What this workbook is
THE WORKBOOK CALCULATES
Pasted cell class 1 of 4 — audited and disclosed history
Pasted cell class 2 of 4 — the unit build's output
Pasted cell class 3 of 4 — whole-model re-runs
Pasted cell class 4 of 4 — the measured-error multipliers
Blue means input, black means formula
The contested judgement is carried both ways
Currency and units
Basis and date

Egyptian International Pharmaceutical Industries Company (EIPICO)
An educational valuation model of a listed Egyptian pharmaceutical manufacturer, built from the company's statements. It is not investment advice, it contains no rating and no price target, and it expresses value as a
Every figure that can be derived from a driver is a live formula. Change a driver on the Assumptions sheet a the glide, the discount factors, the cash-flow waterfall, the terminal block, the three statements, the bridge This claim is tested, not asserted: a driver test perturbs each input in place, re-evaluates the whole workboo headline moves in the right direction.
The FY2023, FY2024 and FY2025 columns of the Income Statement, Balance Sheet and Cash Flow sheets, a operating statistics on Segments. Where a line is both disclosed and derivable, the DISCLOSED figure is carr pasted cell.
The FY2024 and FY2025 pack volumes and realised prices per pack on the Segments sheet. These come fro disclosed pack counts against the revenue note's channel split; flattened into a grid the reconciliation would Everything downstream of them — every forecast year — is a formula.
The Monte Carlo percentile map and touch ladder, and the Sensitivity grids. Each of those cells is a COMPLE model at a different input, or a full 50,000-path simulation. THEY DO NOT REDRAW WHEN A DRIVER CHANG those two sheets is a formula.
The factors behind the far-year ranges at the foot of the Income Statement sheet. They are a measurement own projections have landed from what the company later reported, so they are an observation and not son derive. The ranges they produce ARE formulas and move with the projection above them.
Blue type is a pasted number. Black type is calculated in the sheet.
The credit-loss and provision charge is the study's single most consequential contested judgement. Frame A cost of doing business; Frame B treats it as normalising. Both run all the way through to a value per share a They are never averaged into one number.
Egyptian pounds. Money in millions unless a row says otherwise; per-share figures in pounds; packs and uni
Audited CONSOLIDATED financial statements. Share price 127.30 at 2026-08-06; 168.755750 million shares ends 31 December.

SUMMARY VALUATION TABLE	EGP / share
Discounted cash flow — Frame A	33.00
Discounted cash flow — Frame B	49.68
Book value and sustainable return	43.91
Relative multiples	48.65
Normalised earnings power	56.78
CENTRE — FRAME A (the cash-flow lens, unweighted)	**33.00**
CENTRE — FRAME B (the cash-flow lens, unweighted)	**49.68**
Field low to field high	**33.00**
Market price	**127.30**

KEY FIGURES	
Market capitalisation (EGP mn)	21,483
Net debt (EGP mn)	7,364
Enterprise value (EGP mn)	28,851
FY2025 revenue (EGP mn)	9,441
FY2025 EBITDA (EGP mn)	2,484
FY2025 attributable profit (EGP mn)	1,442
Trailing price / earnings	14.9x
Trailing enterprise value / EBITDA	11.6x
Cost of equity	25.57%
Weighted average cost of capital, year one	22.71%
Terminal weighted average cost of capital	15.03%
Terminal value as a percentage of enterprise value	79.9%
Dividend per share proposed for FY2025 (EGP)	3.50
Dividend yield at the market price	2.7%

Against the market price	Note
-74.1%	*Terminal value 80% of core enterprise value, 61% of total*
-61.0%	*Terminal value 80% of core enterprise value, 65% of total*
-65.5%	*Justified 1.19 times book*
-61.8%	*Three multiples averaged on the sheet*
-55.4%	*Three-year average margin*
-74.1%	*A range, not a target. No rating is expressed anywhere in this workbook.*
-61.0%	*TWO CENTRES, NEVER AVERAGED INTO ONE. Which one you use is a judgement about the debtor book, and it is yours to make rather than ours to bury.*
56.78	

Lens	Value (EGP/share)
Discounted cash flow — Frame A (provision charge permanent)	**33.00**
Discounted cash flow — Frame B (provision charge normalising)	**49.68**
Book value and sustainable return	**43.91**
Relative multiples	**48.65**
Normalised earnings power	**56.78**
CENTRE — FRAME A (the cash-flow lens, unweighted)	**33.00**
CENTRE — FRAME B (the cash-flow lens, unweighted)	**49.68**
Memo — the retired weighted blend this edition replaced, on Frame A	41.10
Low of the field	**33.00**
High of the field	**56.78**
Market price	**127.30**
Market price relative to the Frame A centre	**285.8%**
Market price relative to the Frame B centre	**156.2%**

Weight	How it is built
50.0%	*Five explicit years of free cash flow to the firm, discounted on a glide from the current to the terminal cost of capital, plus a terminal value on the growth-over-return reinvestment identity.*
50.0%	*The identical model with the single contested judgement resolved the other way. Published beside Frame A, never averaged into it.*
20.0%	*Book value per share multiplied by (sustainable return less growth) over (perpetual cost of equity less growth). EVERY term is live: the sustainable return reads the forecast return-on-equity path, and the perpetual cost of equity reads beta, the terminal risk-free rate and the terminal premium.*
15.0%	*Three multiples triangulated ON the sheet, EACH APPLIED TO THE EARNINGS OF ITS OWN PERIOD — the forward multiple this model's own economics justify on forward earnings, and the company's own four-year mean and a cost-of-equity-adjusted struck peer reference on trailing earnings.*
15.0%	*The three-year average operating margin applied to forecast revenue, capitalised at the perpetual cost of equity on the payout that the growth rate permits.*
	The centre of each frame IS its own cash-flow read. The three lenses that do not turn on the contested judgement are published beside it and averaged into neither.
	THE TWO CENTRES ARE NOT AVERAGED. One number covering both frames is a straight average of them, which is exactly what this study says it never does.
	Printed so the change is visible rather than only described. Its weights had never been tested out of sample, and one of the four readings it carried is not a lens this class uses at all.

Egyptian statutory rate
Above statutory to allow for the solidarity contribution and disallowed items

Not capacity-constrained at 65% utilisation
Hard-currency export growth was 10% in FY2025
Administered prices track inflation, no real gain
Competitive generic export pricing
Small line, idle-capacity utilisation
Partial real-rate reversal as domestic inflation converges

Cost of sales note (26)
Cost of sales note (26)
Cost of sales note (26), wages plus benefits plus social insurance
Cost of sales note (26)
Cost of sales note (26)
disclosure — the audited split is shown for completeness, but depreciation is EXCLUDED from the escalated unit cost by design and enters exactly once, from the property roll-forward. This row drives nothing and is meant to drive nothing
Applied THROUGH the exchange-rate path, never a domestic index
The balance is made in-house
Minimum-wage resets run above consumer prices
Subsidy reform, ABOVE consumer prices

Applied only to genuinely domestic lines

Disclosed 12.9% -> 12.4% -> 10.7%
Rising with the biosimilar pipeline
Held near the FY2025 level
Permanent, at the three-year average
Normalising as the book seasons
Falls as the construction cycle completes
The plant was licensed in December 2025 and enters service
About a sixteen-year blended life
An eight-month strategic stockpile, stated policy
Distributor-concentrated book plus export terms
Audited FY2025 implies 54 days
EGP 3.50 a share proposed for FY2025 on attributable profit

House cost-of-capital reference print
Country risk-premium file, Egypt row, read live
Same file, same row
Same file — the alternative
Same file — the alternative
Own-stock weekly regression against a 36-name local composite, five years; R-squared 0.235, n = 257
Sovereign yield plus 250 basis points
Dollar and euro term loans
Carries foreign-currency debt at its LOCAL-EQUIVALENT cost
Borrowings note (17), by lender and currency
NOT a cost of debt: the first point is the normalised risk-free rate. Only the SHAPE of this row enters the model — the discount-rate glide rebases it to its own endpoints, so the levels cancel
What the profit and loss account actually bears — NOT the marginal cost of debt above. Calibrated to the first quarter of 2026

A sourced 5% medium-term inflation target plus an UNSOURCED 5.5-point real convention. The real leg is an assertion, it is the widest single lever in the study, and it is an open item — see the terminal grid
Normalised toward the rating-class norm
Long-run Egyptian norm
Long-run norm
Today's net debt over market capitalisation plus net debt. Not an assumption; the earlier edition's 20% was neither this nor the book reading below
disclosure — the BOOK reading, published beside the market reading above rather than chosen between in silence. The valuation uses the market reading, because a weighted average cost of capital weights market values; this row drives nothing
Pound-nominal, against a 5% terminal inflation rate — about zero in real terms
Three disclosed years, reconciled to this model's own income statement: 74.508, 151.581, 512.085 — mean 246.058. The first quarter of 2026 annualises to 52.5, but the auditor states two holdings' statements were not received, so that quarter is evidence, not a run-rate
Below the Gulf listed range for a minority, unlisted, non-controlled stake
MARKET DATA, cross-check layer. The MIDPOINT of the only two disclosed observations (26.7x and 16.0x) — NOT a median of a peer set, and the peers are not named, so it cannot be rebuilt from their filings
The ONE difference the peer multiple is adjusted for, registered here rather than typed inside the adjustment so a reader can see what the adjustment is made of

2024	45.91
2025	77.50
Four-year mean	
Trailing multiple today — on the share count IN ISSUE	127.30

Trailing multiple today — on the AUDITED WEIGHTED-AVERAGE count for FY2025	127.30

THE THREE MULTIPLES, EACH ON THE EARNINGS OF ITS OWN PERIOD	
Justified forward multiple from this model, on FY2026E earnings	6.33x
The company's own four-year mean multiple, on trailing earnings	6.57x
Struck peer reference, cost-of-equity adjusted, on trailing earnings	6.47x
AVERAGE OF THE THREE — the relative lens	**6.46x**

NORMALISED EARNINGS POWER	
Three-year average operating margin	22.9%
FY2027E revenue	12,612
Normalised operating profit	2,888
Normalised earnings per share	8.97
Payout the growth rate permits	62.7%
NORMALISED EARNINGS POWER VALUE	**56.78**

Value (EGP/share)	Note
	The forecast path RISES through the window rather than settling, so the sustainable return is the mean of its last three years — read from the path here, never typed
	Averaging the two frames' EARNINGS is not averaging the two VALUATIONS: the frames are published as two separate centres and are never averaged into one
	The base for the two TRAILING multiples below. A trailing multiple applied to forward earnings would mismatch the periods

Attributable EPS	Price / earnings
5.92	4.74x
5.53	6.60x
7.37	6.23x
8.90	8.71x
	6.57x
8.54	**14.90x**

8.90	**14.31x**

34.55	*A FORWARD multiple, applied to FORWARD earnings — built from this model's own sustainable return and perpetual cost of equity*
56.15	*A TRAILING multiple, applied to TRAILING earnings — year-end closes against audited attributable profit, each year on its own weighted-average share count*
55.25	*A TRAILING multiple, applied to TRAILING earnings. The midpoint of the two disclosed observations, not a median of a peer set; those companies face a cost of equity near 10%, not this one*
48.65	

TWO SHARE COUNTS, BOTH PUBLISHED. The capital increase from 148.755750 to 168.755750 million shares completed during FY2025, so that year has a weighted-average count of 162.016024 million and a closing count of 168.755750 million. Both readings of the trailing multiple are legitimate; neither is stated alone.

EGP million	FY2026E	FY2027E
Revenue	10,694	12,612
EBITDA	**2,415**	**2,679**
EBITDA margin = EBITDA / revenue	22.6%	21.2%
Less depreciation and amortisation	-304	-425
EBIT = EBITDA less depreciation and amortisation	**2,111**	**2,254**
Tax rate — the EFFECTIVE rate the business bears, not the statutory rate	23.50%	23.50%
NOPAT = EBIT x (1 less the tax rate)	**1,615**	**1,724**
Add back depreciation and amortisation	304	425
Less capital expenditure	-1,337	-568
Less the increase in working capital	-910	-1,020
FREE CASH FLOW TO THE FIRM	**-328**	**562**
Discount rate	22.71%	20.65%
Discount factor	0.8149	0.6755
PRESENT VALUE OF FREE CASH FLOW TO THE FIRM	**-268**	**380**

TERMINAL BLOCK	
Invested capital at FY2030E — property, construction, working capital and intangibles	19,773
Return on invested capital, FY2030E — the model's OWN, read from the rows above	**12.73%**
Terminal depreciation catch-up — the parked construction balance at the depreciation rate	193
Terminal NOPAT, on FY2030E money = final-year NOPAT less the depreciation the parked construction balance has never been charged. It is NOT grown here: the terminal value row below grows the whole free cash flow one year	2,370
Plus book depreciation (terminal NOPAT is already net of it)	423
Less maintenance at current cost — book depreciation escalated over half the useful life the company itself discloses	-675
Less the capital behind real growth	0
Less inflation on working capital	-717
Terminal free cash flow to the firm	1,401
Terminal discount rate	15.03%
Terminal growth	7.0%
TERMINAL VALUE — the free cash flow above, grown one year and capitalised	**18,665**

Present value of the terminal value	**7,944**

Sum of the present values of forecast free cash flow	**2,002**
CORE ENTERPRISE VALUE	**9,946**
Terminal value as a percentage of CORE enterprise value	**79.9%**
Terminal value as a percentage of TOTAL enterprise value (both are published)	**61.4%**

FRAME B — THE SAME MODEL WITH THE CONTESTED JUDGEMENT RESOLVED THE OTHER WAY		
EBIT on Frame B = Frame A EBIT plus the difference in the provision charge	2,191	2,437
NOPAT on Frame B	1,676	1,864
Free cash flow to the firm on Frame B	-267	702
Present value of free cash flow on Frame B	-218	474
Return on invested capital, FY2030E — Frame B's own	14.71%	
Terminal NOPAT on Frame B, on FY2030E money, less the parked construction depreciation — not grown here, for the same reason as Frame A	2,761	
Terminal free cash flow on Frame B — the same construction as Frame A: NOPAT plus book depreciation, less maintenance at current cost, less growth capital, less inflation on working capital	1,792	
Terminal value on Frame B	23,882	
Core enterprise value on Frame B	**12,761**	
VALUE PER SHARE ON FRAME B	**49.68**	

FY2028E	FY2029E	FY2030E	Terminal
14,621	16,637	18,608	
3,037	**3,394**	**3,713**	
20.8%	20.4%	20.0%	
-446	-437	-423	
2,591	**2,957**	**3,290**	
23.50%	23.50%	23.50%	
1,982	**2,262**	**2,517**	
446	437	423	
-512	-532	-558	
-869	-877	-829	
1,048	**1,290**	**1,553**	
18.40%	16.53%	15.03%	
0.5705	0.4896	0.4256	
598	**631**	**661**	

This is what sets terminal reinvestment. It is not an assumption and there is no cell to type it into.
Construction still parked at FY2030E has never entered the depreciable base. A perpetuity cannot capitalise profit on capital it never charges.

Earnings per share (EGP)	**5.53**	**7.37**

YEARS THREE TO FIVE AS RANGES — the method replayed on this company's own past, year by year, and scored against what was later reported
MULTIPLY the projection by the factor: above one means the outturn came in ABOVE the projection. The basis is a SPAN — the widest and the narrowest of the readings behind it, never a percentile.
Revenue — low of the range
Revenue — high of the range
Cost of sales — low of the range
Cost of sales — high of the range
Gross profit — low of the range
Gross profit — high of the range

Profit for the year — low of the range
Profit for the year — high of the range
Depreciation and amortisation — low of the range
Depreciation and amortisation — high of the range
The fourth and fifth forecast years carry no measured range: the replay covers three years ahead and no further, and none is invented for them.

SECTOR OPERATING BENCHMARKS (the subject, computed here)	
Gross margin, FY2025	44.0%
EBITDA margin, FY2025	26.3%
Return on average equity, FY2025	26.5%
Capacity utilisation, FY2025	65.3%
Cash conversion cycle, FY2025 (days)	343
Export share of revenue, FY2025	31.4%

Basis	Provenance
eer figure is used to build any historical number for the subject company.	
Trailing price / earnings	*Public-comparables service, 2025 basis — cross-check only. This company is not named and its financial statements are not published here, so this multiple cannot be rebuilt from its filings*
Trailing price / earnings	*Range observed across the peer set — cross-check only*
Trailing price / earnings	*NOT a median of a disclosed peer set: two observations have a midpoint, and this cell computes it. The lens runs a 13-26 times band around it*
Trailing price / earnings	*Computed in this sheet from the audited attributable profit and the market price*
Trailing price / earnings	*Computed from year-end closes and audited profit — entirely primary*
	The peers face a cost of equity near 10%; this company's perpetual cost of equity is 14.9% and its current cost of equity 24.8%. The discount is not an anomaly to be closed.
