THE RULE
IT CALCULATES. IT DOES NOT STORE.

Exactly ONE class of cell is pasted in this workbook: a figure read off an audited or disclosed filing, or a st
that define each sensitivity grid point. Everything else is a live formula.

The previous edition also pasted its sensitivity grids, its beta sweep and its bear and bull columns, on the g
That was 27.6% of the file, and it was the part a reader would most want to interrogate. Three of those pas

The Sensitivity sheet now writes the entire forecast engine out again, in formulas, once for every grid poi

WHAT IS AUDITED AND WHAT IS NOT
The base year is the twelve months to 30 June 2026. The first half of it — July to December 2025 — is AUD
is REPORTED: a disclosure to the Egyptian Exchange dated 29-30 July 2026, not a filing. Half of this base

The gross profit of that reported half is NOT used as released. Run through the company's own first-quart
profit the same release reports. The gross profit used here is solved from the profit line, which passes two

THE ONE OPERATING INPUT THAT IS NOT READ OFF A FILING
Note 15-A discloses the cost stack for the company and not by line. The processing-intensity weights on As
are registered, dated and sensitised like every other input rather than hidden inside a formula.

re the blue cells on Assumptions, and the blue lever cells

odel re-run and a re-run cannot be written inside a grid.
roduce.

ptions and every sensitivity cell in the file moves with it.

ified opinion. The second half — January to June 2026 —
study says so wherever it uses it.

ed figure implies a profit after tax about 12.6% above the
Base Year rows 13 to 17 show the whole test.

gement, and the per-line margins depend on them. They

Summary — the answer, and every lens behind it

Nothing on this sheet is typed. Every figure points at the sheet that computed it, so a driver cha

	Bear
Discounted cash flow	4.93
Relative multiples	6.68
Normalised earnings power	6.51
Book value and sustainable return	4.74
CENTRAL — the cash-flow lens	**4.93**
Market price at the valuation date	9.10
Central against price	**8.9%**
Shares in issue, millions	1,291.5
Market capitalisation at the valuation date	11,753
WHERE THE VALUE SITS	
Present value of the explicit five years	4,962
Present value of the terminal block	5,912
Terminal share of enterprise value	54.4%
Net cash added in the bridge	3,002

The bear and bull columns of each lens are the blue cells here and the only pasted figures on the sheet: ea
formula across them, because the defect being closed was a sheet that labelled a row weighted and then t

anged on Assumptions moves this page too.

Base	Bull	Weight
9.91	16.73	45.0%
8.32	9.96	20.0%
8.39	10.26	20.0%
6.23	7.12	15.0%
9.91	**16.73**	

ch is a complete re-run of the model at that scenario, computed in compute.py and reprodu
ook the minimum and maximum across four lenses.

ıced in formulas on the Sensitivity sheet. The weighted row is a live

Four lenses, one bridge, one valuation date

Lens 2 is on the TRAILING metric so it borrows no discount factor from lens 1. Lens 3 cash added at face outside the multiple. Lens 4 uses the same cost-of-equity glide lens

Base-year EBITDA	2,951
Enterprise value at spot	8,751
The company's OWN trailing EV/EBITDA	2.97x
Justified multiple = trailing x (1 + re-rating)	**2.97x**
LENS 1 — discounted cash flow	**9.91**
LENS 2 — relative multiples, on the trailing metric	10,744
LENS 3 — normalised earnings power, DISCOUNTED	3,043
LENS 4 — book value and sustainable return	4.70
CENTRAL — the cash-flow lens	**9.91**
against spot	8.9%
the retired 45/20/20/15 blend, published beside the answer an	8.74

ONE CLASS PRIMARY IS THE CENTRAL. The cash-flow lens is the answer; the relative, normali above is kept visible and unused: three of the four lenses value a refiner on reported earnings an labelled a row "weighted central" and then took the minimum and maximum across all four lense two and a half times too wide.

is forward-dated and is therefore DISCOUNTED to the valuation date at the cost
1 uses. All formulas.

8.32		
1.679	**8.39**	
22.85%	1.32x	**6.23**

sed-earnings and book rows are cross-checks and the range across them is an ENVELOPE,
d historical-cost book, and averaging them into the answer imports every weakness of the
s, both of which came from the cash-flow lens alone, so the word "weighted" applied to the

of equity, with net

not a spread around a weighted estimate. The blend on the row
weakest at a weight nobody tested out of sample. An earlier edition
e centre and not to the ends and the published spread was about

Assumptions — every driver, with the filing it was read fro

Blue cells are the ONLY pasted values in this workbook. Every one is a figure read off a
model re-run; those re-runs are now written out as live formula blocks on the Sensitivi

Base year — twelve contiguous months to 30 June 202

The gross profit of the reported half is NOT taken as released. It is solved from t
profit it would have implied. Every cell below is a formula.

Administrative + selling + other, 3M to 31-Mar-2026
Scaled to the half (x2)
Other revenue, half
Provisions and expected credit losses, half
Finance cost, half
Effective tax rate, nine months (for the solve only)

GROSS PROFIT, 6M to 30-Jun-2026 — AS FILED
Gross profit as the press release stated it
Profit after tax, 6M to 30-Jun-2026 — AS FILED
against the profit the press release reported
Release against filing, gross profit

BASE-YEAR REVENUE — twelve months to 30-Jun-2026
BASE-YEAR GROSS PROFIT
BASE-YEAR COST OF SALES
BASE-YEAR GROSS MARGIN

Alternative base: nine audited months x 4/3
its gross margin

Operating lines, SAME twelve months
Administrative expense
Selling expense
Other operating expense
Provisions and credit losses
Depreciation
Cash capital expenditure
Credit interest
Employees' profit share

Every operating line is struck on the SAME twelve months as revenue and gross profit. Th
7.081% corresponded to no filed period at all. One period, both sides, or the margin is an a

RATES — solved, not assumed
Employees' profit share, % of profit after tax
Minority interest, % of OPERATING profit, whole base year
Implied asset life, years = fixed assets at cost / depreciation
Maintenance capital expenditure at cost over that life

Inventory days of cost of sales
Receivable days of revenue
Operating payable days of cost of sales — dividends payable REMOVED
