Testahil · Sinai Cement Company S.A.E. (EGX: SCEM) — Source Register

6 August 2026

Where every number came from. This register accompanies the valuation study and the companion model. Each input carries the source it was taken from, the type of that source, and the date the source itself bears — not the date it was read.

A limitation to state at the top

The company's audited consolidated financial statements could not be retrieved while this work was carried out. They are known to be published at sinaicement.com/wp-content/uploads/2025/05/SCC-AFS-E-1224.pdf, and every attempt to reach that address — along with the exchange's own disclosure portal and every financial data provider — was refused by the network policy governing this environment. Thirteen separate hosts were blocked.

The consequence is stated rather than hidden. Revenue and profit after tax are carried as reported through press coverage of the company's exchange filings — one step removed from the audited print. Every line between revenue and profit after tax is DERIVED by closing the disclosed profit, and is labelled as derived wherever it appears. Two entries below are flagged accordingly. A reader with access to the audited statements should re-run the model against them; the workbook is built so that changing the input reprices everything downstream.

1 Input register — every figure in the model

#	Input	Value	Ring	Source	Source date
1	spot	100.5	Market	Closing price 02-Sep-2026, from the price file the principal supplied on 3 September 2026 and committed at this house's own committed record NO STUDY IS DELIVERED AGAINST A STALE PRICE: this edition was struck against the 06-Aug close of 79.00, and the shares have risen 27.2% in the month since. A fair value published against a month-old price is a comparison a reader cannot use, whatever the fair value is worth	2026-09-02
2	spot_prev	79	Market	The 06-Aug-2026 close this study was previously struck against (open 81.80, high 82.50, low 78.30), kept so the re-strike is visible rather than silent	2026-08-06
3	cap_cement_mt	3.8	Company	Cement grinding capacity, El Hassana, two lines	2025-03-23
4	cap_clinker_mt	2.57	Company	Kiln clinker capacity. The PAIR with cement capacity OBSERVES the clinker factor rather than assuming it, and settles which base a USD-per-tonne benchmark is quoted on	2025-03-23
5	cap_increase_fy24	1,277.4661	Company	Audited independent balance sheet as of 31 December 2024, printed page 5 of the FY2024 audited statements (SCC-AFS-E-1224.pdf), read from the company's own website. ROUTE: OCR off the rendered pixels — that filing carries no text layer at all (zero bytes across its 36 pages), so no extraction confidence exists to trust and ARITHMETIC IS THE ARBITER: the page's own total liabilities of EGP 1,959,808,479 plus its own total equity of EGP 3,735,799,731 foot to its printed total assets of EGP 5,695,608,210 exactly, and its non-current total of 1,703,837,097 plus current total of 3,991,771,113 foot to the same figure. Cross-checked against the FY2025 filing's own comparative column at printed page 2, committed in filings_extract.py, which agrees to the pound on liabilities and prints total assets one pound higher at 5,695,608,211 — the filings' own additive rounding, disclosed rather than reconciled away — "Paid under capital increase", note 17, nil in the comparative column and EGP 1,277,466,100 at 31 December 2024. This is the line the equity roll was missing	2024-12-31
6	capacity_mt	3.8	Company	Alias of cement grinding capacity	2025-03-23
7	capex_run_rate	303.211	Company	Capex on the company's own cash-flow statements: FY2023 120.827, FY2024 526.408, FY2025 262.397, average 303.211. Revision 2 assumed 4.5-5.0% of revenue, which is 435-484mn and rising	2025-12-31
8	cash_fy25	4,762.3487	Company	Cash on hand and at banks at 31 December 2025. Audited statement of financial position at 31 December 2025, printed page 2, from the company's own website. Revision 2 used an aggregator's carry of S&P Global Market Intelligence	2025-12-31
9	cash_mar26	5,801.9817	Company	Cash on hand and at banks, REVIEWED interim statement of financial position as at 31 March 2026, printed page 2. This is the latest disclosed sheet and the bridge stands on it; revision 2 stood on 31-Dec-2025 and rolled it forward on an estimate	2026-03-31
10	clinker_factor	0.6763	Company	Tonnes of clinker per tonne of cement. ANCHORED on the plant register's two capacities (2.57/3.80 = 0.676) but carried as an independent input, because blending is a real operating lever: a lower factor means more cement per tonne of clinker and less fuel per tonne of cement. Deriving it from the capacity pair made kiln capacity cancel out of cement output algebraically — the driver test caught that	2025-03-23
11	cost_distribution_fy25	770.5241	Company	Note 25 'Transfer & loading expenses & renting cars to transport cement' 579.219496 plus 'Export expenses and quality mark' 185.690219, plus note 24's own 'Transfer & loading' 5.614378, FY2025 audited statements for the year ended 31 December 2025, read from the company's own website; committed with its footings in filings_extract.py	2025-12-31
12	cost_fixed_fy25	1,270.9542	Company	The rest of the disclosed cash operating cost: revenue 9,089.149688 less EBITDA 3,455.205144 less the two lines above. It is wages, maintenance, subcontractors, clay resource fees, rents, technical assistance, insurance and general administration across notes 24, 25 and 26. Revision 2 assumed USD 14.60 per tonne of installed capacity = EGP 2,762.9mn, 2.17x the company's actual fixed cost, and that single assumption is most of why its FY2025 backcast came out 355mn light on EBITDA	2025-12-31
13	cost_materials_fy25	3,592.4662	Company	Note 24, 'Raw materials, Supplies, fuel, power, packing sacks', FY2025 audited statements for the	2025-12-31

				year ended 31 December 2025, read from the company's own website; committed with its footings in filings_extract.py. Revision 2 built this from four industry rules of thumb summing to EGP 2,553.7mn, which is -28.9 per cent BELOW the disclosed line, the disclosed line being 40.7 per cent above the assumption	
14	debt_fy25	137.5659	Company	Lease liabilities at 31 December 2025, 111.742265 long-term and 25.823623 current. THE COMPANY HAS NO BANK BORROWINGS. Audited statement of financial position at 31 December 2025, printed page 2, from the company's own website. Revision 2 used an aggregator's carry of S&P Global Market Intelligence	2025-12-31
15	debt_mar26	152.71	Company	Lease liabilities, 137.620919 long-term and 15.089045 current, reviewed sheet at 31 March 2026. THE COMPANY HAS NO BANK BORROWINGS AT EITHER DATE — the whole of its interest-bearing debt is leases under EAS 49	2026-03-31
16	dep_rate_disclosed	0.0386	Company	The BOOK depreciation rate carried forward on gross cost, being note 3/2's disclosed rates at the midpoint of the two ranges, cost-weighted as an arithmetic mean of lives on note 4's own mix. It is used ONLY for the forward book charge, which is what a rate is for. IT IS NOT THE TERMINAL'S USEFUL LIFE and revision 3 used its reciprocal as one: 1/0.038626 = 25.89 years, justified on the grounds that it 'reproduces the filed FY2025 charge to within 1.2% (121.3 against 122.6)'. THAT VALIDATION WAS TWO ERRORS CANCELLING - the 121.3 is an arithmetic-mean rate that understates the disclosed rates' own product of 151.5mn, and the 122.6 includes intangible amortisation against a filed FIXED-ASSET charge of 99.2mn. See useful_lives.json	2025-12-31
17	ebitda_fy24	1,590	Company	FY2024 EBITDA, the one disclosed margin anchor	2026-03-10
18	eq_fy23_rep	-614.0282	Company	Audited independent balance sheet as of 31 December 2024, printed page 5 of the FY2024 audited statements (SCC-AFS-E-1224.pdf), read from the company's own website. ROUTE: OCR off the rendered pixels — that filing carries no text layer at all (zero bytes across its 36 pages), so no extraction confidence exists to trust and ARITHMETIC IS THE ARBITER: the page's own total liabilities of EGP 1,959,808,479 plus its own total equity of EGP 3,735,799,731 foot to its printed total assets of EGP 5,695,608,210 exactly, and its non-current total of 1,703,837,097 plus current total of 3,991,771,113 foot to the same figure. Cross-checked against the FY2025 filing's own comparative column at printed page 2, committed in filings_extract.py, which agrees to the pound on liabilities and prints total assets one pound higher at 5,695,608,211 — the filings' own additive rounding, disclosed rather than reconciled away — total equity at 31 December 2023, the comparative column of the same page. It is NEGATIVE, and the filing's own totals foot: liabilities of 4,116,928,922 plus equity of (614,028,180) give total assets of 3,502,900,742, which is also that column's non-current 1,232,905,958 plus current 2,269,994,784	2023-12-31
19	eq_fy25_rep	6,020.3387	Company	Total shareholders' equity at 31 December 2025, footing across capital, reserves, retained earnings and the year's profit. Audited statement of financial position at 31 December 2025, printed page 2, from the company's own website. Revision 2 used an aggregator's carry of S&P Global Market Intelligence	2025-12-31
20	eq_mar26	7,134.8177	Company	Total equity, reviewed sheet at 31 March 2026	2026-03-31
21	free_float	0.224	Company	The public float, being one less Vicat's holding. DERIVED: 1 - vicat_stake, and it is the share count the same tender offer names (58,416,664 of 260,812,477 = 22.4%), which is the check that the two figures are one fact and not two	2025-07-28
22	gross_fixed_fy25	3,140.8552	Company	Note 4, gross cost of fixed assets at 31-Dec-2025, footing across five classes audited statements for the year ended 31 December 2025, read from the company's own website; committed with its footings in filings_extract.py	2025-12-31
23	mto_price	41	Company	Vicat mandatory tender offer, July 2025. A disclosed reference point and an overhang, never a fair value	2025-07-28
24	pat_fy23	-117.5816	Company	Audited statement of profit or loss for the year ended 31 December 2023 (the comparative column of the FY2024 filing), printed page 3, read from the company's own website and committed with its footings in filings_extract.py. Revision 2 used a trade-press figure relayed from an EGX filing it had not read	2025-12-31
25	pat_fy24	3,072.3618	Company	Audited statement of profit or loss for the year ended 31 December 2024, printed page 3, read from the company's own website and committed with its footings in filings_extract.py. Revision 2	2025-12-31

				used a trade-press figure relayed from an EGX filing it had not read	
26	pat_fy25	2,284.539	Company	Audited statement of profit or loss for the year ended 31 December 2025, printed page 3, read from the company's own website and committed with its footings in filings_extract.py. Revision 2 used a trade-press figure relayed from an EGX filing it had not read	2025-12-31
27	payout	0	Company	Dividend payout from FY2026E. THE FILED EQUITY STATEMENTS SHOW NO DISTRIBUTION AT ALL, twice over and to the pound: equity of EGP 3,735.80mn at 31-Dec-2024 plus FY2025 profit of 2,284.54mn is exactly the filed 6,020.34mn, and that plus the reviewed quarter's 1,114.48mn is exactly the filed 7,134.82mn at 31-Mar-2026. A 60% payout was assumed against a company whose own statements reconcile with none, and an earlier edition called the implied distribution its 'largest single uncertainty' — it dissolves against the record. This changes no valuation number, because free cash flow to the firm is struck before financing; it changes the projected balance sheet a reader is shown	2026-09-04
28	rev_fy23	4,285.4702	Company	Audited statement of profit or loss for the year ended 31 December 2023 (the comparative column of the FY2024 filing), printed page 3, read from the company's own website and committed with its footings in filings_extract.py. Revision 2 used a trade-press figure relayed from an EGX filing it had not read	2025-12-31
29	rev_fy24	6,428.0119	Company	Audited statement of profit or loss for the year ended 31 December 2024, printed page 3, read from the company's own website and committed with its footings in filings_extract.py. Revision 2 used a trade-press figure relayed from an EGX filing it had not read	2025-12-31
30	rev_fy25	9,089.1497	Company	Audited statement of profit or loss for the year ended 31 December 2025, printed page 3, read from the company's own website and committed with its footings in filings_extract.py. Revision 2 used a trade-press figure relayed from an EGX filing it had not read	2025-12-31
31	shares_fy23	133.07	Company	Weighted-average shares FY2023, pre-rights-issue. Corroborated by the 2022 tender offer (56.063mn = 42.12%) and by disclosed EPS	2025-03-16
32	shares_fy24	133.07	Company	Weighted-average shares FY2024. Disclosed EPS of EGP 23.13 on attributable profit implies 132.7mn	2025-03-16
33	shares_fy25	222	Company	Weighted-average shares FY2025, the rights issue having completed during the year	2026-03-10
34	shares_mn	260.8125	Company	260,812,477 shares, corroborated FIVE ways: issued capital EGP 2,608,124,770 at EGP 10 par; the Jul-2025 tender offer of 58,416,664 shares at 22.4%; quoted market capitalisation over price; and the reconstruction 133.07mn pre-issue + 127.74mn subscribed. Revision 1 wrongly described the pre-issue count as 92.61mn by subtracting shares OFFERED (168.20mn) instead of shares SUBSCRIBED (127.74mn, a 75.95% take-up)	2025-07-28
35	swcc_eur	30	Company	EUR 30mn for the 25.40% Sinai White stake, completed 13-Aug-2024	2024-08-13
36	ta_fy24	5,695.6082	Company	Audited independent balance sheet as of 31 December 2024, printed page 5 of the FY2024 audited statements (SCC-AFS-E-1224.pdf), read from the company's own website. ROUTE: OCR off the rendered pixels — that filing carries no text layer at all (zero bytes across its 36 pages), so no extraction confidence exists to trust and ARITHMETIC IS THE ARBITER: the page's own total liabilities of EGP 1,959,808,479 plus its own total equity of EGP 3,735,799,731 foot to its printed total assets of EGP 5,695,608,210 exactly, and its non-current total of 1,703,837,097 plus current total of 3,991,771,113 foot to the same figure. Cross-checked against the FY2025 filing's own comparative column at printed page 2, committed in filings_extract.py, which agrees to the pound on liabilities and prints total assets one pound higher at 5,695,608,211 — the filings' own additive rounding, disclosed rather than reconciled away — total assets	2024-12-31
37	tax_eff	0.32	Company	EFFECTIVE tax rate on the FY2025 closure. Disclosed pre-tax profit of 3,378.7 against profit after tax of 2,298.2 gives 32.0%. Revision 1 used the statutory 22.5% here, which understated every derived operating line	2026-03-10
38	tl_fy24	1,959.8085	Company	Audited independent balance sheet as of 31 December 2024, printed page 5 of the FY2024 audited statements (SCC-AFS-E-1224.pdf), read from the company's own website. ROUTE: OCR off the rendered pixels — that filing carries no text layer at all (zero bytes across its 36 pages), so no extraction confidence exists to trust and ARITHMETIC IS THE ARBITER: the page's own total liabilities of EGP 1,959,808,479 plus its own total equity of EGP 3,735,799,731 foot to its printed total assets of EGP 5,695,608,210 exactly, and its non-current total of 1,703,837,097 plus current	2024-12-31

				total of 3,991,771,113 foot to the same figure. Cross-checked against the FY2025 filing's own comparative column at printed page 2, committed in filings_extract.py, which agrees to the pound on liabilities and prints total assets one pound higher at 5,695,608,211 — the filings' own additive rounding, disclosed rather than reconciled away — total liabilities	
39	useful_life_disclosed	20	Company	THE DISCLOSED USEFUL LIFE behind the terminal maintenance charge, route one: note 3/2, printed page 8 of the audited statements for the year ended 31 December 2025, states MACHINERY at a SCALAR 5% - a 20-year life - and note 4 shows machinery is EGP 2,182.6mn of a EGP 3,140.9mn gross cost, 69.5%, the class that dominates the capacity-based replacement cost this study capitalises. No average across the two disclosed RANGES is required, which matters because the two ordinary ways of blending disagree by a quarter (25.9 years on a cost-weighted mean of lives, 20.7 on the charge-reproducing harmonic mean). The FY2022, FY2023 and FY2024 filings carry the identical table. Read by the fundamental walk-forward of 07-09-2026 into useful_lives.json, route and cross-check recorded there	2025-12-31
40	vicat_stake	0.776	Company	Vicat's holding through Vicat Egypt Cement Industries, from the Financial Regulatory Authority filing of the July 2025 mandatory tender offer for the remaining 58,416,664 shares (22.4%) at EGP 41.00 a share. REGISTERED rather than typed: it is quoted in nine places across the two delivered documents and a figure a reader sees must be computed, not typed, even when its source is an external filing rather than this model	2025-07-28
41	bagged_share	0.7	Industry	Bagged share of Egyptian despatches	2026-08-06
42	domestic_share	0.88, 0.87, 0.86, 0.85, 0.84, 0.83	Industry	Domestic share of despatches	2026-01-01
43	egy_capacity_mt	76	Industry	Egyptian nameplate capacity	2025-10-01
44	egy_cons_mt	54	Industry	Egyptian domestic consumption 2025	2025-10-01
45	egy_exports_mt	18.5	Industry	Egyptian cement and clinker exports 2025	2026-01-01
46	egy_prod_mt	65	Industry	Egyptian cement production 2025	2026-01-01
47	egy_revival_mt	12.6	Industry	Dormant capacity under revival from 2H-2026	2025-10-01
48	fuel_usd_gj	4	Industry	Delivered solid fuel, petcoke/coal ~USD 128/t at ~32 GJ/t	2026-08-06
49	packaging_egp_t	55	Industry	Bag cost per tonne of bagged cement	2026-08-06
50	peer_arcc_pat	3,600	Industry	Arabian Cement FY2025 consolidated profit	2026-03-01
51	peer_mbsc_eps	61.25	Industry	Misr Beni Suef FY2025 EPS	2026-03-01
52	peer_mbsc_evebitda	5.03	Industry	Misr Beni Suef EV/EBITDA as quoted. Carried with a caution: no enterprise value, EBITDA or net-cash figure is published for it, and pairing it with the stated profit implies a 68% EBITDA margin, which no cement company earns	2026-08-06
53	peer_mbsc_mcap	13,730	Industry	Misr Beni Suef market capitalisation	2026-08-06
54	peer_mbsc_pat	3,946	Industry	Misr Beni Suef FY2025 attributable profit	2026-03-01
55	peer_mbsc_pe	3.48	Industry	Misr Beni Suef trailing price/earnings RECOMPUTED as market capitalisation over attributable profit. The 6.44x printed by data providers cannot be reconciled with the market capitalisation printed beside it — 6.44 x 3,946 = 25,412 against a stated 13,730	2026-08-06
56	peer_mbsc_rev	5,700	Industry	Misr Beni Suef FY2025 net sales	2026-03-01
57	power_kwh_t_cement	100	Industry	Specific electrical energy, 90-110 kWh/t cement	2026-08-06
58	price_exp_usd_t	48, 47, 46, 45.5, 45, 45	Industry	Export FOB per tonne, declining because the EU carbon border mechanism raises the landed cost of Egyptian cement into Europe from 2026	2026-01-01
59	rawmat_egp_t	190	Industry	Quarrying, raw meal and additives per tonne of cement	2026-08-06
60	repl_usd_t	130	Industry	Replacement cost per annual tonne of CEMENT capacity, USD 120-150 band	2026-08-06
61	thermal_gj_t_clinker	3.4	Industry	Specific thermal energy, 3.2-3.6 GJ/t clinker for a dry preheater/precalciner kiln	2026-08-06

62	cost_infl	1, 1.16, 1.299, 1.416, 1.522, 1.629	Country	Cumulative local cost inflation index on the EGP cost lines, compounded from the HOUSE calendar ladder — 16.0/12.0/9.0/7.5/7.0 per cent for 2026-2030, sourced to the Central Bank of Egypt's own baseline and its published glide to the target band. Revision 3 typed 14.0/11.0/7.9/6.2/5.5, roughly two points a year below the house path, and no source in this study supported the gap	2026-09-02
63	egp_per_eur_aug24	53.4	Country	EGP per EUR at completion	2024-08-13
64	erp_cds	0.0941	Country	Damodaran Egypt, CDS-BASED, January-2026: mature-market 4.23% + 3.40% x (9.71/6.37) = 9.4127%. Revision 1 cited 'Damodaran, Egypt row' without naming the variant; a checker following that citation lands on the rating-based 13.94%	2026-01-05
65	erp_rating	0.1394	Country	Damodaran Egypt, RATING-BASED, January-2026. The alternative premium basis, published beside the adopted CDS one under. Revision 1 cited 'Damodaran, Egypt row' without naming the variant, and a checker following that citation lands here rather than on the 9.41% actually used	2026-01-05
66	fx	50.25	Country	USD/EGP spot, from the house macro path and not from this study. Revision 3 carried 49.80 for the 6-August-2026 quote and the house path carries 50.25 for the SAME quote on the same date — two numbers for one fact, which is the defect that rule was adopted on. The house figure governs	2026-08-06
67	fx_path	50.25, 55.11, 60.22, 64.04, 67.17, 70.11	Country	USD/EGP path, the HOUSE derived purchasing-power path — relative PPP on the house inflation ladder against long-run United States inflation, read from this house's own committed record and not computed here. Revision 3 derived the same identity from THIS STUDY's own ladder, which was two points a year below the house one, so the pound slid more slowly than the house path says it does: one economy cannot have two inflations, and the currency is where that shows. Raises the EGP cost of imported fuel AND the EGP value of export revenue	2026-09-02
68	g_term	0.07	Country	Terminal growth, DERIVED as the house terminal inflation of 7.0% plus a STATED real growth of ZERO. Revision 3 held 5% against a terminal risk-free rate of 12.5% built on that same 7% inflation — a perpetual REAL DECLINE of about two points a year that nothing in the study disclosed and nothing supports. Real decline in perpetuity stays permitted and must be written down as the real number it is; this study assumes none	2026-09-02
69	power_tariff	2.6	Country	Egyptian industrial electricity tariff after subsidy reform	2026-08-06
70	rf	0.23	Country	Egypt 10-year local-currency government yield, from the HOUSE macro path and not from this study. Revision 3 carried 22.31% at a 21-July quote while the house path carries 23.00% at 6-August: one sovereign, one yield, and the later quote is the right one for a study struck in September. THE QUOTE IS OLDER THAN THE 14-DAY BOUND and is accepted deliberately with its age disclosed in the cost-of-capital record, rather than used quietly	2026-08-06
71	sov_spread_cds	0.034	Country	Egypt CDS-implied sovereign default spread, Damodaran January-2026, CDS column. NETTED OUT of the local risk-free rate so sovereign default risk is not charged twice. One reviewer called this a manipulation; two others cleared it explicitly, and it is Damodaran's own construction — the country premium in the ERP is DERIVED from this same spread	2026-01-05
72	sov_spread_rating	0.0637	Country	Egypt RATING-implied sovereign default spread, Damodaran January-2026, rating column. Published as the alternative basis to the adopted CDS one, never mixed with it: the spread netted out of the risk-free rate and the spread added back through the premium must be the SAME basis or the sovereign is counted one and a half times	2026-01-05
73	tax_stat	0.225	Country	Egypt statutory corporate income tax	2026
74	beta	1	House	ADOPTED AT TIER 3. The own-stock regression against raw_indices/EG/EGX30.csv as at 2026-09-08 -- the published index of the exchange this stock is listed on, resolved by beta_regression.own_stock_beta -- gives 0.5910 with an R-squared of 0.024 over 255 weekly observations, and FAILS the usability gate: the index barely explains this stock's returns. TIER 1 UNAVAILABLE: R^2=0.024 < minimum 0.05 — index barely explains the stock's returns. Tier 2 is a same-country peer beta, and the only other Egyptian cement issuer this repository holds a price library for is ARCC, whose own conforming regression fails the SAME gate (R-squared 0.047) — a peer beta built on an unusable regression is the same unusable number wearing another company's name, so tier 2 cannot be assembled from what is held rather than being skipped. TIER 3 is taken: beta = 1.00, which the conforming regression's own 90% interval [0.134, 1.048] contains. The point estimate of 0.5910 is published beside it and is NOT used. The point estimate is published beside the adopted figure and is not used, and the price of adopting 1.00 rather than	2026-09-08

				the point estimate is computed in the beta sensitivity rather than asserted here. SUPERSEDED: the previous edition justified the same fallback on a 32-name equal-weight COMPOSITE of the covered library (R-squared 0.038) -- the right conclusion reached on a regression against something that is not a market.	
75	capex_pct	0.05, 0.048, 0.047, 0.046, 0.045	House	Capex as a share of revenue. No capital-expenditure disclosure is obtainable	2026-08-06
76	cash_growth_fy25	1	House	RETIRED in revision 2 — cash is now the reported balance, not a rolled derivation. Kept at 1.0 so nothing scales it	2026-08-06
77	cash_yield	0.19, 0.17, 0.15, 0.135, 0.125	House	Yield earned on cash	2026-08-06
78	cash_yield_fy25	0.21	House	Yield earned on cash through FY2025	2026-08-06
79	distribution_egp_t	250	House	Outbound freight and selling per tonne, set above a typical Egyptian plant because El Hassana is distant from the Cairo and Delta demand centres	2026-08-06
80	dna_pct	0.046, 0.045, 0.044, 0.043, 0.042	House	D&A as a share of revenue	2026-08-06
81	erp_term	0.07	House	Terminal equity risk premium, normalised below the crisis level	2026-08-06
82	ev_ebitda_just	4.2	House	Justified EV/EBITDA. Revision 1 used 5.0x anchored on a peer quoted at 5.03x. That anchor does not reproduce: the peer's own market capitalisation over profit gives 3.48x, not the 6.44x printed beside it, and the implied EBITDA margin would be 68% for a cement company. 4.2x is struck between the reproducible peer earnings multiple and the asserted EBITDA multiple, and is disclosed as weakly anchored	2026-08-06
83	ev_t_just	95	House	Justified enterprise value per annual tonne of cement capacity	2026-08-06
84	fixed_usd_t_capacity	14.6	House	Fixed cash cost per tonne of INSTALLED capacity so it does not vanish when volume falls. Industry band USD 10-20/t. 14.60 is the level the FY2025 reconciliation implies against an independently built variable stack — reported, not solved away	2026-08-06
85	kd	0.25	House	PLACEHOLDER — replaced below by the sovereign-plus-spread construction, because a marginal cost of debt is not a free-standing input once the sovereign it must sit above comes from the house path	2026-09-04
86	kd_path	0.25, 0.2143, 0.1857, 0.1643, 0.15	House	Cost-of-debt path; the WACC glide inherits its SHAPE from this	2026-08-06
87	kd_spread	0.02	House	Corporate credit spread over the local sovereign. THE ADOPTED COST OF DEBT IS THE SOVEREIGN PLUS THIS, and the sovereign comes from the house path, so the two cannot disagree. Revision 3 typed 21.50% against a sovereign of 22.31% IN THE SAME FILE — 81bp BELOW the government that taxes it, which this house's standing method refuses outright and which the gate found the hour this record was first committed. The audited statements disclose no rate on the EGP %s of borrowings, so the construction the protocol asks for is sovereign plus spread; 200bp is a STATED judgement and its price is 1 basis point of weighted cost of capital, because the book is 0.5%% of the capital structure	2026-09-04
88	kd_term	0.15	House	Terminal cost of debt, the Egyptian long-run corporate norm	2026-08-06
89	kiln_util	0.71, 0.717, 0.735, 0.753, 0.772, 0.791	House	Kiln utilisation FY2025A then FY2026E-FY2030E	2026-08-06
90	materials_usd_share	0.484	House	The dollar-linked share of the materials line. THE FILING DOES NOT SPLIT IT, so this is an ESTIMATE and is flagged as one: it is the fuel share of revision 2's own four-part stack (458.0 of 946.5 per tonne), which is the only evidenced split available. The rest escalates on the domestic cost path. Sensitised in section 6	2026-08-06

91	nci	120	House	Non-controlling interests deducted in the bridge. Revision 1 omitted them. One reviewer proposed 2,008 (15% of enterprise value) but derived it from nothing; the disclosed evidence — FY2023 group loss 121.42 against an attributable loss of ~117, and FY2024 attributable EPS 23.13 against group profit 3,070 — puts the minority share of profit BELOW 1%. Set at 120 and sensitised	2026-08-06
92	norm_mgn	0.278	House	Mid-cycle EBITDA margin: the midpoint of the FY2024 outturn (24.8%) and the corrected FY2025 peak (30.9%). Revision 1 struck 26.5% off an FY2025 margin understated by the statutory-rate error	2026-08-06
93	norm_rev_haircut	0.92	House	Haircut to the FY2025 revenue base for the normalised lens. Revision 1 applied a mid-cycle MARGIN to a PEAK revenue base — half a normalisation, in the lens whose stated purpose is refusing to capitalise a peak	2026-08-06
94	pe_just	7	House	Justified price/earnings on normalised OPERATING earnings	2026-08-06
95	price_dom_egp_t	3,503, 4,063, 4,551, 4,961, 5,333, 5,706	House	Domestic realised price ex-works. FY2025 is the level the disclosed revenue implies given the volume build — 13.9% below the ~EGP 4,070/t market average, which is what an ex-works price net of freight and rebates looks like. THE REAL SPREAD PER TONNE IS THEN HELD FLAT: price escalates on the HOUSE inflation ladder at zero real growth, the same index the domestic cost lines carry, so the margin is an OUTPUT of the two and neither side carries an inflation number of its own. Revision 3 typed the path, and a typed nominal rate is unfalsifiable — nobody can tell whether 14.0% meant inflation plus nothing or inflation minus two. The path before that grew nominal prices well below the domestic cost path this same model escalates costs on, and the register described it as 'a REAL decline against CBE inflation' while sourcing no mechanism for it. this house's standing method refuses that mechanism on the company's own measurement: cost per unit of revenue FELL across the reviewed quarter pair and the audited year between them, where the forecast needed it to rise, and a mechanism contradicted by the filings is the assumption wearing one. The 12.6Mt of dormant Egyptian capacity queuing to restart is a real risk to price; it belongs in the bear case and the sensitivity grid, which carry it, not in the base path	2026-09-04
96	rf_term	0.105	House	Terminal risk-free rate, READ LIVE from the house macro path rather than typed here: the central bank's operative Q4-2026 inflation target plus the house real-rate convention. TWO EDITIONS OF THIS LINE ARE RETIRED. Revision 1 used the later 5% target while its own text cited 'the 7% and then 5% targets'. Revision 3 typed 12.5% into this file, built on a 5.5pp real convention, and flagged the alternative in its own note as a 'REVIEWABLE CHOICE' worth about 1.8% — which is a defect recorded rather than fixed. The house convention is 3.5%: the retired 5.5pp was a restrictive policy stance, not a long-run real rate, and a perpetuity does not live inside a policy stance. Two readers of one economy must not disagree	2026-09-10
97	stub_years	0.583	House	Elapsed fraction of FY2026 at the valuation date (7 months). Revision 1 discounted FY2026 a full year from a 6-Aug-2026 valuation date and added a 31-Dec-2025 cash balance	2026-08-06
98	swcc_book	100	House	Carrying value of the 25.4% stake. Revision 1 asserted the profit bridge was 'insensitive to it within a +/-EGP 200mn range'. That was FALSE and untested: in revision 1 the chain ran book value -> gain -> SOLVED treasury income -> cash -> every lens, and a +/-200mn move was worth -4.9% to +9.8%. Revision 2 takes cash from the reported balance sheet instead, so this input now touches only the FY2024 gain/treasury split and nothing downstream	2026-08-06
99	treas_fy23	198	House	FY2023 treasury income on its own smaller cash balance	2026-08-06
100	w_asset	0.08	House	Weight, asset lens. Revision 1 gave it 15% while arguing in the same document that restarted lines cost 'a fraction' of new build and that the asset lens 'should not be read as a floor'. Cut to 8%. REVIEWABLE CHOICE: 15% adds ~3.6%, zero subtracts ~2.6%	2026-08-06
101	w_dcf	0.48	House	Weight, cash-flow lens	2026-08-06
102	w_norm	0.23	House	Weight, normalised lens	2026-08-06
103	w_rel	0.21	House	Weight, relative lens	2026-08-06
104	wc_pct_drev	0.08	House	Change in working capital over change in revenue	2026-08-06
105	wd_term	0.2	House	Terminal debt weight, normalised	2026-08-06

2 Source catalogue — the publications and institutions relied on

Source	Type	What it was used for	Reference
Sinai Cement Company S.A.E. — exchange filings	Company filing	FY2023, FY2024 and FY2025 consolidated results; 9M-2025 results; EGM resolutions on the 2024 capital increase; issued-capital and share-count disclosures.	Accessed indirectly through the press outlets below; the primary documents could not be retrieved from the company website or the exchange portal.
Global Cement	Trade press	FY2024 turnaround (net profit EGP 3.07bn against a EGP 121.42mn FY2023 loss; sales EGP 6.42bn from EGP 4.28bn); Egyptian production, consumption, capacity and export volumes; the dormant-capacity revival programme.	globalcement.com
International Cement Review / cemnet	Trade press	Egyptian 2025 production up 18% to ~65Mt; 9M-2025 results; the Cementir acquisition of the Sinai White stake.	cemnet.com
Cementir Holding N.V. / Aalborg Portland Holding A/S	Counterparty disclosure	Acquisition of an additional 25.40% of Sinai White Portland Cement from Sinai Cement for EUR 30 million, completed 13 August 2024, taking Cementir to 96.5%. This is the transaction that resets the FY2024 base.	cementirholding.com
Vicat S.A. — results and regulatory filings	Shareholder disclosure	The 77.6% holding through Vicat Egypt Cement Industries; the July 2025 mandatory tender offer for 58,416,664 shares (22.4%) at EGP 41.00 per share, filed with the Financial Regulatory Authority.	Reported via Reuters and Vicat H1-2025 results

3 Figures that are DERIVED rather than sourced

These do not appear in any source. They are computed, and the method is given so a reader can reproduce or reject each one.

Figure	How it was derived
Share count — 260,812,477	Triangulated three ways and cross-checked: issued capital of EGP 2,608,124,770 at EGP 10 par gives 261; the tender offer of 58,416,664 shares described as 22.4% back-solves to 261; quoted market capitalisation divided by the closing price gives 261. The three agree to within 0.01%. Aggregator prints of 141.46 million are irreconcilable with the market capitalisation printed beside them and are rejected.
FY2024 EBIT, treasury income and the disposal gain	The FY2024 profit bridge is closed against the one disclosed EBITDA figure. Depreciation is taken at 6.2% of revenue, giving EBIT; the disposal gain is EUR 30 million at the August-2024 exchange rate less an estimated EGP 100 million carrying value; treasury income is then whatever remains once disclosed profit after tax is grossed up at the statutory rate.
FY2025 EBIT and EBITDA	Disclosed profit after tax is grossed up at the statutory rate to give pre-tax profit; treasury income on the derived cash balance is deducted to give EBIT; depreciation at 4.6% of revenue is added back to give EBITDA.
The cash balance	No cash figure is separately obtainable. FY2024 cash is inferred as the derived FY2024 treasury income divided by the prevailing deposit yield; FY2025 cash is that balance grown by a stated multiple. This is the least well-evidenced material figure in the valuation and net cash is 37% of the equity value.
Sales volume and realised price	Volume is the Egyptian market size multiplied by the company's share; realised price is then disclosed revenue divided by that volume, so the build reproduces the reported top line exactly in all three historical years.
Terminal return on invested capital	Struck on replacement cost — 3.8Mt at USD 130 per annual tonne — rather than on book invested capital, which implies a nan% return because the plant is carried at 1997 cost through a five-fold devaluation.
Beta — 1.00 adopted	The shares are regressed against raw_indices/EG/EGX30.csv, the published index of the exchange they are listed on, on weekly returns over 4.94 years to 2026-09-03, with a lead and a lag beside the contemporaneous term so that a thinly traded share is not read as insensitive. It returns 0.591 with an R-squared of 0.024 over 255 observations. That R-squared is below the 5% usability floor, so the regression result is NOT used, and a same-country peer beta cannot be built either — the only other Egyptian cement issuer with a price history here fails the same test. 1.00 is adopted at tier 3 and corroborated: it sits inside the regression's own 90% interval of 0.134 to 1.048, and the Blume adjustment carries the point estimate to 0.727. A previous edition regressed against a 32-name equal-weight composite of the covered EGX library, SCEM excluded from its own index, returning 0.485; that regressor is withdrawn.

4 Research trail

The research was carried out on 2026-08-06 across four concentric rings — global, country, industry and company — with 23 recorded findings. Each finding below names the source and the date that source carries.

Ring	Topic	Finding	Source	Date
Global	rate cycle & USD/FX regime	Global easing cycle underway; Fed funds midpoint 3.63% (Jun-2026), which sets the backdrop against which Egypt's own 19.00% policy rate normalises	US Federal Reserve, Federal Open Market Committee policy decisions and the published target range history	2026-06-18
Global	commodity complex (input/output)	Cement is an energy-conversion business: coal/petcoke and electricity are the dominant cash cost. Egypt's phased energy-subsidy reform keeps raising the local energy bill independent of the global fuel price	Egypt Cement Industry Market Size & Forecast Report 2020-2029 (production faces pressure from energy reform, currency volatility and raw-material management)	2026-02-16
Global	global sector demand	Cement is a non-traded-at-distance commodity — bulk sea freight limits the economic export radius, so global demand reaches SCEM only through the Mediterranean/East-African export basin, not through a world price	Global Cement, Egypt country update	2025-10-01
Global	trade / sanctions / supply chains	Egyptian cement exports fell ~6% y/y to 18.5Mt in 2025, but the MIX inverted: finished-cement exports +66.6% to 12.5Mt while clinker exports fell ~38%	Global Cement — Egyptian cement exports decline	2026-01-01
Country	sovereign macro (inflation, policy rate, FX/deval risk)	CBE main operation rate 19.50%, held since 2 Apr 2026. Headline inflation eased to 14.6% in May-2026 (core 13.8%); CBE's own Q4-2026 target is 7% (+/-2pp) and it expects the target to be missed on average in Q4-2026 before declining from Q1-2027	Central Bank of Egypt — policy rate and Monetary Policy Report Q1-2026; CPI release	2026-06-10
Country	sovereign macro (inflation, policy rate, FX/deval risk)	Egypt 5-year CDS ~330bp (May-2026), materially tighter than the 2024 crisis peak	Egypt 5Y CDS series	2026-05-31
Country	regulatory environment (regulator, caps, tariffs, tax/subsidy)	The Egyptian Competition Authority PERMANENTLY lifted cement production quotas in July 2025 (suspended from May 2025). The quota regime had capped output since 2021	Egyptian Competition Authority, reported via EnterpriseAM / Global Cement	2025-07-01
Country	regulatory environment (regulator, caps, tariffs, tax/subsidy)	Egypt corporate income tax 22.5%, unchanged	PwC Worldwide Tax Summaries (house Cost-of-Capital reference)	2026-01-01
Country	fiscal / political events with sector read-through	State-led housing, industrial and transport programmes are the marginal buyer of Egyptian cement; domestic consumption rose 13.4% to 54Mt in 2025 on that programme	Global Cement — Update on Egypt	2025-10-01
Industry	demand drivers & capacity/supply balance	2025 was the first year since 2008 that Egypt's cement supply-demand gap closed: domestic consumption 54Mt (+13.4% from 47.6Mt), production ~65Mt (+18% from 55Mt), operating utilisation ~98% against a nameplate 76Mt/yr across 46 lines	Global Cement / cemnet (International Cement Review) — Egypt 2025 production	2026-01-01
Industry	new entrants (named-competitor level)	Seven to nine dormant production lines are under study for revival, potentially adding 12.6Mt of supply from 2H 2026 -- ~23% of 2025 domestic consumption, landing INSIDE the explicit forecast window	Global Cement — Update on Egypt	2025-10-01
Industry	pricing	Egyptian cement prices roughly doubled to ~USD 81/t (EGP 3.9k) in 2025 from ~USD 50/t (EGP 2.1k) a year earlier, then are estimated to normalise to EGP 3,600-3,620/t in 2026e on ~1% higher demand and higher costs	EnterpriseAM Egypt — how Egypt's cement industry fared in 2025 and what's next	2026-01-01
Industry	technology substitution	No material substitution threat to Portland cement in Egyptian construction over the forecast horizon; the live technology question is decarbonisation capex (alternative fuels, clinker factor), which is a cost/capex item rather than a demand substitution	Global Cement sector coverage	2025-10-01
Industry	competitor capacity / price moves (named)	Named listed EGX peers all posted the same 2025 step-change: Misr Beni Suef (MBSC) attributable profit +373.7% to EGP 3.946bn on sales of EGP 5.700bn,	Arab Finance / EGX filings for MBSC and ARCC	2026-03-01

		EPS EGP 61.25, trailing P/E 6.44 and EV/EBITDA 5.03 on a EGP 13.73bn market cap; Arabian Cement (ARCC) FY2025 consolidated profit ~EGP 3.6bn (H1-2025 alone +305.5% to EGP 1.405bn)		
Company	one-off base-resetting transactions	SCEM sold its 25.40% stake in Sinai White Portland Cement to Aalborg Portland Holding (Cementir) for EUR 30m; completed 13 Aug 2024, taking Cementir to 96.5% of SWCC	Cementir Holding N.V. corporate announcement; cemnet/ICR	2024-08-13
Company	ownership / stake changes (named-transaction rule)	Vicat, via Vicat Egypt Cement Industries, holds 77.6%; in Jul-2025 it filed a mandatory tender offer for the remaining 58,416,664 shares (22.4%) at EGP 41.00/share	FRA filing reported via Reuters/TradingView; Vicat H1-2025 results	2025-07-28
Company	management & capital actions	Feb-2024 EGM raised authorised capital to EGP 10bn and issued capital by EGP 1.68bn; 168.20m shares offered, 75.95% (127.74m) taken up by senior shareholders in phase 1. Issued capital now EGP 2,608,124,770 at EGP 10 par = 260,812,477 shares	Sinai Cement EGM resolutions and capital-increase announcements via EGX	2024-07-01
Company	official financial statements	FY2023-FY2025 consolidated: revenue EGP 4.28bn / 6.42bn / 9.09bn; net profit after tax EGP -121.4m / +3,070m / +2,290m; FY2024 EPS attributable EGP 23.13 (FY2023 -0.88 restated); 9M-2025 net profit EGP 1.53bn	EGX filings reported by Global Cement, cemnet/ICR, Daily News Egypt and Arab Finance	2026-03-10
Company	regular disclosures	Balance sheet: FY2024 total assets EGP 6,385.9m against total liabilities EGP 1,610.9m (equity EGP 4,775.1m -- the triple closes exactly). Latest reported total debt EGP 36.8m against ~EGP 5.2bn equity, i.e. debt/equity 0.7% and a NET CASH position	EGX filings via aggregated financial summaries	2026-03-10
Company	strategic plans & guidance	SCEM operates two lines at El Hassana, North Sinai, ~3.8Mt/yr cement capacity, and reported lifting its market share to ~5% of the Egyptian market	Company profile and FY2024 results commentary via Daily News Egypt / Global Energy Monitor plant register	2025-03-23

Searches that returned nothing

Recorded because an absence of evidence shaped the model as much as the evidence did.

Topic	What was searched for
