Testahil — Modon Holding PSC (ADX: MODON) · Revision 2

Companion model · Independent Valuation Study · Educational analysis · Not investment advice

REVISION 2 (9 Aug 2026). This edition restrikes the valuation on the 30-Jun-2026 reviewed balance sheet and the H1-2026 results release (revenue backlog AED 65.4bn, 95% development; H1 real-estate sales AED 26bn) — disclosures the first edition failed to carry into its drivers, a defect surfaced by external audits and accepted. The audits' other accepted findings are implemented throughout: the bridge uses AVAILABLE cash (AED 8.6bn) rather than gross cash including project escrow; the terminal debt weight is DERIVED from the model's own terminal-year balance sheet; working capital is built from components (receivable days, land-bank conversion, payables/advances cover); D&A is charged on the asset base; beta is a regression (1.03 vs an equal-weight panel proxy), no longer an assumption; and the mid-chain hardcoded numerals the audits found are eliminated.

What this workbook is. Every blue cell is an input; every black cell is a formula; green cells link across sheets. The cost of capital is built from the AED government yield net of the sovereign spread, beta and the premium; the development backlog rolls forward in front of you; the DCF waterfall chains EBITDA → EBIT → NOPAT → free cash flow → present value; the terminal block derives its reinvestment rate from growth over return on capital; the statements, ratios and all four lenses chain off the same cells.

THREE THINGS ARE PASTED VALUES. First, audited and disclosed history (the primary record; where a line is both disclosed and derivable, the DISCLOSED figure is carried). Second, the FY2025 four-segment base and the 30-Jun-2026 balance-sheet anchors — pasted once, with the entire forecast chaining off them as formulas. Third, whole-model engine outputs, where each figure is a complete re-run: the Monte Carlo price map, the sensitivity grids and the scenario outputs (run-off, growth-hold, Egypt stress). Their DRIVER VECTORS are published on the Assumptions sheet so each re-run is reproducible, but the grids do NOT redraw when a driver changes; everything else reprices live, and the workbook forces a full recalculation when opened.

The contested judgement, shown both ways. Base: the realised H1-2026 surge normalises but sustains.

Run-off (now labelled a stress — the H1 disclosure falsified it as a central path): launches halve and fade. Both DCFs are shown side by side; never averaged.

What it is not. Not investment advice, a recommendation, or a price target. Values are model outputs shown as ranges.

Currency. AED million unless stated. Spot AED 2.83 (7-Aug-2026 close); valuation date 30-Jun-2026, rolled 38 days to the price anchor. Sheets: READ FIRST · Summary · Fundamental Valuation · Assumptions · SOTP Bridge · Segments · Relative & Normalized · DCF · Income Statement · Balance Sheet · Cash Flow · Summary Financials · Monte Carlo · Sensitivity · Per-Share & Ratios · Peer & Sector.

Gross debt incl. related-party loan	1,976	5,364	6,789	9,542	10,300	10,500	9,700	8,800	7,900
Net debt (− = net cash)	(284)	(1,646)	(5,853)	(2,762)	(4,045)	(5,962)	(10,881)	(18,410)	(28,189)
Equity attributable to owners	13,769	49,676	53,903	56,397	59,019	64,935	72,264	80,394	89,007
Non-controlling interests	1,150	1,186	847	922	976	1,097	1,246	1,412	1,588
Net debt / EBITDA	-0.42x	-0.17x	-1.20x		-1.16x	-0.77x	-1.16x	-1.81x	-2.69x

Cash flow — audited history, H1-2026 actual, and the forecast chain

Forecast rows link to the DCF waterfall; the IFRS operating-cash-flow actuals are shown separately from the model construct (different measures, not one series)

	FY2024A	FY2025A	H1-26A	H2-26E	FY27E	FY28E	FY29E	FY30E
IFRS net cash from operating activities (audited/reviewec	3,231	3,860	(3,921)					
Capital expenditure (PP&E + intangibles + IP)	1,247	1,261	312					
Model construct (NOT the IFRS measure): links to the DCF waterfall								
NOPAT				2,653	5,937	7,288	7,930	8,170
+ D&A				341	709	736	765	794
− Capex				(700)	(1,500)	(1,550)	(1,600)	(1,650)
− Δ working capital				(938)	(3,119)	(1,520)	313	2,109
Free cash flow to firm				**1,357**	**2,027**	**4,955**	**7,408**	**9,423**

Implied H2-2026 IFRS-basis operating recovery required by the model: the H1 actual was −3,921; the model's FY2026 working-capital absorption of 938 implies roughly +5,978 of H2 operating cash flow — stated, not hidden

Summary financials — the model in one table
