TABLE OF Content

Juhayna At A Glance

Juhayna At A Glance

Since its founding in 1983, Juhayna Food Industries has grown from a family vision into one of Egypt's most trusted and influential food and beverage companies. The journey began with a simple belief that every household deserves access to safe, healthy, and high-quality products. Over the years, that belief has shaped Juhayna's identity as a pioneer that continues to raise the standards of the dairy, yogurt, juice, and plant-based categories in the Egyptian market.

From the introduction of packaged milk and yogurt to the development of innovative products that cater to evolving lifestyles, Juhayna has consistently demonstrated leadership rooted in curiosity, responsibility, and a deep understanding of consumer needs. Our unique farm-to-consumer and vertical integration model provides full control over the quality and integrity of the entire production cycle, ensuring reliability and consistency even through periods of economic and operational volatility.

In 2025, Juhayna continued to evolve through purposeful investment in technology, sustainability, and agricultural development. The year has already seen significant enhancements to the Enmaa agricultural arm, including advanced upgrades to its rotating milking parlor and the adoption of new systems that support animal welfare, milk quality, and operational efficiency. Juhayna has also reaffirmed its environmental commitments through a major investment in wastewater treatment infrastructure, reflecting a long-term strategy to reduce environmental impact and strengthen resource management across its facilities.

Internationally, Juhayna is expanding its presence and reputation. Participation in global exhibitions and strategic engagement with regional partners are strengthening the company's footprint across the Middle East, Africa, and Europe. With growing demand for high-quality Egyptian products, Juhayna is positioning itself as a competitive player in international markets while remaining deeply connected to its local heritage.

Throughout this journey, Juhayna's purpose has remained constant. The company seeks to nourish communities, support the well-being of its people, and create value that lasts. As Juhayna moves forward, it continues to build on a legacy that began more than 40 years ago with a promise to bring quality to life for every home it serves.

Juhayna by the numbers:

250+
SKUs
Diverse product portfolio across dairy, juice, and fermented categories.

10,000
Feddans of Farmland
Dedicated to sustainable agriculture and livestock.

8,000+
Livestock
Managed with advanced welfare and quality control systems.

4700+
Employees
A dedicated workforce driving innovation and excellence.

4
Manufacturing Facilities
State-of-the-art plants ensuring product quality and efficiency.

40+
Distribution Centers
Extensive network ensuring nationwide reach and timely delivery.

1000+
Vehicles
Modern fleet for efficient logistics and market penetration.

262k
Retail Outlets
Broad market presence across Egypt and beyond.

Timeline and Milestones

1983
Juhayna Food Industries is founded as an Egyptian family-owned company with the vision of providing affordable, accessible, safe, and delicious packaged food and beverage products to communities everywhere.

1987
The Company launches production of Egypt's first packaged milk, yogurt, and juice products.

1991
Juhayna signs an agreement with McDonald's, becoming the global franchise's first and sole provider for its locally sourced material. The partnership continues to operate successfully to this day. The Company signs additional agreements to become the exclusive dairy supplier for multiple airlines, hotels, and fast-food brands operating in Egypt.

1998
Juhayna establishes Al Marwa plant for the production of juice concentrates and pulps.

2000-2001
The Company diversifies its product range with the launch of Zabado drinkable yogurt, which quickly became a market best-seller; PURE 100% natural juice line; and entry into the cooking and whipping cream market

2003
Juhayna launches Bekhero milk, a high quality and affordable product, thus opening the packaged milk market to low-income consumers.

2005
Juhayna acquires Al Masreya plant to expand its milk production capacity.

2007
Juhayna launches Tiba for Trade and Distribution, expanding its distribution capabilities throughout Egypt

2008
Juhayna revamps and expands Al Marwa plant.

2009
The Company inaugurates Al Dawleya plant.

2010
Juhayna goes public and is listed on the Egyptian Exchange (EGX).

2012
Juhayna's 0% fat milk launches as the first-of-its kind in the Egyptian market.

2013
Juhayna signs a cooperation protocol with the European Bank for Reconstruction and Development (EBRD) to initiate a local farm support program to benefit Egyptian agriculture. The Company inaugurates Egyfood Assiut, the first manufacturing facility of its kind in Upper Egypt

2014
Juhayna launches Egyfood 6th of October City, a 35,000 m² facility, to expand the company's yogurt production.

2015
Juhayna partners with Arla Foods for third-party distribution, further expanding its reach in the Egyptian market.

2016
Juhayna launches its state-of-the-art innovation center for research and evaluation labs. Juhayna establishes partnership with Fawry to enhance creditworthiness and facilitate digital payments for traders. The Company signs a cooperation protocol with the German Agency for International Cooperation (GIZ) to launch a long-term development program for workplace female empowerment.

2017
Juhayna joins the United Nations Global Compact (UNGC)

2018
Juhayna continues to deliver innovative, new-to-market products, launching 100% natural lactose-free milk. Juhayna publishes its first Sustainability Report.

2019
Juhayna updates its identity with a new logo and packaging for milk and yogurt.

Timeline and Milestones

2020

Juhayna launches its Greek Yogurt range, as the first local producer of traditional method Greek yogurt.
The Company rebrands and updates packaging for core segment products.
Juhayna covers 15.6% of Al-Enmaa's electricity needs through solar energy generated by its 1 MW solar energy station.
The Company expands Al Masreya with two new production lines, adds an additional line at Al Marwa, and upgrades a packaging line at Egyfood.
Juhayna publishes its first carbon footprint report covering 2019 operations.

2021

Juhayna launches its dairy-free Nuts & Grains plant-based milk line.
Juhayna launches its line of flavored spoon-able Greek yogurt

2022

The Company launches N&G almond Barista plant-based milk with foaming capabilities. Juhayna signs an agreement with Karm Solar to expand the solar infrastructure at El Enmaa Farm with a central station, diesel generator, and battery storage system capable of generating 65% of the farm's energy needs through solar power

2023

Juhayna launches its innovative, all-natural fruit yogurt.

2024

Juhayna launches its innovative one-of-a-kind stirred yogurt and pudding products and 30% less sugar flavored milk.
Juhayna introduces new flavors in its product lines through, new Greek yogurt flavors, Pina Colada and Mon Cherie juice flavors.
Juhayna continues its expansion into global markets, successfully entering new countries and increasing its footprint across five continents.

2025

Juhayna launches premium pudding and Turkish labneh. Juhayna expands the Al-Marwa facility and adds new production lines

Seif Eldin Thabet
Chief Executive Officer

CEO's note

Dear Shareholders,

It is my pleasure to address you in Juhayna's 2025 Annual Report, a year that marked a period of consolidation, momentum, and confident progress. Building on the exceptional resilience and performance demonstrated in prior years, 2025 represented a turning point—one defined by a more stable economic environment, strengthened organizational capabilities, and meaningful strides toward our regional and global ambitions.

The gradual improvement in economic conditions allowed Juhayna to shift from a posture of mitigation to one of acceleration. With enhanced foreign currency availability and improving market visibility, we were able to plan with greater certainty, optimize operations, and unlock new growth opportunities. Against this backdrop, the local Egyptian market delivered an exceptional performance, reaffirming the strength of our brands, route-to-market excellence, and deep connection with consumers. In parallel, our finished products exports achieved outstanding results, reflecting growing international demand for Juhayna's high-quality offerings and the increasing competitiveness of our finished product exports.

This improved operating environment, combined with the discipline instilled by our long-term strategy, enabled us to further reinforce our leadership position in the Egyptian market while expanding our footprint beyond it. Our regional operations continued to demonstrate resilience and adaptability, most notably in Libya, where our reach has continued to grow and gain momentum. This success underscores the robustness of our operating model and our ability to navigate complex economic dynamics while sustaining growth.

At the heart of this progress are our people. Juhayna's leadership team and workforce continued to demonstrate exceptional commitment, agility, and executional excellence. The strong organizational foundation we have built over recent years proved instrumental in translating strategy into tangible results, ensuring operational continuity, and sustaining a culture of performance and innovation across all functions.

Our capital expenditure strategy is anchored in a clear belief in the strength of our vertically integrated model and its role in creating sustainable value. During the year, we invested across the entire platform—from our farms to our manufacturing and route-to-market capabilities—to build capacity, efficiency, and resilience for the future. This included planting 1,500 feddans of citrus to expand our agricultural footprint, upgrading our dairy parlors to ensure smoother cow flow and higher operational performance, and increasing the number of refrigerated display units in the market to strengthen product availability and brand presence at the point of sale. These investments reflect our long-term commitment to owning and continuously strengthening every link in the value chain, a commitment we will continue to pursue as we invest for growth, quality, and leadership in the years ahead.

A major milestone in 2025 was the advancement of our regional expansion strategy, most notably through our strategic partnership with Al Rashed Food for distribution in the Kingdom of Saudi Arabia. This partnership represents a significant step in strengthening Juhayna's presence in one of the region's most important markets. Leveraging Al Rashed Food's deep market expertise, robust distribution capabilities, and strong regional relationships, we are well positioned to accelerate our growth in Saudi Arabia, enhance brand visibility, and deliver our high-quality products to a broader consumer base.

Operationally, we continued to invest in efficiency, innovation, and capacity building across the organization. Our commitment to product development remained strong, with targeted enhancements to our portfolio that reflect evolving consumer preferences for quality, health, and convenience. A standout achievement during the year was the successful expansion of our spreadable category with the launch of Turkish labneh, which captured over 37% market share within just three months of launch. This exceptional performance underscores Juhayna's profound consumer insight, speed to market, and executional excellence and was complemented by continued portfolio optimization that supported sustainable growth while maintaining a balanced approach to pricing and promotions in an increasingly competitive environment.

The launch of our premium pudding also marks a significant milestone for the business. In a short period of time, the product has captured a substantial share of the category, reflecting strong consumer resonance and flawless execution across teams. This performance underscores the strength of our innovation pipeline and our ability to compete effectively and capture value in premium segments.

Looking ahead, Juhayna enters the next phase of its journey with confidence. Our priorities will continue to center on regional expansion, operational scalability, and sustained innovation across product lines. Digital transformation will remain a key enabler, particularly in marketing, distribution, and consumer engagement, allowing us to stay closer to our consumers and more responsive to their needs across both local and international markets.

As we continue this journey, I would like to extend my sincere appreciation to the entire Juhayna team. Your dedication, professionalism, and belief in our vision continue to drive the company forward. I am deeply proud of what we have achieved together and optimistic about the opportunities that lie ahead as we continue to build Juhayna into a leading regional and global food and beverage company.

Sincerely,

Seif Eldin Thabet
Chief Executive Officer
Juhayna Food Industries

2025 in Review

OVERVIEW

Building on decades of industry leadership, Juhayna delivered a year of accelerated performance in 2025, reinforcing its position as Egypt's leading food and beverage manufacturer. Benefiting from improved macroeconomic conditions such as easing inflation, stable foreign exchange rates, and stronger consumer purchasing power Juhayna leveraged a more favorable market environment to drive growth across its core categories.

In 2025, Juhayna continued to lead the packaged milk market, holding a 62% share in plain milk, highlighting the strength of the company's multi-brand portfolio.

The flavored milk segment further strengthened its position, reaching a 57% market share. Notably, Lactose Free milk continued to gain traction, commanding 74% of its category, underscoring Juhayna's leadership in health focused dairy innovation.

Within the fermented segment, spoonable yogurt achieved a 31% market share, while drinkable yogurt reached 45%. Greek yogurt continued its strong momentum, while the successful launch of Turkish Labneh marked a strategic entry into the soft cheese category, achieving a 37% market share since launch. Mix pudding also strengthened its footprint with a 32% market share, reflecting effective portfolio expansion.

In the juice category, Juhayna's portfolio collectively achieved a 32% market share, supported by continuous product innovation, brand strength, and disciplined commercial execution.

In 2025, Juhayna's expanded and diversified portfolio delivered strong results, driven by a robust innovation pipeline, strategic operational growth, and disciplined execution. Holding leadership positions across multiple high-growth categories, the company continues to reinforce its competitive edge and long-term growth trajectory.

MARKET SHARE NUMBERS

DRIVING INNOVATION

Product Innovation

In 2025, Juhayna continued to expand and diversify its portfolio through targeted product innovation across dairy, fermented beverages, and desserts, strengthening its presence in both retail and food service channels.
The year began with the launch of Turkish Labneh in 250 gram and 500 gram pack sizes, marking Juhayna's strategic entry into the soft cheese category and establishing a strong position within this segment. In fermented beverages, the Company introduced Rayeb Qamar El-Din and Rayeb Sobia Mango in 220 milliliter and 440 milliliter sizes, combining traditional flavors with modern packaging convenience.

Mid-year, Juhayna expanded its premium dessert offering with the launch of Premium Pudding in Caramel Toffee, Double Chocolate, and Coffee Frappé flavors. The portfolio was further diversified through the introduction of Soft Serve in five kilogram formats, available in Chocolate, Piña Colada, Salted Caramel, Coffee, and Pistachio flavors, followed by the launch of Mistica Soft Serve. These additions strengthened Juhayna's footprint in food service and institutional channels

Research, Development and Innovation Achievements

Beyond new product launches, 2025 was marked by significant RDI advancements across existing product lines. The Company successfully secured regulatory validation for formula optimizations in both Dairy and Juice categories, ensuring a seamless transition to more cost effective recipes without compromising product quality, safety, or compliance standard.

Shelf-life extension initiatives were validated in accordance with Egyptian regulations, enhancing safety and stability across key volume drivers. These improvements reduced trade returns, strengthened inventory management, and increased supply chain flexibility. Notably, the shelf life of spoonable yogurt was extended to 30 days, improving nationwide distribution efficiency.
From a wellness perspective, Juhayna validated high value nutritional claims such as High Protein, Lactose Free, and Less Sugar to reinforce premium positioning. All new health focused SKUs were aligned with Egyptian and Codex guidelines to ensure robust and compliant market entry.

Enhancing Automation and Manufacturing Efficiency

In parallel with product innovation, Juhayna advanced its manufacturing capabilities across multiple facilities to enhance automaton, traceability, and operational efficiency.
At EgyFood, a dedicated Labneh processing line was introduced, supported by SCADA upgrades and enhanced utilities control systems. Automation improvements included camera systems for production monitoring and integration of track scale operations with SAP systems to improve accuracy, traceability and real-time reporting.
At Al Masreya and Al Dawleya, system upgrades improved operational performance and resource efficiency, while enhancements at Al Marwa expanded citrus and tropical processing capabilities through line upgrades and additional extractors.

Digital Transformation

Digitalization remained central to operational excellence in 2025. The Company enhanced ERP integration across functions, improving financial visibility and production planning. Integration between track scale systems and SAP strengthened real time data accuracy and operational control.

Within distribution, Tiba implemented advanced GPS tracking systems to enable end-to-end operational visibility. The fully digitized workflow allows for detailed monitoring of fleet performance, including kilometers driven and proactive maintenance scheduling. These digital capabilities enhance operational efficiency and support ESG monitoring objectives related to fuel consumption and emissions.

Sustainability Innovation

Juhayna's commitment to innovation in sustainability in 2025 was seen in product and packaging development. During 2025, the polyethylene cap weights for Zabado and Rayeb were reduced by 23 percent, contributing to reduced environmental impact.
Operational efficiency initiatives across manufacturing sites also supported reductions in utility consumption, reinforcing Juhayna's commitment to responsible growth and resource stewardship.

SUPPLY CHAIN

In 2025, Juhayna's supply chain operations continued to demonstrate operational discipline and enhanced resilience, supporting the Company's growth trajectory in a more stable economic environment.

Although macroeconomic conditions improved compared to 2024, geopolitical tensions in the region, including developments affecting trade routes from the East, posed potential risks to shipment flows. Through proactive safety stock planning and optimized coverage calculations, the Company successfully absorbed shipment delays without any material impact on production or market availability.

Toward the end of the year, the introduction of the Advanced Cargo Information system for air shipments led to temporary delays and processing backlogs. These disruptions were managed through careful inventory planning and close coordination between procurement and logistics teams, ensuring that production and product availability were not affected.

Juhayna continued to embed resilience within its sourcing strategy. The company advanced localization efforts, expanded dual sourcing arrangements, and diversified supplier bases by engaging multiple production sites per supplier. As a result, sole supplier exposure in packaging materials decreased by 33% compared to 2024. In the concentrates category, the Company also expanded supplier diversification efforts.

Juhayna 2025

Export Performance

Finished product exports increased in 2025, supported by continued demand across dairy, juice, and chilled categories. In contrast, concentrates exports declined compared to the exceptional levels recorded in 2024, primarily due to lower global orange concentrate prices following the normalization of international supply conditions.

During the year, Juhayna expanded its geographic footprint by adding Saudi Arabia as a new export markets, reinforcing its regional presence and strengthening cross border distribution channels.

Distribution Optimization

Operational efficiency within distribution also improved in 2025. Approximately 85% of distribution routes were reviewed and optimized, enhancing delivery efficiency, reducing travel time, and improving fuel utilization. These improvements supported better service levels while contributing to broader cost and sustainability objectives.

Through disciplined sourcing strategies, structured inventory management, export expansion, and continuous route optimization, Juhayna's supply chain function reinforced its role as a key enabler of operational stability and long-term growth.

Management Discussion and Analysis

Revenue Performance

Juhayna delivered solid financial performance in 2025, reflecting continued operational discipline and strengthened market dynamics. Net Revenue reached 29,984mn, representing a 23% year on year increase.

This growth was supported by improved consumer purchasing power, stable foreign exchange conditions, and the successful expansion of key product categories.
The Company's diversified portfolio continued to drive balanced growth across segments, supported by strategic pricing, innovation, and expanded production capacity. Juhayna's focus on product enhancement, cost optimization, and disciplined execution allowed it to sustain growth momentum while maintaining competitive positioning across core categories.

Segment Highlights

The Dairy segment generated EGP 15,310mn in revenue during the period, maintaining its position as the largest contributor to total revenue. Performance was supported by strong brand equity, growth in Lactose Free milk, and continued strength across both Juhayna and Bekhero milk portfolios.

The Fermented segment recorded EGP 6,929mn in revenue, driven by category expansion and strong performance in Greek yogurt and the successful launch of the Turkish Labneh, which marked a strategic entry into the soft cheese segment.
The Juice segment generated EGP 6,254mn in revenue, supported by steady domestic demand and continued portfolio diversification.
The Concentrates and Agriculture segment recorded EGP 1,401mn in revenue. While export volumes remained broadly stable overall, the segment demonstrated resilience despite a decline in global orange concentrate prices. This impact was partially offset by increased finished goods exports in that direction, alongside continued strategic sourcing and supplier diversification efforts that strengthened operational stability across the segment.

Third-party distribution contributed EGP 90mn, reflecting continued utilization of Tiba's nationwide distribution infrastructure.

Profitability and Margins

Gross profit for the year reached 7,582mn, with a gross profit margin of 25.3%. While margins moderated compared to the exceptional expansion seen in 2024, profitability remained healthy and supported by improved cost control, formula optimization initiatives, and operational efficiencies.
EBITDA reached EGP 4,634mn, representing a 15.5% margin. The Company continued to benefit from disciplined SG&A management, automation improvements, and supply chain optimization initiatives.

Net profit reached EGP 2,253mn, with a net profit margin of 7.5%, reflecting stable financial performance amid ongoing investments in growth and infrastructure.
Net debt stood at EGP 5,960mn during the period, reflecting continued capital investments and structured financing aligned with long term expansion plans.

Risk Management and Compliance

In 2025, Juhayna proactively monitored and adapted to evolving food safety laws and labeling regulations at both local and regional levels. By strengthening regulatory oversight, updating compliance frameworks, and ensuring alignment with Egyptian and Codex standards, the Company mitigated compliance risks and safeguarded brand reputation.

Supply chain resilience remained a priority, with diversification of suppliers, localization strategies, and structured inventory management reducing operational exposure to external disruptions.

Outlook

As economic conditions stabilize and consumer confidence strengthens, Juhayna remains focused on disciplined growth across its core segments. Strategic priorities include continued product innovation, operational efficiency improvements, premium portfolio expansion, and regional market development.

With a balanced financial structure, diversified revenue base, and strengthened supply chain resilience, Juhayna is well positioned to sustain growth momentumin the coming years.

OUR STRATEGY

OVERVIEW

Juhayna entered 2025 with strengthened momentum and a more stable operating environment. While global markets continued to experience selective volatility, macroeconomic conditions in Egypt improved, with stronger foreign exchange availability, moderating inflation, and enhanced consumer purchasing power compared to the previous year.

This shift marked a strategic inflection point for the company. Having demonstrated resilience in 2024, Juhayna transitioned in 2025 from defensive adaptation to proactive growth acceleration. The company remained committed to enhancing innovation, expanding its geographic reach, and reinforcing long-term durability. The agility of its workforce and the flexibility embedded within its strategy enabled Juhayna to scale operations with greater confidence and execution speed.

At the beginning of 2025, Juhayna implemented a significant structural milestone by merging its four production plants under one unified corporate structure. This integration represented a pivotal step in the company's evolution, strengthening governance, accelerating decision-making cycles, and creating a scalable, centralized operating platform. By consolidating management and reporting frameworks, Juhayna enhanced transparency, optimized capacity utilization, and improved cost discipline across facilities. The merger also strengthened cross-functional coordination and reinforced the company's ability to respond swiftly to demand fluctuations, embedding efficiency and structural resilience into its long-term model.

The core of Juhayna's strategy continued to rest on three foundational pillars: expansion, durability, and innovation. In 2025, these pillars evolved from stabilization and protection toward value creation, margin enhancement, and geographic scaling. Export growth remained a strategic priority, while domestic operations benefited from improved economic visibility and renewed consumer confidence.

Within Egypt, Juhayna maintained its leadership position, supported by robust operational systems, strong supplier partnerships, and advanced forecasting capabilities. Product innovation remained central to sustaining competitive advantage. The Research, Development, and Innovation team continued to monitor consumer trends, evolving nutritional preferences, and technological advancements. Juhayna's commitment to nutrition, clean labels, and premium sourcing remained key differentiators against both local and international competitors. The product development pipeline expanded with disciplined launch timing, ensuring alignment between market readiness, supply chain optimization, and margin objectives.

NEW PRODUCTS

In 2025, Juhayna strengthened its innovation trajectory by expanding its fermented and dessert portfolios in response to consumer demand for authenticity, premiumization, and healthier alternatives.
A standout launch during the year was Turkish Labneh, marking Juhayna's strategic entry into the soft cheese category. The product quickly established itself as a category leader, capturing significant market share and reinforcing Juhayna's ability to expand beyond traditional yogurt into adjacent high-growth segments.

Building on the prior year's pudding launch, Juhayna introduced a Premium Pudding range in 2025, featuring enhanced creaminess, richer flavor profiles, and elevated packaging design. This move strengthened the company's presence in value-added dairy desserts and supported premium margin expansion.

The company continued to support its Greek yogurt portfolio through innovation and marketing investment, reinforcing its position in the high-protein and functional fermented segment. Across all categories, innovation remained guided by three principles: health-conscious formulation, cost efficiency, and strong market relevance. This disciplined approach ensured that growth was both volume-driven and value-accretive.

PERFORMANCE OPTIMIZATION

The Egyptian food and beverage sector experienced improved operating stability in 2025, supported by stronger foreign exchange liquidity and eased import constraints. This improved backdrop allowed Juhayna to pivot from crisis mitigation toward structural productivity enhancement.

The plant consolidation early in the year amplified efficiencies by eliminating duplication, harmonizing procurement systems, and standardizing quality control protocols. These measures enhanced cross-plant synergies, reduced overhead complexity, and improved execution consistency.

The company continued to leverage its vertically integrated model to maintain control over quality, cost, and supply continuity.

Key operational highlights in 2025 included:
• **Sourcing Optimization:** Juhayna maintained procurement of 15 to 20 percent of its raw milk from its own farms, ensuring quality control and cost stability. Local fruit sourcing for Al Marwa operations continued to expand, strengthening domestic supplier relationships.
• **Internal Production Utilization:** Concentrates and pulps produced at Al Marwa continued to support juice manufacturing, maximizing internal resource utilization and reinforcing margin resilience.
• **Flexible Production Systems:** Seasonal and demand-responsive production planning improved inventory rotation and reduced waste.
• **Logistics and Distribution Efficiency:** Continued internal management of warehousing and distribution enhanced cost discipline and service levels.

Collectively, these initiatives improved operational predictability, strengthened cost control mechanisms, and enhanced structural profitability across the value chain.

Footprint Expansion

In 2025, Juhayna continued to scale its international presence, building on prior export momentum. Export operations transitioned from a defensive foreign currency hedge to a structurally embedded growth engine within the company's portfolio.

The company deepened its presence in existing markets while selectively entering new territories. Operations in Libya continued to serve as a regional anchor supporting broader geographic expansion. Export-generated foreign currency remained an important contributor to financial flexibility, though macroeconomic pressure eased relative to 2024.

Al Marwa's concentrate production remained a strategic enabler of global expansion. Egypt's agricultural competitiveness and strengthened international trade relationships positioned Juhayna to capture sustainable export opportunities across multiple regions.

Domestically, the El Commanda distribution program continued expanding into underserved areas. The company sustained its focus on increasing female participation in the program, reinforcing its commitment to inclusive growth and community empowerment.

Third Party Distribution

Through its trade and distribution subsidiary, Tiba, Juhayna continued its strategic partnership with Arla Foods and remained the sole distributor for several international food and beverage brands in Egypt.

With fewer import restrictions and improved logistics conditions compared to 2024, third-party distribution activities operated with greater stability. This segment strengthened asset utilization across the distribution network, generated incremental margin contribution, and enhanced overall infrastructure leverage.

Juhayna remains committed to selectively expanding its third-party distribution portfolio, leveraging its nationwide scale and operational expertise to unlock additional value streams. Tiba's robust infrastructure and integrated systems position the company to onboard complementary brands efficiently and at scale.

Overall, 2025 marked an inflection point in Juhayna's strategic cycle—transitioning from resilience-led stabilization to structured growth acceleration—while remaining firmly anchored to its long-term pillars of expansion, durability, and innovation.

Export and Regional Markets

Export And Regional Markets

2025 was defined by a transition toward market normalization, following the historical peak in export performance during 2024, which was driven by a tactical response to global raw material shortages. As global prices for orange concentrates returned to normalized levels throughout the year, our export figures reflect this stabilization, showing a more tempered growth rate when compared to the exceptional, non-recurring highs that preceded it.

However, it is essential to view 2025 through a broader strategic lens. When measured against the 2023 baseline, the results achieved this year demonstrate a clear and sustainable expansion trajectory. By recognizing the previous surge as a successful but temporary response to a market anomaly, we have focused our efforts in 2025 on high-value-added manufacturing and deepening our footprint in core regional markets, most notably through our strategic entry into the Saudi Arabian market. This ensures that our export segment remains a resilient financial pillar and a reliable hedge against any future economic pressures, while maintaining our long-term growth momentum.

STRATEGIC FOCUS AND MARKET EXPANSION

Juhayna's export strategy for 2025 continues to build on a solid foundation of three primary pillars: sustainable growth, global diversification, and operational excellence. These elements have supported the company's ongoing efforts to expand its international footprint while maintaining the high-quality standards associated with the Juhayna brand.
During the year, Juhayna maintained its focus on strengthening its presence across the MENA region and Africa through an asset-light expansion model centered on strategic partnerships and efficient distribution networks. This approach has enabled the Company to enter and develop markets with greater agility, while optimizing costs and managing risk exposure.

In Libya, while the market remains strategically important due to its proximity to Egypt and logistical advantages, performance in 2025 was influenced by disruptions related to political instability, with performance improving toward the end of the year. Despite this, Juhayna continues to maintain a solid presence in the market, building on its early success in introducing chilled, short shelf-life products and leveraging its established distribution partnership to support long-term growth.

In the Gulf region, Juhayna initiated a new strategic partnership with Al Rashed in Saudi Arabia, marking an important step in expanding its footprint in this key market. While still in the early stages, the collaboration is progressing steadily, with a measured ramp-up that reflects a disciplined and long-term approach to market development.
Overall, Juhayna remains well-positioned to capitalize on opportunities across its export markets, supported by a flexible operating model, strong partnerships, and a continued focus on sustainable, long-term growth.

NAVIGATING CHALLENGES AND ENSURING GROWTH

While the global supply chain environment continues to present challenges, Juhayna has demonstrated resilience through a more agile and responsive operating model. Ongoing geopolitical developments and supply chain disruptions have continued to impact global trade flows; however, Juhayna's diversified sourcing strategy and strong supplier relationships have helped mitigate these pressures and ensure continuity across key markets.

To further strengthen supply chain resilience, Juhayna has expanded its supplier base and enhanced sourcing flexibility, reducing dependency on specific regions while maintaining consistent product quality. These efforts have been complemented by continued optimization of distribution strategies to improve efficiency and responsiveness across export markets.

Juhayna's participation in leading international trade exhibitions, including SIAL Paris, Gulfood, Anuga in Germany and Food Africa, has remained a key pillar in reinforcing brand visibility and supporting business development efforts. These platforms have enabled Juhayna to engage with new partners, explore market opportunities, and strengthen its presence across priority regions.
Building on these efforts, Juhayna has successfully secured new business opportunities with major international retail players, further expanding its global reach and reinforcing its position across export markets.

2025

Juhayna

Future Outlook: Expansion and Sustainability

Looking ahead, Juhayna's export strategy remains focused on disciplined expansion and sustainable growth. Juhayna continues to prioritize opportunities across Sub-Saharan Africa and selected markets within the MENA region, where favorable demand dynamics and scalable entry models support long-term development.

Despite ongoing political instability in parts of the region, Juhayna continues to identify compelling opportunities in markets across Africa, and within the GCC, which is increasingly becoming a key area of strategic focus. To support this expansion while maintaining operational discipline, Juhayna is implementing a structured, phased market-entry approach—prioritizing high-potential markets while carefully managing geopolitical and financial risks.

Juhayna's future growth is closely tied to its strong agricultural base. By adopting sustainable farming practices and improving raw material efficiency, the company can enhance production quality while minimizing environmental impact. These initiatives support both scalable expansion and long-term sustainability, positioning Juhayna to meet growing consumer demand with reliable, high-quality products.

Juhayna is also placing greater emphasis on expanding exports of finished products, particularly across its dairy, juice, and yogurt segments. This shift is intended to strengthen brand presence, enhance value realization, and better align with evolving consumer preferences across international markets.

At the same time, Juhayna continues to leverage its partnership-led expansion model, working closely with local distributors to accelerate market penetration while maintaining a capital-efficient operating structure. This approach enables Juhayna to scale effectively while preserving flexibility across diverse markets.

By building on its strengths in operational excellence, competitive pricing, and strategic partnerships, Juhayna is well-positioned to maintain a resilient growth trajectory. With a continued focus on customer satisfaction, sustainability, and targeted global expansion, Juhayna remains committed to strengthening its position across its export markets.

MANUFACTURING

AL MASREYA

Acquired by Juhayna in 2005, Al Masreya is the company's primary dairy production facility and specializes in producing plain and flavored milk. In 2025, the site continued to operate 19 production lines supported by 375 employees and delivered strong operational performance driven by targeted efficiency and process upgrades.

During the year, Bekhero's one-liter filling capacity increased by 33% year on year following the installation and operation of a new TFA one-liter line. The facility also upgraded its cooling system through the installation of a new evaporator, enhancing operational stability. Manufacturing efficiency initiatives contributed to a 7% reduction in total manufacturing expenses, generating cost savings of EGP 31 mn.

Operational excellence initiatives delivered an overall equipment effectiveness of 73% . A CIP optimization project increased line availability by 3% and reduced chemical consumption by 15%. Utility optimization initiatives reduced electricity, gas, and water consumption per ton. Al Masreya remains the only facility in Egypt using TBA Edge packaging technology, reinforcing its leadership in the dairy sector. Continued improvements across Juhayna's integrated dairy value chain supported consistent sourcing and reliable production throughout the year.

AL DAWLEYA

Established in 2009, Al Dawleya is one of the largest fully automated juice and beverage production complexes in Egypt and the MENA region. In 2025, the facility achieved a 22% increase in overall production capacity compared to 2024, supported by an 8% expansion in pasteurization capacity. Single-serve beverage capacity increased by 26% year on year following the return of a previously idle line to operation.

Automation upgrades included new line connections, software updates, and enhancements to ammonia compressor control systems. These improvements contributed to a 1% improvement in material usage variance, a 70% reduction in defects per million units, and a 20% reduction in planned CIP and changeover times. Energy efficiency initiatives linked to wastewater treatment improvements resulted in measurable reductions in electricity and gas consumption per ton.

EgyFood

Located in 6 October City, the 35,000 m2 EgyFood facility produces Juhayna's spoonable and drinkable yogurt products, along with its expanding line of plant-based milk. In 2025, the facility continued to operate 14 production lines supported by 265 employees and delivered strong year on year growth.

Total production capabilities increased by 25% compared to 2024, with a main focus on greek yogurt expansion. A new Labneh processing line enabled the launch of multiple new SKUs, including Labneh in two formats, premium puddings, seasonal fermented beverages, and SoftServe across five flavors.

Automation and process improvements included the installation of camera systems, a new SCADA system for utilities control, GPS tracking for finished product movement, and the integration of track scale operations with SAP. These enhancements improved traceability, accuracy, and overall operational efficiency.

Al Marwa

Established in 1998, Al Marwa processes citrus and tropical fruits into concentrates and pulps for domestic and export markets. In 2025, the facility implemented major operational upgrades to increase production capabilities.

Citrus processing capacity increased by 145% per day through the addition of new extractors. Tropical processing capacity increased significantly for both tomato and other tropical fruits. Receiving areas were upgraded to support higher intake volumes, strengthening operational flexibility. Investments in electrical and boiler infrastructure further enhanced reliability and supported sustained export operations.

Al Marwa continues to operate advanced processing technologies and rigorous quality systems, including Hazard Analysis and Critical Control Point protocols, and remains central to Juhayna's global export footprint.

2025 PERFORMANCE AND RESILIENCE

In 2025, Juhayna began to see easing macroeconomic pressures following the challenges experienced in 2024, including moderating inflation and reduced cost volatility. While the aftereffects continued to influence supply chains, input costs, and consumer behavior, the improved operating environment supported greater stability. Building on the disciplined execution, targeted investments, and operational focus demonstrated during the prior year, the Company maintained its market leadership. Juhayna's diversified portfolio and integrated operating model enabled it to navigate remaining external uncertainties while sustaining efficiency and supporting continued growth across its core categories.

A key contributor to Juhayna's 2025 performance was the continued investment in upgrading and optimizing its manufacturing facilities. At Al Masreya, production volumes increased by 21% year on year, supported by the installation of a new Bekhero one-liter filling line that increased Bekhero capacity by 33%. The facility also achieved higher productivity and improved cost efficiency through operational enhancements and utility optimization initiatives.

At Al Dawleya, overall production capacity increased by 22% compared to 2024, alongside a 26% increase in single-serve beverage capacity. Automation upgrades and process improvements enhanced operational performance, reduced defects, and improved production efficiency across the facility.

At Al Marwa, major upgrades to citrus and tropical fruit processing lines increased production flexibility and expanded concentrate output capacity. These enhancements strengthened Juhayna's ability to support international demand and reinforced the Company's export readiness.

EgyFood also delivered strong performance during the year, recording a 25% increase in total production volumes, while Greek yogurt volumes rose by 58% year on year. The launch of a dedicated Labneh processing line supported the introduction of several new SKUs, reflecting Juhayna's continued focus on innovation and portfolio expansion across dairy and fermented products.

Juhayna's performance in 2025 underscores its ability to adapt and perform in a challenging operating environment. Through a combination of capacity optimization, operational efficiency, product innovation, and export readiness, the Company not only managed external pressures but also strengthened its foundation for sustainable growth. Throughout the year, Juhayna remained committed to maintaining the highest quality standards, ensuring reliable supply, and delivering value to consumers across both local and international markets.

FLEXIBLE AND EFFICIENT OPERATIONS

Throughout 2025, Juhayna continued to enhance operational flexibility through automation, digital integration, and resource optimization. SAP linked systems, SCADA utilities control, and advanced automation improved production visibility, reduced downtime, and supported data-driven decision-making across facilities.

SAFETY AND QUALITY ASSURANCE

Juhayna conducted 66 total audits in 2025, 16 were internal while 50 were external, including audits by the National Food Safety Authority, international certification bodies, and key clients. All facilities maintained their NFSA whitelist status.

New SEDEX and SMETA certifications were obtained at Tiba and EgyFood. The SMETA Four Pillar certification focuses on Labour Standards, Health & Safety, Environment, and Business Ethics, which aligns with Juhayna's overall vision and goals forward. All existing certifications were renewed, including FSSC, BRC, ISO standards, SGF, HALAL, and Kosher. Laboratory operations analyzed more than 3.2 million samples during the year, averaging 8,786 samples per day. Juhayna Labs successfully passed 27 proficiency tests in 2025, reinforcing the accuracy and reliability of its testing capabilities.

Safety performance remained strong, supported by targeted training programs, strengthened reporting systems, improved permit to work processes, upgraded personal protective equipment, and ongoing safety awareness initiatives. The Company maintained a Total Case Incident Rate of 0.30.

FORWARD-LOOKING PLANS AND INNOVATION

Looking ahead, Juhayna's manufacturing strategy focuses on capacity expansion, technological advancement, and sustainability driven efficiency.

At Al Masreya

planned investments focus on upgrading processing and filling technologies to support greater operational flexibility and improved utilization of existing assets. These initiatives are designed to enhance efficiency, accommodate evolving product formats, and support future demand without placing additional pressure on the manufacturing footprint.

At EgyFood

the focus remains on optimizing production flows and enhancing automation to support continued growth across yogurt, fermented, and value added dairy categories. Ongoing system upgrades and process improvements are expected to strengthen productivity, improve consistency, and support a more agile response to market needs.

At Marwa

continued investments in processing capabilities and infrastructure are aimed at reinforcing export readiness and strengthening the facility's ability to support international demand. These enhancements are intended to improve output, reliability, and operational resilience across fruit and concentrate processing.

At Dawleya

future initiatives are focused on enhancing production capabilities and supporting the continued evolution of the beverage portfolio through targeted upgrades and technological advancements.

Sustainability remains a core pillar of Juhayna's forward looking manufacturing approach. Planned investments emphasize responsible resource use, energy efficiency, and environmental performance, reinforcing the Company's long-term commitment to sustainable growth, operational excellence, and value creation across its manufacturing network.

Lines of Business

DAIRY

In 2025, Juhayna's Dairy segment continued to anchor the Company's portfolio, reinforcing its position as the leading dairy producer in Egypt. The year benefited from a more favorable economic environment, marked by easing inflation, greater foreign exchange stability, and improved consumer purchasing power. These positive conditions supported stronger market dynamics and allowed the segment to build on the resilience demonstrated in the previous year. Supported by trusted brands, consistent quality, and nationwide availability, the Dairy segment delivered solid performance and continued to strengthen its leadership position across key categories. Juhayna recorded a market share of 62% in plain milk, reflecting continued consumer confidence in the brand.

Lactose free milk emerged as one of the most notable developments within Juhayna's Dairy portfolio during the year. The category recorded strong growth, driven by increasing consumer awareness of digestive health and a broader shift toward more inclusive nutritional choices. By offering high quality lactose free alternatives that maintain the taste and nutritional value of traditional milk, Juhayna strengthened its ability to serve a wider consumer base, including individuals with lactose intolerance and health focused households. This expansion further reinforced the Company's leadership in adapting its dairy portfolio to evolving lifestyle and wellness trends.

Operational discipline and efficiency improvements across the dairy value chain supported cost management and ensured product availability throughout the year. Both the Bekhero and Juhayna milk brands delivered strong performance during the year, serving as key drivers of volume and reinforcing the Company's ability to address diverse consumer segments. Bekhero continued to appeal to value conscious households, while Juhayna milk maintained its position as a trusted choice for quality focused consumers, together strengthening the Dairy segment's overall performance.

Innovation within the Dairy segment continued to focus on aligning products with changing lifestyles and health awareness, building on the Company's strong foundations in the category. Revenue generated by the Dairy segment reached EGP 15,310mn, representing year on year revenue growth of 31%, underscoring the segment's resilience and sustained contribution to overall performance.

Nuts and Grains

Juhayna's Nuts and Grains segment continued to support the Company's diversification strategy in 2025, addressing the gradual shift toward plant-based alternatives among Egyptian consumers. The segment offers a growing range of almond, oat, and coconut-based beverages designed to meet the needs of consumers seeking dairy-free, lactose-free, or vegan options. The Almond Barista Edition remained a key highlight within the portfolio, catering specifically to coffee professionals and home baristas, and reinforcing Juhayna's presence in the specialty beverage segment.

While the local plant-based milk market remains in an early stage of development, Juhayna continued to strengthen its presence through brand credibility, product quality, and broad distribution.

Revenue generated by the Nuts and Grains segment reached EGP 31mn, with yoy revenue growth of 29%. . Continued investment in category development and product innovation positions the segment for long-term growth as consumer awareness and demand continue to expand.

Fermented

The Yogurt segment remained one of Juhayna's most dynamic business lines in 2025, delivering strong performance and reinforcing its leadership across both spoonable and drinkable formats. Juhayna achieved a market share of 31% in spoonable yogurt and 45% in drinkable yogurt, reflecting sustained consumer demand and effective portfolio management.

The Yogurt segment benefited from continued innovation and capacity enhancements at EgyFood, with the launch of Juhayna's Labneh representing one of the most significant growth drivers of the year. Entering the soft cheese category through its Turkish style Labneh, Juhayna successfully captured approximately 42% of the total market share since launch, marking a major turnaround point for the segment in 2025. The product was introduced in two accessible formats, 250 gram and 500 grams, with competitive pricing that strengthened its appeal across a wide consumer base.

In parallel, the shelf life of spoonable yogurt was extended from 14 days to 30 days, enhancing product availability, reducing waste, and improving distribution efficiency. Alongside continued growth in Greek yogurt and the expansion of desserts and fermented beverages, the broader portfolio allowed Juhayna to strengthen its presence across multiple fermented categories while responding effectively to evolving consumer preferences.

Operations within the Yogurt segment are supported by internationally recognized food safety, quality, and social compliance frameworks. In 2025, selected facilities achieved SEDEX and SMETA four pillar compliance, reinforcing responsible sourcing, ethical labor practices, and alignment with international customer requirements, while maintaining existing food safety and quality certifications.

Revenue generated by the fermented segment reached 6,929mn, with year-on-year revenue growth of 44%. Performance during the year highlights the success of Juhayna's innovation led approach and its ability to translate consumer insights into commercially successful products.

Juhayna

Juice

In 2025, Juhayna's Juice segment continued to demonstrate stability and scale, supported by a diversified portfolio and strong brand equity across multiple consumer segments. The Company achieved a market share of 32%, maintaining its position among the leading juice producers in Egypt.

Juhayna's vertically integrated model continued to provide a competitive advantage through securing fruit sourcing, in house processing, and quality control. These capabilities enabled the segment to maintain consistent quality and manage cost pressures effectively.

Revenue generated by the Juice segment reached 6,254mn, with year-on-year revenue growth of 38%. Ongoing focus on operational efficiency and portfolio optimization supported sustained performance throughout the year.

HAPPY KITCHEN

The Happy Kitchen segment continued its upward performance trajectory, supported by consistent demand across both household and food service channels. The portfolio of cooking cream, whipping cream, sour cream, vegan cream, and tomato purée remains a trusted choice for consumers and professional kitchens alike.

The segment benefits from strong brand recognition, product versatility, and Juhayna's extensive distribution reach. Revenue generated by Happy Kitchen reached EGP 455mn . The line remains an important contributor to portfolio diversification and supports future expansion opportunities within the culinary ingredients category.

CONCENTRATES AND AGRICULTURE

Juhayna's Concentrates and Agriculture segment continued to play a strategic role within the Company's portfolio in 2025, supporting both internal production requirements and a growing base of international customers. The Al Marwa facility remained central to the production of fruit concentrates and pulps, reinforcing Juhayna's strength in fruit processing and value chain integration.

Export activity within the Concentrates and Agriculture segment is underpinned by strict compliance with international food safety, agricultural, and social responsibility standards. In 2025, selected operations achieved SEDEX and SMETA four pillar certification, supporting Juhayna's growing engagement with global partners and strengthening confidence across export markets in Europe, the MENA region, and Africa.

DAIRY FARM

+8,000 Livestock

+10,000 Feddans of Farmland

4.5 GW Solar power consumption

Juhayna's dairy farming operations continue to underpin the Company's vertically integrated model, supporting consistent milk quality and supply security. In 2025, livestock numbers totaled 8,000 cows, supported by 10,000 feddans of farmland. Solar power consumption across agricultural operations reached 4.5GW, reinforcing the Company's commitment to sustainable resource use.

In 2025, the dairy farming operations maintained compliance with Global G.A.P., GRASP, and SPRING and successfully achieved SEDEX and SMETA four pillar certification, reinforcing best practices in animal welfare, environmental stewardship, and workforce conditions. The farm was further enhanced through the installation of a newly upgraded milking parlor equipped with the latest technology, supporting improved efficiency, hygiene, and animal comfort.

Advanced herd management systems, strict quality controls, and responsible farming practices continue to support productivity, animal welfare, and milk quality across all dairy operations. In parallel, Juhayna leverages advanced smart monitoring systems across its agricultural activities to safeguard crops and resources, enabling timely and informed responses to adverse weather conditions and strengthening operational resilience and risk management.

During 2025, Juhayna expanded its agricultural footprint through the cultivation of wheat and the planting of 1,500 feddans of citrus, reinforcing its long-term commitment to sustainable agriculture and supply chain stability.

DISTRIBUTION

Juhayna's nationwide distribution network is operated through Tiba for Trade and Distribution, a wholly owned subsidiary. In 2025, Tiba managed 40 distribution centers, operated a fleet of 1,000+ vehicles, and served 262k+ points of sale across Egypt, ensuring broad market reach and product availability. Operations within are supported by robust governance, quality, and social responsibility frameworks. In 2025, Tiba for Trade and Distribution achieved SEDEX and SMETA four pillar compliance, reinforcing adherence to international standards related to ethical labor practices, health and safety, environmental responsibility, and business integrity across its nationwide operations.

During the year, Tiba focused on execution excellence at the point of sale, route optimization, and operational discipline to navigate ongoing market challenges. Distribution volume achievement reached 104% Vs Plan.

Tiba continued to distribute selected third-party brands through its established network. Revenue generated from third party distribution reached EGP 90m. The Company remains focused on strengthening existing partnerships while selectively exploring new collaborations aligned with its infrastructure and capabilities.

Looking ahead, Tiba will continue to enhance its distribution platform through advanced digitalization, analytics driven route planning, and sustainability focused initiatives. The distribution process is fully digitized, enabling end to end tracking of operations and providing complete visibility across the workflow. Detailed data on kilometers driven by each vehicle supports proactive maintenance planning and improves fleet efficiency.

These capabilities also strengthen alignment with ESG objectives by enabling accurate monitoring of fuel consumption, emissions, and overall operational sustainability. Through these initiatives, Tiba aims to further improve efficiency, reduce environmental impact, and reinforce Juhayna's leadership in nationwide distribution.

CREATING SHARED VALUE

Growing Together with Prosperity and Purpose

In 2025, Juhayna continued to advance its Creating Shared Value strategy, reinforcing its commitment to building healthy communities while driving sustainable business growth. For decades, the Company has remained focused on delivering high quality products to its valued customers, recognizing that long term commercial success is intrinsically linked to the well-being of society. As economic conditions improved and consumer confidence strengthened during the year, Juhayna deepened its efforts to ensure that growth is accompanied by meaningful social and environmental impact.

The Company's commitment to shared value remains rooted in three core pillars: People, Planet, and Industry Development. These pillars guide Juhayna's approach to enhancing quality of life, strengthening environmental stewardship, and supporting sector advancement. Through structured initiatives in health, education, women's empowerment, agricultural development, and responsible manufacturing, Juhayna integrates sustainability into its operational and strategic decision making processes.

Juhayna's CSV framework continues to be overseen by its Sustainability Champions, who work in close collaboration with the Board of Directors to ensure alignment with the Company's long term strategy, Egypt's Vision 2030, the Net Zero ambition, and the United Nations Sustainable Development Goals. The framework supports the identification and management of stakeholder priorities while proactively assessing and mitigating environmental and social risks across the value chain. Under the leadership of the Chief Executive Officer and in coordination with department heads, sustainability objectives are embedded across business functions to ensure measurable progress.

Further details regarding Juhayna's ESG performance, sustainable operations, and carbon footprint are available in the Company's Sustainability and Carbon Footprint Reports.

Committing to Community

Juhayna's community programs reflect its belief that sustainable growth must create tangible social impact. Through targeted initiatives in healthcare, education, youth development, and women's empowerment, the Company works to strengthen communities, expand opportunity, and improve quality of life in the areas where it operates.

Health Development

Baheya Foundation Support

Throughout 2025, Juhayna continued to support the Baheya Foundation for Early Detection and Free Treatment of Breast Cancer through various initiatives and donations, reaffirming its commitment to community health and access to essential medical services.

Volunteer Programs

In 2025, Juhayna reinforced its culture of social responsibility and community engagement through diverse volunteer programs. Initiatives included visiting and supporting the visually impaired through the "Dialogue in the Dark" program, supporting Baheya in its journey with breast cancer survivors, and continuing assistance to patients at Ahl Masr Hospital for Burns. In addition, Juhayna partnered with Share a Smile Foundation to distribute Ramadan Iftar meals, bringing joy and support to families in need. These programs reflect Juhayna's ongoing commitment to improving lives and promoting social solidarity.

Women Empowerment

Juhayna continues to invest in women's empowerment both internally and externally, recognizing the vital role women play in societal development.Internally, the Company strives to provide a supportive working environment, particularly for working mothers and pregnant employees, while continuously increasing female representation in leadership roles.

Juhayna 2025

"Hiya El Komanda" Program

In 2025, Juhayna continued implementing training sessions under the "Hiya El Komanda" program, launched in July 2021. The initiative aims to empower women in remote areas of Upper Egypt, specifically in Minya and Beni Suef. The program provides practical and training sessions focused on product handling, savings practices, and foundational work readiness skills, while offering Company products at preferential prices to participants.

Workplace Diversity

Juhayna remains committed to the Gender Balance Agreement signed in September 2021 with the International Finance Corporation and the American Chamber of Commerce in Egypt. The agreement aims to promote gender balance in the workplace, enhance women's economic participation, reduce social and economic gaps, and improve employment opportunities for women.

Women's Empowerment Principles

Since March 2023, Juhayna has been a signatory to the Women's Empowerment Principles established by the United Nations Global Compact and UN Women, further reinforcing its commitment to workplace gender equality.

The Company also obtained the Egyptian Gender Equality Seal (EGES) from the National Council for Women, in partnership with the Economic and Social Empowerment Program funded by USAID and implemented by Pathfinder International. This recognition affirms Juhayna's implementation of policies and procedures that promote an inclusive and gender balanced workplace.

Youth and Sports Support

Enactus Sponsorship

In 2025, Juhayna sponsored the Enactus competition for the seventeenth consecutive year. The competition supports students with innovative ideas in transforming them into projects that contribute to community and environmental development. Juhayna believes in empowering youth as future leaders and supporting them throughout their personal and professional journeys.

Education Support

RoboGarden – Learn to Earn Program

In 2025, through Juhayna's sponsorship of the Learn to Earn program in collaboration with RoboGarden, beneficiaries received comprehensive digital learning pathways designed to enhance technical skills and improve job market readiness. The program included hands on training in programming, artificial intelligence, robotics, and digital skills, alongside professional development modules such as freelancing, entrepreneurship, effective communication, and career readiness. Participants also benefited from mentorship sessions, applied projects, accredited certifications, and access to international learning platforms, enabling them to gain practical experience, improve employability, and generate income within the digital economy.

IGNITED – Development and Growth Association

In 2025, Juhayna sponsored the IGNITED competition through the Development and Growth Association, supporting STEM education initiatives. Beneficiary students gained access to structured training programs in robotics, programming, software development, and engineering, supported by expert supervision and practical project experience.

Preserving our Planet

Committed to protecting the environment and creating long term value for future generations, Juhayna continued to advance environmentally responsible practices across its operations in 2025. The Company strengthened its sustainability efforts through expanded recycling initiatives, enhanced water treatment capabilities, improved resource efficiency, and continued investment in responsible production processes, reinforcing its commitment to circular economy principles and measurable environmental performance.

Carton Recycling Agreement

In November 2022, Juhayna signed a carton waste recycling agreement in partnership with Tetra Pak, Uniboard, and Almarai, as part of its environmental strategy and in alignment with the COP27 climate agenda in Sharm El Sheikh. The agreement was operationalized in 2024 through pilot testing of the recycling facility, and in 2025 it was officially launched, accompanied by a nationwide consumer awareness campaign promoting recycling through the Bekia application.

Water Treatment at Juhayna Factories

During 2025, Juhayna continued recycling and treating operational wastewater across its factories through advanced treatment stations capable of pumping more than one million liters of clean water daily, contributing to responsible environmental resource management.

Company Reports

Carbon Footprint Report

Continuing its commitment to climate disclosure for the fourth consecutive year, Juhayna's Carbon Footprint Report serves as an important benchmark in the Company's long-term sustainability roadmap.

Annual Sustainability Report

In December 2025, Juhayna published its eighth consecutive Annual Sustainability Report for 2024 under the title "Mastering Future Ready Growth." The report documented the Company's achievements not only commercially, but also in environmental sustainability and community development.

Powering Forward for our Purpose

In 2025, Juhayna reaffirmed its commitment to advancing industry development by strengthening partnerships across its value chain and supporting the long term growth of Egypt's food and dairy sectors. Through strategic collaboration, capacity building initiatives, and continuous operational advancement, the Company contributes to building a more competitive, resilient, and future ready industry.

Dairy Sector Development

Juhayna launched the Juhayna Dairy Platform to strengthen partnerships with dairy farms and milk collection centers, focusing on three core pillars: Recognition, Training, and Support.

The Company conducts quarterly performance assessments of 130 dairy farms and 25 milk collection centers to identify best practices and activate its Recognition Initiative. Performance indicators are monitored to enhance workforce skills through the Training Initiative, supported by the Juhayna Academy.

In parallel, financial assistance under the Support Initiative aims to improve the quality and productivity of raw milk in Egypt. The platform seeks to provide comprehensive methodologies for developing Egypt's dairy sector, with a focus on quality, productivity, and sustainable advancement.

Finally, Juhayna takes pride in its membership in the United Nations Global Compact (UNGC), aligning its vision with thousands of companies worldwide to advance societal development in accordance with the initiative's ten principles. The Company remains committed to the United Nations Sustainable Development Goals and is proud of the progress achieved across multiple sustainability dimensions.

Corporate Governance

EXECUTIVE MANAGEMENT

With extensive industry experience and a demonstrated record of achievement, Juhayna's leadership oversees strategic direction and governance, supporting the Company's long-term growth and stability.

Seif Eldin Thabet

Chief Executive Officer

Mr. Thabet assumed the role of Juhayna's Chief Executive Officer in 2023, having previously held the position from 2016 to 2021. He has served on the Company's Board of Directors since 2006 and served as its Deputy Chairman from 2016 to 2021 before being reappointed in 2023. Mr. Thabet has been with the Company since 2004, where he gained managerial experience across multiple departments, having served as Sales and Marketing Manager, Project Manager, Plant Manager at El Dawleya factory, Human Resources Director, and Operations Director. In addition to his work at Juhayna, Mr. Thabet serves as Vice President of the Dairy Division at the Chamber of Food Industries. He was previously the Treasurer of the Food Export Council and has additional experience at the Muller Dairy in Germany.

Mohamed Sultan

Managing Director

Mr. Sultan joined Juhayna as a new Managing Director and serves as an Executive Member of the Board of Directors in 2024. With over 25 years of accumulated experience in a wide range of managerial roles in the banking sector, Mohammed Sultan brings local expertise gained through various positions in diverse sectors. Starting his career as the Vice President of "Mashreq Bank" for operations and supervisory management between 1997 and 2007, he held several local positions in "Bank of Oman" before joining the Commercial International Bank in various roles, including Operations Manager (2008-2009), Head of Banking Operations Sector (2009-2014), and subsequently as Chief Operating Officer from 2015 to 2023. His exceptional qualifications and experiences in operational processes qualify him to continue the outstanding achievements of the company's dedicated team in fulfilling its strategic goals and expansion plans.

Heba Thabet

Chief Strategy & Innovation Officer

Ms. Thabet has served as an Executive Member of the Board of Directors since 2006. She holds the position of Chief Strategy & Innovation Officer at Juhayna, overseeing product innovation and development. Ms. Thabet joined Juhayna in 2011, and her extensive history with the Company includes her former position as Associate Director of External Affairs for the Group and Marketing Manager for the Juice Division. Ms. Thabet is a member of the Business Advisory Board for SIFE Egypt, the International Public Relations Association (IPRA), and the Committee for Social Responsibility at the American Chamber of Commerce in Egypt.

Hussein Masry

Chief Operating Officer

Mr. Masry joined Juhayna as Chief Operating Officer in October 2024, bringing in over 23 years of experience in supply chain, manufacturing, and operational strategies. A strategic business executive with a transformative vision, he has a proven track record of delivering exceptional results. Before joining Juhayna, Mr. Masry served as CEO of Okeanos, where he led the company's supply chain and operational strategy in sustainable technology. Prior to that, he spent over a decade as Regional Supply Chain Director at Mars, overseeing supply chain and operational strategy across the Middle East.

Tarek Elwan

Chief Financial Officer

Mr. Elwan joined Juhayna as Chief Financial Officer in June 2024, bringing 19 years of expertise in Business Analytics, Debt Capital Markets, and Strategic Planning. He spent much of his career at Commercial International Bank (CIB), where he served as Head of Business Analytics from 2018 to 2024, leading the bank's analytics agenda and providing critical insights to senior management through digital transformation. Prior to that, he was a Business Analytics Manager in Institutional Banking, playing a key role in shaping the bank's strategic direction. Mr. Elwan also has extensive experience in Debt Capital Markets, executing transactions worth approximately EGP 10bn and USD 500mn across industries such as Real Estate and Oil & Gas, with deep expertise in financial modeling, debt structuring, and risk analysis.

Mohamed Raafat

Chief Marketing Officer

Mr. Raafat has assumed the role of Juhayna's Chief Marketing Officer in September 2024, leading the Brand Management and External Relations departments. Mr. Raafat brings extensive experience in leading marketing strategies for multinational enterprises, including La Roche, Novartis, and AstraZeneca. As Head of Customer Experience Transformation and Marketing at La Roche, he drove innovative marketing solutions and spearheaded digital transformation across the Middle East. Prior to this role, Mr. Raafat held executive marketing positions in various global institutions, showcasing his strategic vision and leadership in the healthcare sector.

BOARD OF DIRECTORS

Ahmed El Wakil

Chairman of the Board

Mr. El Wakil has sat on the Board as a Non-Executive, Independent Member since June 2021. Mr. El Wakil owns and serves as Chairman of the Board at Wakalex, a leading importer, exporter, and manufacturing company in Egypt. He is President of the Egyptian Chamber of Commerce in Alexandria and President of the Federation of African Chambers of Commerce, Agriculture, Industry, and Professions. He serves as Vice President of the Association of the Mediterranean Chambers of Commerce and Industry (ASCAME), Chairman of the Egyptian-Syrian Business Council, and Vice President of the Union of Arab Chambers. He previously served as a Member of the Board of Trustees of the General Authority for Investments and was a Member of the Board of Directors of Antoniadis for Tourism and Development, the National Authority for Social Insurance, the Internal Trade Development Agency, and the Arab-Belgian-Luxembourg Chamber of Commerce.

Seif Eldin Thabet

Deputy Chairman of the Board and Chief Executive Officer

Mr. Thabet assumed the role of Juhayna's Chief Executive Officer in 2023, having previously held the position from 2016 to 2021. He has served on the Company's Board of Directors since 2006 and served as its Deputy Chairman from 2016 to 2021 before being reappointed in 2023. Mr. Thabet has been with the Company since 2004, where he gained managerial experience across multiple departments, having served as Sales and Marketing Manager, Project Manager, Plant Manager at El Dawleya factory, Human Resources Director, and Operations Director. In addition to his work at Juhayna, Mr. Thabet serves as Vice President of the Dairy Division at the Chamber of Food Industries. He was previously the Treasurer of the Food Export Council and has additional experience at the Muller Dairy in Germany.

Mohamed Sultan

Executive Board Member and Managing Director

Mr. Sultan joined Juhayna as a new Managing Director and serves as an Executive Member of the Board of Directors in 2024. With over 25 years of accumulated experience in a wide range of managerial roles in the banking sector, Mohammed Sultan brings local expertise gained through various positions in diverse sectors. Starting his career as the Vice President of "Mashreq Bank" for operations and supervisory management between 1997 and 2007, he held several local positions in "Bank of Oman" before joining the Commercial International Bank in various roles, including Operations Manager (2008-2009), Head of Banking Operations Sector (2009-2014), and subsequently as Chief Operating Officer from 2015 to 2023. His exceptional qualifications and experiences in operational processes qualify him to continue the outstanding achievements of the company's dedicated team in fulfilling its strategic goals and expansion plans.

Heba Thabet

Executive Board Member and Chief Strategy & Innovation Officer

Ms. Thabet has served as an Executive Member of the Board of Directors since 2006. She holds the position of Chief Strategy & Innovation Officer at Juhayna, overseeing product innovation and development. Ms. Thabet joined Juhayna in 2011, and her extensive history with the Company includes her former position as Associate Director of External Affairs for the Group and Marketing Manager for the Juice Division. Ms. Thabet is a member of the Business Advisory Board for SIFE Egypt, the International Public Relations Association (IPRA), and the Committee for Social Responsibility at the American Chamber of Commerce in Egypt.

Mariam Thabet

He is a Board Member of Mitterrandian Publishing Services and the Scientific Center of Documents and Information at Cairo University. Mr. Abd El-Wahab is also a member of the Culture and Publishing Committee at the Ministry of Culture

INTERNAL AUDIT

Internal Auditing is an independent, objective assurance and advisory service designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of governance, risk management, and control processes. The Internal Audit Scope covers all areas of the business, including industrial, commercial, agricultural, livestock, and central support functions. Our internal audit function plays a crucial role in safeguarding Juhayna's brand promise, to deliver safe, high-quality dairy and juice products to local and international markets. Internal audit provides independent assurance that operational risks are effectively managed, policies are implemented, and compliance is upheld. This is a cornerstone of our corporate governance, as well as a reflection of the trust we seek to maintain with consumers, investors, partners, regulators, and other stakeholders.

Our auditing activities are aligned with the IPPF (International Professional Practices Framework) issued by IIA (Institute of Internal Auditors), including "Global Internal Audit Standards", "Topical Requirements", and "Global Guidance".
Moreover, the provisions of the Egyptian Corporate Governance Guide are also taken into consideration, along with the rules governing the listing and delisting of securities on the Egyptian Exchange, as issued by the Financial Regulatory Authority

As a centralized activity, the Internal Audit department directly reports to the Board and the CEO.

Oversight and Accountability

- The Chief Audit Executive (CAE) is in charge of developing and implementing the audit strategy for the internal audit function that supports the strategic objectives and success of the organization and aligns with the expectations of the board, senior management, and other key stakeholders. This exactly aligns with the "Global Internal Audit Standards – Standard 9.2: Internal Audit Strategy".
- The internal audit function has the knowledge and experience to understand the internal audit mandate and the organization's governance, risk management, and control processes. A properly resourced and positioned internal audit function develops and implements a strategy to support the organization's success. This exactly aligns with the "Global Internal Audit Standards – Principle 9: Plan Strategically".
- Thorough understanding of the organization's governance, risk management, and control processes enables the chief audit executive to identify and prioritize opportunities to provide internal audit services that may enhance the organization's success. The identified opportunities form the basis of internal audit strategy and plan. This exactly aligns with the "Global Internal Audit Standards – Standard 9.1: Understanding Governance, Risk Management, and Control Processes".

Juhayna 2025

Our Internal Audit Strategy 2025-2027

In 2024, preparation began to develop Juhayna's Internal Audit Strategy, which was formally established for 2025–2027 with a bold vision to position Juhayna's Internal Audit activity as a role model in Egypt, Africa, and the Gulf by 2027.

The strategy was developed in alignment with the new Global Internal Audit Standards (published in January 2024 and effective January 2025).

This strategic foundation directly influenced the 2025 Internal Audit Plan, which was updated to incorporate new priorities, such as increased focus on Environmental, Social, and Governance (ESG) audits, integration of new IIA Topical Requirements (e.g., Third-Party), and expansion of advisory engagements, reflecting the evolving global role of Internal Audit as a strategic business partner.

As a centralized activity, the Internal Audit department directly reports to the Board and the CEO.

Strategy Pillars, Goals, and Initiatives 2025-2027

In alignment with Juhayna Group's strategic vision for operational excellence, transparency, and sustainability, the Internal Audit Department has launched a comprehensive transformation roadmap for 2025–2027. This roadmap reflects the Department's revamping to achieve the bold vision of Juhayna's Internal Audit activities, enhance compliance maturity, and promote data-driven decision-making across all business sectors.

Pillar One: changing audit methodology and aligning with the latest Global Internal Audit Standards (GIAS) published in 2024.

Pillar Two: Improving compliance activity covering all operational sectors.

Pillar Three: Improving risk management activity with comprehensive risk registers covering all operational sectors.

Pillar Four: Restructuring roles and responsibilities to ensure agility, specialization, and cross-functional integration.

Pillar Five: Strengthening Continuous Professional Education (CPE) through certifications, training, and Internal Audit Community engagement.

Pillar Six: Embedding Artificial Intelligence (AI) into audit planning, analysis, reporting, and pattern recognition stages to enhance insight and efficiency.

Pillar Seven: Conducting an External Quality Assessment (EQA) to benchmark Juhayna's Internal Audit performance against global standards, by end of 2027.

Through these seven pillars, Juhayna's internal audit activity is building a culture of integrity, innovation, and professional leadership that supports the Group's ESG commitments and long-term sustainable value creation.

As Juhayna continues to grow and expand across both local and international markets, the Internal Audit function remains focused on strengthening internal controls and reinforcing compliance frameworks.

The Internal Audit annual plan is risk-based and dynamic, reflecting timely adjustments in response to changes affecting the organization. The plan also supports the achievements of the organization's objectives and considers the full range of professional services of Internal Audit.

The full range of Internal Audit services extend to include activities relating to Audit, Governance, Risk Management, Compliance, Investigations, Follow ups, and Advisory/ Special projects.

BUILDING TRUST WITH TRANSPARENT WHISTLEBLOWING PRACTICES

The Company's management encourages the employees to report any practices that violate Laws, systems, regulations of the company, ethical or professional code of conduct, noting that proper actions are taken against violators with the protection of the reporting parties, taking into consideration that the reporting process is carried out depending on objective documents and information.

Juhayna implements the "iVoiceUp" system, an automated platform for reporting complaints, whistleblowing concerns, and suggestions across all its locations. This system encourages transparency and open communication between the Company and its employees, making it easier and more convenient for them to raise concerns. Employees can report issues anonymously if preferred through texting, voice notes, and file sharing. QR codes placed on posters across company sites, ensuring secure and confidential access to the system.

DISCLOSURES AND MANDATES

Juhayna continues to uphold a strong commitment to transparency and regulatory compliance by aligning its reporting practices with disclosure requirements set by the Egyptian Exchange (EGX). The company issues key reports on a structured schedule:

- Board Reports, Annual Reports, and Governance Reports (annually)
- Financial and Earnings Releases (quarterly)
- Sustainability Reports (annually)

The company's corporate policy ensures full compliance with relevant laws, regulations, and legal standards in Egypt. Juhayna also meets the requirements of international certifications and aligns its operations with global standards, such as the UNGC and the UN SDGs, as well as Egypt's Vision 2030.

INFORMATION SECURITY

Juhayna places significant emphasis on protecting sensitive information, including its Bills of Material (BOM) and recipe specifications. These critical assets are safeguarded through robust security protocols and strict access controls. Any changes to specifications require formal management approval, along with review and input from the Finance department. The Company also ensures that new product launches and marketing innovations remain confidential and are treated as classified information until their official release. Comprehensive confidentiality agreements are in place, and no breaches have been recorded throughout Juhayna's history.
