reported figure. Al Othaim's 11-Aug-2026 H1 loss announcement disqualifies its trailing multiple (n/m)

The input register — every input, with value, source, date and layer

Grouped by layer. Values are as the model consumes them (SAR millions unless the row says otherwise; paths list the five forecast years FY2026E-FY2030E).

Layer: Company

Input	Value	Source and construction	Date

asset_life_years	18.03	Audited consolidated FS FY2025, savola.com/en/investors/financial-statements (Deloitte & Touche, unmodified opinion, authorized 05-Mar-2026), note 6, DERIVED BY IDENTITY from the note's own two columns and LABELLED as derived: gross cost of the depreciable base (buildings 2,824,359 + leasehold improvements 2,133,648 + plant and equipment 2,563,647 + furniture and office equipment 3,011,907 + vehicles 446,993 = 10,980,554, land and construction in progress excluded because neither is depreciated) divided by the year's own depreciation charge of 608,933. The policy note gives RANGES per class (buildings 5-50, leasehold improvements 3-33, plant and equipment 3-40, furniture and office equipment 1-10, vehicles 2-15) and no weighting, so a single figure cannot be read off it; the identity supplies one from figures that exist. CROSS-CHECKED against FY2024's own columns, which give 17.05 on the same identity, and the route is clean here because 2025 carries no business-combination additions to contaminate the charge. TWO CLASSES COME OUT ABOVE THEIR OWN DISCLOSED RANGE (vehicles 31.9 years against 2-15, furniture 13.9 against 1-10), which says those bases are largely written down rather than that the note is wrong, and is recorded rather than smoothed	2026-03-05

beta	1.087	tier-1 own-stock beta: 5y weekly Dimson regression of SAVOLA vs TASI (engine registry copy of the exchange's published index, as-of 18-Aug-2026): beta 1.087, R2 0.159, n 254, SE 0.215, CI90 [0.73, 1.44]; produced by the sanctioned beta_regression.own_stock_beta() and attested by assert_beta_provenance(); Blume cross-check 1.058	2026-08-18
herfy_price	15.5	Herfy Food Services (Tadawul 6002) SETTLED close 18-Aug-2026, confirmed as the prior-session close on Argaam 19-Aug-2026 (last trade 15.39 intraday 19-Aug). A 15.66 figure in one external audit is rejected against this receipt	2026-08-19
herfy_shares_mn	64.68	Herfy shares outstanding, market data 18-Aug-2026	2026-08-18
peer_pe	ALMARAI: 19.77; OTHAIM: None; BINDAWOOD: 20.2; NADEC: 13; WILMAR: 12.54	TTM P/E at SETTLED 18-Aug-2026 closes (the first edition's table mixed 17-Aug quotes under an 18-Aug caption): Almarai 19.77 (48.60 close), BinDawood 20.20 (4.66), NADEC 13.0 (exact at 18-Aug), Wilmar 12.54 (3.706). AL OTHAIM IS N/M: its 11-Aug-2026 H1 announcement shows an attributable LOSS of SAR 53.5mn (Q2 -107.1 on inventory provisions), so TTM earnings to 30-Jun-2026 are ~79mn and the trailing multiple (~57x) is disqualified — same treatment as Herfy (loss-making, n/m). The first edition's 19.4x was a pre-announcement window quoted as current. Cross-check only, never a build source	2026-08-19
saibor3m	0.0474	3M SAIBOR 4.74% (Jun-2026, TradingEconomics market data — labelled cross-check level for the SAR marginal cost of debt)	2026-06-30
spot	30.3	Tadawul close for SAVOLA (2050), 3 September 2026, from the price file the principal supplied that day and committed to the repository. THE STUDY IS RE-STRUCK ON IT because no study is delivered against a stale price: the prior edition stood on the settled 18-August close of 25.40, and the stock has since risen 19.3%, which turns a central 7.3% ABOVE the price into one 17.4% BELOW it. The 25.40 itself was a correction — the 25.30 in that day's export was an intraday print, the third occurrence of the settled-print vendor defect class in this project (TASI, RIYADHCABLE) — and it is recorded here rather than dropped, because the corrected figure is the one this edition moves away from	2026-09-03

Input	Value	Source and construction	Date
anchor_days	246.0	31-Dec-2025 valuation date to the 3-Sep-2026 price anchor (246 days). Sixteen days longer than the prior edition's, because the anchor moved with the price it is compared against	2026-09-03
capex_path	810.0, 900.0, 880.0, 860.0, 850.0	FY26E 810 = H1 actual 385 + H2 at the FY25 H2 run-rate + Panda openings; FY27E 900 (new Jeddah nuts facility + refinery upgrades per AR2025 + 20 stores), easing to 850; FY25 actual was 858 (Panda 567, Foods 231) and capital commitments 425 stood at Dec-25	2026-08-18
crit_delta_lease	-0.0397	SUPERSEDED-EDITION DELTA: charging the FULL lease additions in the cash-flow waterfall rather than renewals only, priced against the 18-Aug-2026 first edition's own central	2026-08-19
crit_delta_relative	-0.032	SUPERSEDED-EDITION DELTA: the relative lens rebuilt trailing-on-trailing with Al Othaim not meaningful, before the offsetting quote refresh	2026-08-19
crit_delta_roic	-0.016	SUPERSEDED-EDITION DELTA: computing the terminal return from the model's own year five instead of inputting 10.5%, priced against the first edition's central	2026-08-19
frz_rev_g	0.01, 0.035, 0.035, 0.03, 0.03	H1-2026 -1.4% with a stronger Q2; FY26E +1% (H2 recovery per company), then 3-3.5% B2B/food-service growth	2026-08-18
g_term_derived	0.0271	DERIVED, never typed: (1 + terminal inflation 0.0200 from the house Saudi macro path) x (1 + stated real growth 0.0070) - 1. The previous edition's 2.50% rested on this study's own 1.8% CPI reading rather than on the house path.	2026-09-03
g_term_real	0.007	Terminal REAL growth of 0.7%: staples volume growth a little under population growth, below real GDP. This is the SAME real rate the previous edition argued in prose ('Saudi CPI 1.8% + ~0.7% real staples growth'); what changes is that it is now STORED as a real rate and the nominal is DERIVED from the house inflation path, so a reader can tell whether the company is assumed to grow faster or slower than prices. A typed nominal 2.5% cannot answer that question. Real growth is also now CHARGED for the capital it consumes, which the retired construction did on its own terms and this one does on the model's own forecast	2026-08-14
herfy_rev_g	-0.045, 0, 0.02, 0.02, 0.02	H1-2026 actual -6.8%; FY26E -4.5% (softer H2 comps), stabilising then +2% — no turnaround projected beyond the company's own cost actions	2026-08-18
kd_eg_localeq	0.065	EGP tranche (417.2 of 1,893.9) at SAR-equivalent cost: under covered interest parity the 25-27% EGP nominal cost converts to the SAR rate + Egypt credit/liquidity spread; carried at 6.5% (SAR	2026-08-18

		marginal + ~75bp) — NOT the raw EGP coupon, which would misstate a SAR-nominal WACC	
kd_other	0.055	AED/DZD minor tranches (220.4) at ~5.5% local-equivalent	2026-08-18
kd_sar	0.0574	marginal SAR cost of debt = 3M SAIBOR 4.74% + ~100bp murabaha spread on Savola's sharia-compliant facilities (1.3bn of the book, note 21.1); sits above the 1Y sovereign 4.70% as it must	2026-08-18
kinan_g	0.03	growth on Kinan's contribution off the annualized H1-2026 actual (34 x 2): ~3%/yr with Saudi real estate; falsified by Kinan's own results	2026-08-18
norm_ebitda_mgn	0.092	normalized mid-cycle operating EBITDA margin 9.2% (ex-associates): inside the observed FY2023-FY2025 envelope 8.9%-9.5% (computed on the model's own basis) and between FY2025's 9.0% and the H1-2026 ~9.4% restated level	2026-08-18
nuts_gm_path	0.265, 0.27, 0.27, 0.27, 0.27	FY25 residual category GM 26.1% (segment-note GP less the three disclosed categories); H1-2026 blended 29.9% disclosed; forward 26.5-27% — direction supported by the measured UAE margin and the Mehbaj/Jeddah integration, size capped	2026-08-18
nuts_rev_path	730.0, 800.0, 848.0, 890.0, 926.0	FY25 base 768.9 (residual of the four categories against the audited FP segment revenue) — FY26E steps DOWN 5.1%, anchored on the H1-2026 actual 337 (Bayara UAE 278 + KSA 59; nuts is H2/festive-season weighted) with the Mehbaj bolt-on from Jul-2026 (total consideration SR 11.4mn per the Q2-2026 interims note 19; modelled as a modest KSA revenue step +40 in H2-26E, +8.5% FY27E, then +5%) — flagged as the least-anchored revenue line	2026-08-19
oil_gpt_path	740.0, 745.0, 745.0, 745.0, 745.0	GP/ton: FY25 724, H1-2026 actual 762; FY26E 740 = H1 762 blended with a replacement-cost-squeezed H2 (company's own Q3/Q4 warning + FAO); held 745 after — the observed improvement is NOT projected further (no measured mechanism)	2026-08-18
oil_rpt_g	0.005, 0.015, 0.015, 0.01, 0.01	revenue/ton: H1-2026 5,570 vs H1-2025 5,416 (+2.8% computed); FY26E +0.5% on the FY25 base then +1-1.5%/yr pass-through of the FAO veg-oil rise (Jul-2026 index highest since Jun-2022)	2026-08-18
oil_vol_g	0.125, 0.04, 0.03, 0.025, 0.02	FY2026E +12.5% = H1 actual +16.1% carried at a moderated +9% H2 (B2B wins annualise; Algeria record volumes); then fading to market growth. Mechanism: company-reported share gains and exports, not price	2026-08-18
panda_scale_step	0.001	Framing A store-opex scale gain: -10bp/yr from FY2028 as CXR conversions and e-commerce density mature; ZERO in Framing B	2026-08-18
pas_gpt_path	520.0, 520.0, 520.0, 520.0, 520.0	GP/ton: H1-2026 actual 525 (73/139); FY2025 DISCLOSED 445 (deck p17, 440 in FY2024); held at 520 — the wheat/packaging tailwind the company names is retained, not amplified	2026-08-18
pas_rpt_g	0.02, 0.01, 0.01, 0.01, 0.01	revenue/ton +2% FY26E (H1-2026 2,101 vs H1-2025 2,052 = +2.4% computed), then +1%	2026-08-18
pas_vol_g	0.03, 0.03, 0.025, 0.02, 0.02	company-stated H1-2026 volume +3.1% (registered rounded pair 139/135 computes +3.0%) carried, wheat-cost tailwind supporting competitiveness	2026-08-18
pe_discount	0.2	conglomerate / EM-mix discount applied to the peer-mix P/E: ~21% of revenue is Egypt (Caa1 sovereign) and the group stacks a holding level over four operating legs; 20% base, published undiscounted alongside and sensitized 10-30%	2026-08-18
rf_proxy_edition1	0.0553	SUPERSEDED. The first edition's synthetic risk-free rate (US 10-year plus a new-issue spread), built when this desk believed no direct Saudi sovereign series was reachable. It is registered rather than typed because both documents quote it to show what changed, and this model cannot compute it — a different model produced it	2026-08-18
roic_term_variant	0.105	RETIRED AS THE BASE, kept as a labelled UPSIDE VARIANT: the first edition set terminal ROIC 10.5% as an input, above every return the model itself produces (9.2% rising to ~9.7%) — an undisclosed step-up on 75% of enterprise value. The second edition's terminal ROIC is COMPUTED as the model's own year-5 NOPAT on year-5 opening invested capital; the 10.5% brand/shelf-position case is published beside it, never averaged (dual-framing rule)	2026-08-19

sps_g_A	-0.06, -0.03, -0.01, 0, 0	FRAMING A sales-per-average-store path: measured H1-2026 density change, published as a range -7.1% (Jun-25=213 assumption) to -6.0% (interpolated 218); the FY26E opening -6% sits at the interpolation end, fading as CXR (149 stores done) and e-commerce (~2.5x) mature	2026-08-19
sps_g_B	-0.06, -0.03, -0.03, -0.03, -0.03	FRAMING B: -6% in FY2026E then the erosion never fades — competition and small-format mix keep density falling 3%/yr forever (the study states this exact path wherever Framing B is described)	2026-08-19
stores_jun25_assumed	213.0	ASSUMPTION (flagged): Panda store count at 30-Jun-2025 — NOT disclosed in any reachable company document (searched: FY2025 & Q2-2026 decks, H1 releases, interims). 213 = Dec-2024's 209 + 4 net, mirroring the disclosed H1-2026 cadence (+6/-2); the linear-interpolation alternative is 218, and the sales-per-store change is published as a range over both bases	2026-08-19
sug_gpt_path	215.0, 212.0, 212.0, 212.0, 212.0	GP/ton: FY25 191, H1-2026 actual 218 (KSA margin recovery + Egypt); FY26E 215, then 212 — holds most of the measured gain without projecting more	2026-08-18
sug_rpt_g	-0.075, 0.005, 0.005, 0.005, 0.005	revenue/ton: H1-2026 2,036 vs FY25 2,252 computed (-9.6%); FY26E -7.5% on the FY25 base (soft world sugar, FAO -8% y/y; committed refined-sales book 1,044mn on 544k t = 1,918/t at Dec-25); flat-to-+0.5% after	2026-08-18
sug_vol_g	0.055, 0.025, 0.02, 0.02, 0.015	FY2026E +5.5% = H1 actual +7.2% with +4% H2; then 1.5-2.5% (KSA demand + Egypt supply resilience per company disclosures)	2026-08-18
tax_rate	0.195	combined zakat + income tax on profit: FY2023 17.6% (228.5/1,299.0), FY2025 normalized ~18.7% (tax 131.0 + underlying zakat ~30 on PBT 861.7), Q1-2026 20.5% (70.0/341.6) -> 19.5% held flat and sensitized	2026-08-18
tw_e	0.65	terminal equity weight 65% (explicit-window market weights re-based to the model's own equity value; leases stay a structural 25-27% of capital for a leased-store retailer)	2026-08-18
tw_loans	0.08	terminal loans weight 8%	2026-08-18

Layer: House/derived

Input	Value	Source and construction	Date
herfy_cash_est	45	CONSTRUCTED (flagged): Herfy cash inside group cash — note 20 FY2025 cash flows (CFO 143.7, CFI -11.7, CFF -128.3) imply a small stable balance; Expert 1 removes it alongside Herfy's liabilities	2026-08-19
herfy_cur_stack_est	80	CONSTRUCTED (flagged): the current-portion lease liability inside Herfy's 266.980 current liabilities — Herfy's financing outflow of 128.264 in FY2025 (note 20 cash-flow rows, zero dividends) is lease principal + interest, consistent with a ~80 current lease portion; the rest of current liabilities is trade payables, which the Expert-1 stack never deducts	2026-08-19

Layer: Company/House

Input	Value	Source and construction	Date
frz_ebitda_mgn	0.137	H1-2026 actual 13.7% held	2026-08-06
panda_gm	0.232	Panda gross margin held at the H1-2026 actual 23.2% (presentation basis) — Q4 seasonality helps but promo intensity offsets; no uplift projected	2026-08-06
rou_growth	0.05, 0.045, 0.04, 0.035, 0.03	right-of-use charge grows with the Panda store network (leases are store-driven: Panda holds 2.9bn of the 3.7bn group lease book per the Q2-2026 presentation)	2026-08-06
stores_path	247.0, 267.0, 285.0, 300.0, 312.0	company guidance 20+ stores/yr (Q2-2026 presentation 2026 target; AR2025); tapering to +12 by FY2030. H1-2026 delivered +4 net (231 at June); the guidance base implies +16 net in H2-2026 — an H2-weighted cadence the FY2025 full-year +18 net supports but	2026-08-19

		whose half-split is undisclosed. The +8/yr run-rate alternative is priced in the sensitivity section and named a falsifier in the caveats	
unalloc_path	130.0, 133.0, 136.0, 139.0, 142.0	unallocated corporate costs: 2x the H1-2026 cash-based 64, growing ~2%/yr (Saudi CPI)	2026-08-06

Judgements — and what would overturn each

Judgement	What would overturn it
Panda sales density stabilises (Framing A is the base case)	two further quarters of density erosion at the measured first-half pace; the study publishes Framing B beside it at all times
Oil unit gross profit held below the first-half actual for the rest of 2026	a second-half print that HOLDS the first-half unit margin — the model is then too low by construction and should be restruck
Sugar and pasta unit-margin gains retained but not extended	either a disclosed capacity/mix change (extend) or a give-back in the prints (retract)
The 20-store-per-year programme continues through FY2030	the company's own guidance changing; capex would be re-pathed the same day
Combined zakat-and-tax rate 19.5%	a structural change in the Egypt mix or a new assessment cycle; the sensitivity is on the workbook's driver test
Terminal: growth 2.5%; return on capital COMPUTED from the model's own year five (the 10.5% case is a labelled variant, never the base)	evidence the group can compound above the computed return at scale — three years of realised returns above 10.5% would justify promoting the variant
Risk-free: the published SAR sovereign curve (FTSE SAGBI 7-10y)	a change in the published curve itself; both ±50bp alternatives are already priced in the study
The June-2025 Panda store count assumed at 213 (the derivation range −7.1% to −6.0% is published; the build opens at −6%)	the company disclosing the count, or any half-year store series
Store path on company guidance (20+/yr) rather than the H1 run-rate	H2-2026 openings materially below the +16 the guidance base requires; the run-rate variant is priced in the study
Beta 1.087 (own stock vs the exchange index, five years weekly)	a materially different reading once eighteen months of clean post-reset history exist; the 90% interval is priced in the study
Peer-mix multiple with a 20% conglomerate/Egypt discount	a de-rating of the Saudi consumer peer set toward the dividend-discount multiple (the study's own crosswalk) — the discount band 10-30% is published
Kinan at capitalized earnings in the bridge	a transaction or disclosure evidencing either the carrying floor or the net-asset value; all three constructions are published in the workbook

Negative results — searched, not found, recorded (and two first-edition entries corrected)

What was sought	Where	Outcome
Panda like-for-like sales series	all company disclosures	NOT PUBLISHED — sales per average store is derived from disclosed revenue and store counts, and the derivation is the study's central contested judgement
Panda store count at 30-Jun-2025	FY2025 and Q2-2026 presentations, both H1 releases, the interim statements	NOT DISCLOSED — assumed at 213 (registered as an assumption); the density change is published as a range over the 213 and interpolated-218 bases
Numeric FY2026 revenue/margin guidance	company disclosures	NONE EXISTS — only store-count and store-refresh targets are guided
July-2026 CDS legs of the sovereign risk dataset	the dataset's archive	NOT RETRIEVABLE this session — the CDS basis stays on the January vintage, flagged wherever quoted

FY2023 continuing-basis figures excluding Türkiye	FY2024 and FY2025 statements	NOT PUBLISHED — FY2023 is presented on its own audited basis and the Türkiye inclusion is flagged wherever that column appears
CORRECTED RECORD — Al Mehbaj consideration	first edition: recorded searched-and-not-found	IT WAS DISCLOSED: Q2-2026 reviewed interims, note 19 — SR 11.4mn (5.4 paid, 6.0 deferred). The first edition read the release and deck but not the filed interims; external audit caught it, and the figure is now consumed in the bridge and the nuts build
CORRECTED RECORD — a directly quotable 10-year SAR sovereign yield	first edition: recorded inaccessible; a proxy was constructed	IT IS PUBLISHED: the FTSE SAGBI factsheet carries the curve (7-10y 5.52%, 31-Jul-2026), and the exchange's iBoxx SAR sukuk index corroborates. The proxy happened to land on the published level (5.53% vs 5.52%) — luck, not method; the published curve is now the source

Aggregator and disclosure discrepancies

Four are on record. (1) The uploaded price export's 18-Aug-2026 row carried 25.30 — an intraday print; the settled close was 25.40 (verified on the following session's prior-close field). The third occurrence of this vendor defect class in this project's history; every quote in this edition is settled-close verified. (2) The market-data page used for peer quotes lists Savola's trailing earnings on the reported basis (still containing the zakat release and the Sudan gain); the study uses the company's own recurring bridge. (3) The FY2025 zakat reversal is disclosed three ways on three bases — 300.0 in the presentation's recurring bridge (zakat-and-other accruals), 217.4 net in the audited FS note 29, 247.3 gross of related expenses in the results announcement; the recurring base of 539.1 is the company's own bridged figure and is unaffected. (4) One external audit quoted Herfy's 18-Aug close at 15.66; the settled close is 15.50 (prior-close verified), and 15.50 is used. The Almarai distribution carries two legitimate fair-value framings, both used with their referents named: SR 21.1bn for the entire stake at settlement (FY2025 FS note 16) and SR 12.75bn for the in-kind dividend leg alone.
