Air Arabia PJSC — Bibliography and input register

Companion to the valuation study of 9 August 2026 · Testahil · educational analysis, not investment advice

READ FIRST. Every number in the study and the workbook traces to a row in this document. Section 1 lists the primary documents actually read; section 2 is the full input register — every model input with its value, source, and the date the source itself carries — grouped by research layer; section 3 lists the judgement calls and what evidence would overturn each; section 4 records searches that returned nothing, and one inconsistency found inside a primary document. Layers: COMPANY (the company's own filings and presentations), COUNTRY (UAE official data), INDUSTRY (aviation-sector references), MARKET (traded prices), HOUSE (this study's own judgement, always built on the sourced layers beneath it).

1 Primary documents

Document	Publisher / auditor	Date	What was taken from it
Audited consolidated financial statements FY2025	Air Arabia PJSC / KPMG Lower Gulf (unqualified)	13-Feb-2026	The FY2025 income statement, balance sheet, cash flow and all notes; the RESTATED FY2024 comparatives and restated 1-Jan-2024 position (Note 43); revenue disaggregation (28a); the 11-line direct-cost stack (29); fixed deposits at 4.41% (17); leases at 4% average (25); borrowings incl. the AED 849.6mn aircraft loan (26); tax under the 15% minimum-tax regime (27); JV/associate detail per investee (12); the 120-aircraft order advances (7); segments (39)
Audited consolidated financial statements FY2024	Air Arabia PJSC (approved 13-Feb-2025)	13-Feb-2025	FY2024 as reported and the FY2023 comparative income statement, cash flow and direct-cost note (scanned document, machine-read; every used figure cross-checked against typed comparatives)
Audited consolidated financial statements FY2023 and FY2022	Air Arabia PJSC	2024 / 2023	FY2023 and FY2022 statements (fourth audited year of context); dividends paid history
Q1-2026 condensed interim financial information (reviewed)	Air Arabia PJSC / Grant Thornton UAE	13-May-2026	The study year's only disclosed quarter: revenue 1,800.4, net profit 278.1, the March airspace-closure impact
Results presentations Q4-2022 through Q1-2026	Air Arabia PJSC investor relations	2023–2026	Passengers, load factor, all-hub traffic, fleet count, destinations, operating-profit tables — unit data no financial statement carries
AGM press release	Air Arabia PJSC	12-Mar-2026	The 30-fils FY2025 dividend approval (AED 1.4bn) and board election
First A320neo delivery release	Air Arabia PJSC	29-Sep-2025	Order composition (73/27/20), first delivery, CFM LEAP engines, 174 seats
UAE dirham T-Bond auction results	UAE Ministry of Finance	May / Jul-2026	The AED sovereign anchor: January-2031 tranche 4.30% (May), 4.48% (July), 4–14bp over US Treasuries
Base-rate decision	Central Bank of the UAE	29-Jul-2026	Base rate held at 3.65%; the deposit-yield and financing-rate paths
Quarterly Economic Review	Central Bank of the UAE	Mar-2026	UAE growth ~5.6% and inflation ~2% — the escalator for airport-tariff-class costs
Country risk dataset	A. Damodaran, NYU Stern	05-Jan-2026	UAE row: Aa2, 0.42% default spread, 4.87% equity risk premium; the UAE sovereign-swap column is not published (stated, not substituted)
Jet Fuel Price Monitor; industry outlook	IATA	Jun–Aug-2026	Jet fuel $158.77/bbl (early Aug-2026); the association's 2026 assumption (jet $152, Brent $95); Middle East traffic −11.4% in 2026
Short-Term Energy Outlook	US Energy Information Administration	07-Jul-2026	Brent $81.91 (2026) → $64.76 (2027) — the base-case fuel path
Passenger statistics 2025	Sharjah Airport Authority	Jan-2026	19.48mn passengers, +13.9% — the home hub's growth

Dubai Financial Market price history	DFM via uploaded export	07-Aug-2026	The share-price series 2011–2026 (3,908 sessions) for the price map, beta and technicals
FTSE ADX General Index history, 2011–2026	Investing.com (aggregator, index only)	24-Jul-2026	The ADOPTED regression index for beta — the series this share is measured against, one UAE market proxy standing in for the other because no Dubai general-index series is held for this purpose. Market data only, never a source for company figures
DFM General Index history	Yahoo Finance (aggregator, index only)	16-Jul-2026	The CROSS-CHECK regression index: the same beta regression against a Dubai index series. Higher explanatory power on this share, and published in full beside the adopted figure
Quarterly Economic Review, June-2026 edition	Central Bank of the UAE	30-Jun-2026	The CURRENT 2026 projection: real GDP +1.7% (2027: +9.8%), inflation 2.3% — replacing the stale March-2026 vintage an earlier draft cited
2025 GDP outturn release	UAE Federal Competitiveness and Statistics Centre	30-May-2026	Real GDP +6.2% in 2025, non-oil +6.8% — the outturn, replacing a forecast vintage
Daily par yield curve	US Department of the Treasury	07-Aug-2026	5-year US Treasury at 4.35% — the peg-consistency check on the AED risk-free construction
Ryanair FY26 results and Q1-FY27 report	Ryanair Holdings plc	May / 26-Jul-2026	EBITDA €3,747.6mn (operating profit + depreciation), 1,039.2mn shares, €2.7bn net cash — the 6.5× peer multiple from the primary filings
Wizz Air FY2026 final results	Wizz Air Holdings plc	11-Jun-2026	EBITDA €1,318.3mn and net debt — the peer multiple previously suppressed as n/m
Interim IFRS financial statements	Pegasus Hava Taşımacılığı A.Ş.	2026	Euro functional currency, no inflation restatement — correcting an earlier basis label
AGM dividend release for FY2021	Air Arabia PJSC	11-Mar-2022	The 8.5-fils FY2021 dividend — the base of the ladder, previously misstated as a 5-fil step

2 The input register — every input, value, source and date, by layer

Company layer — 126 inputs

Input	Value	Date	Source and construction
shares mn	4,666.7	2026-02-13	Share capital note 18, audited FY2025 consolidated financial statements, KPMG Lower Gulf, unqualified opinion 13-Feb-2026, airarabia.com investor relations: 4,666,700 thousand shares of AED 1 each, authorised, issued and fully paid, unchanged since FY2022
tax eff	0.15	2026-02-13	Forecast effective rate held AT the 15% DMTT statutory rate. Audited effective rates: FY2024 8.79%, FY2025 11.60% (Note 27a reconciliation — the sub-15% prints reflect exempt income and the 9%-era opening); Q1-2026 provides at 15%. Holding 15% is the conservative statutory anchor rather than extrapolating the lower realised prints

fuel intensity	1.937	2026-08-10	Fuel intensity, AED per passenger per USD/bbl of effective jet price: FY2025 audited fuel cost/pax 172.4 (Note 29 / presentations) over the ~USD 89/bbl 2025 market average (IATA) = 1.937. Held flat — the neo's ~20% lower burn is an upside not credited
fleet cons	fy25_end=56; ends=[58, 61, 64, 68, 72]; owned_adds=[1, 1, 1, 2, 2]; leased_adds=[1, 2, 2, 2, 2]; ac_cost_owned=184; ac_rou=175; ...	2026-08-10	CONSOLIDATED fleet block (Sharjah + Ras Al Khaimah): YE2025 = 56 aircraft per the company's own FY2025 presentation fleet allocation (Sharjah 54, RAK 2; the 90 total is GROUP-wide incl. the JV hubs). Forward: 16 net additions to ~72 by FY2030 (within the 120-aircraft order and Airbus's constrained output), split ~7 owned / ~9 leased at ~AED 184mn owned cost (~USD 50mn A320neo family net) and ~AED 175mn right-of-use inception value per leased aircraft; owned units loan-financed ~AED 150mn each (FY2025 actual: AED 849.6mn for 5 = 170/unit). The owned/leased split remains UNDISCLOSED — flagged and sensitised
kd booked path	[0.031, 0.033, 0.035, 0.036, 0.037]	2026-08-10	BOOKED blended finance-cost rate on the rolling gross debt book: FY2025 effective 2.73% (finance costs 66.7 / average gross debt), rising as new leases (~4%, Note 25) and new aircraft loans (~marginal 5.4%) replace older cheaper layers
debt amort	[500, 520, 540, 560, 580]	2026-08-10	Scheduled repayments of borrowings + lease principal (FY2025 actuals: 393.7 borrowings repaid + 248.1 lease principal ≈ 642 gross; forward net of refinancing ~500-580/yr)
kd	0.055	2026-08-09	Marginal AED cost of debt: the AED sovereign 4.48% (Jan-2031) plus ~100bp unsecured corporate allowance for an unrated but NET-CASH flag carrier affiliate. Evidence table: FY2025 lease book carries an average 4% finance charge (Note 25, SECURED on aircraft — a floor, not the marginal unsecured rate); the FY2025 aircraft loan was similarly secured; deposits EARN 4.41%. 5.5% sits above the sovereign, above the secured book, and above the deposit rate, as it must
nci book	1.287	2026-02-13	Non-controlling interests at audited carrying value, 31-Dec-2025 — the correct deduction basis (the prior profit-share-ratio proxy deducted 2.9)

Country layer — 9 inputs

Input	Value	Date	Source and construction
tax stat	0.15	2026-02-13	UAE Domestic Minimum Top-up Tax (DMTT) 15% effective 1-Jan-2025 for Pillar-Two-scope groups; the Group provides at 15% (Note 27, FY2025 filing). 9% UAE CT applied in FY2024
landing per pax	[36.7, 37.4, 38.2, 38.9, 39.7]	2026-08-09	Landing and overflying charges per passenger, AED, +2%/yr on FY2025's 36.0 — airport-tariff class escalator (UAE CPI ~2%, CBUAE QER)
handling per pax	[30, 30.6, 31.2, 31.8, 32.4]	2026-08-09	Passenger, ground and technical handling per passenger, AED, +2%/yr on FY2025's 29.4 — same tariff-class escalator, separate line

dep rate path	[0.041, 0.038, 0.037, 0.037, 0.037]	2026-08-09	Yield on cash + fixed deposits: FY2025 disclosed average 4.41% (Note 17), rolled down with the CBUAE base-rate path (3.65% held 29-Jul-2026, Fed flat-to-easing bias)
rf	0.0448	2026-07-30	AED sovereign anchor: UAE Ministry of Finance dirham T-Bond auction, July-2026 — January-2031 tranche YTM 4.48% (4bp over comparable UST; May-2026 auction: 4.30%). The LOCAL-currency government bond, per the standing rule, not a USD proxy
sov spread obs	0.0004	2026-08-10	The OBSERVED default spread embedded in the AED sovereign yield actually used: the July-2026 MoF auction priced the January-2031 tranche 4bp over comparable US Treasuries (May-2026: 14bp). Netting THIS spread — not the 42bp rating-table spread — keeps the risk-free rate currency-consistent under the 1:1 peg (UST 5-yr 4.35% on 07-Aug-2026, US Treasury daily curve): 4.48% - 0.04% = 4.44% > 4.35%. Adopted after external critique; the rating-basis netting (4.06%) is published as the alternative construction
sov spread rating	0.0042	2026-01-05	Damodaran adjusted default spread, United Arab Emirates row (Moody's Aa2), original ctryprem file last updated 5-Jan-2026. Netted out of the local yield so sovereign risk is not double-counted
erp rating	0.0487	2026-01-05	Damodaran total equity risk premium, UAE row, rating basis (mature 4.23% + CRP 0.64%), 5-Jan-2026 file. The CDS column for the UAE is NA in the same file, so the rating basis is the ONLY published construction — both-bases publication is therefore rating + a stated NA, not two numbers
erp cds	not published	2026-01-05	UAE sovereign CDS column: NA in Damodaran's January-2026 file — no CDS-basis ERP exists to publish; stated plainly rather than substituted

Industry layer — 4 inputs

Input	Value	Date	Source and construction
jet eff base	[100.7, 85.2, 86.9, 88.6, 90.4]	2026-08-10	EFFECTIVE (hedge-blended) jet fuel price path, USD/bbl — the study's CENTRAL CONTESTED JUDGEMENT, priced BOTH ways (see jet_eff_alt). BASE = the EIA-curve framing: 2025 market average ~USD 89/bbl (IATA); H1-2026 spiked (IATA monitor USD 158.77 early Aug-2026) but the book is partly hedged 2026-2028 (Note 24 swaps/collars; RATIOS undisclosed — flagged) and Q1-2026's realised margin shows nothing like a spot-price hit; EIA July-2026 STEO Brent 81.91 (2026) -> 64.76 (2027) then a mild crack-normalised drift. Fuel cost per passenger = intensity x this path — its own commodity escalator, never a CPI proxy
jet eff alt	[108.4, 105.8, 106.4, 107.5, 108.5]	2026-08-10	The ALTERNATIVE fuel framing: IATA's June-2026 high-fuel view persists through the hedge blend — no EIA-style relief. Published side by side with the base everywhere the base appears
ev ebitda just	6.5	2026-08-10	Justified EV/EBITDA on mid-cycle FY2027E EBITDA EXCLUDING the fee/other-income stream (valued separately — basis matched to how peer multiples are computed). Peer set rebuilt from PRIMARY filings after external critique: Ryanair 6.50x (FY26 EBITDA EUR 3,747.6mn = op profit 2,374.2 + dep 1,373.4; 1,039.2mn shares and EUR 2.7bn net cash per the Q1-FY27 report), Wizz ~4.75x (FY26 EBITDA 1,318.3), easyJet ~3.5x, IndiGo 11.1x, Pegasus ~6.6x (EUR-functional IFRS) -> median 6.5x. Bear 5.0x / bull 8.0x
pe just	13	2026-08-09	Justified through-cycle P/E on normalised earnings. Peers: Ryanair 12.6x, easyJet 12.4x, Jazeera ~17.7x computed, Damodaran profitable-airlines 12.87x. 13x reflects a structurally profitable LCC with net cash and a growing equity-accounted network. Bear 10x / bull 16x

Input	Value	Date	Source and construction
pax path	[12.85, 13.95, 15.15, 16.35, 17.55]	2026-08-09	Consolidated passengers, millions, FY26E-FY30E. FY2026 -1.6%: Q1-2026 actual -11% y/y on the Feb-Mar airspace closures, phased restoration to ~1-Jun (IATA and route-restoration coverage), H2 growth on nine-plus neo deliveries. Thereafter +8.6/+8.6/+7.9/+7.3% — fleet-led (90 -> ~115 by FY2030 out of the 120-aircraft order, Airbus delivery constraints acknowledged) at broadly held load factor ~85-86% (FY2025: 85.3%; Q1-2026 record 86.4%). Seat/ASK-level data is NOT disclosed — pax x load factor is the finest sourced level; FLAGGED
fare path	[488, 480, 484, 489, 494]	2026-08-09	Passenger + baggage revenue per consolidated passenger, AED. History: 499.1 (FY23, as-reported basis), 494.9 (FY24 restated), 478.7 (FY25). FY2026 +1.9%: Q1-2026 revenue held +1% on -11% pax (constrained capacity lifted yields); FY2027 -1.6% as regional capacity restores; +1%/yr thereafter — LCC yield discipline, no real fare growth assumed
anc path	[67.4, 70.1, 72.9, 75.8, 78.8]	2026-08-09	Ancillary ('other airline related services') revenue per passenger, AED, +4%/yr from FY2025's 64.8 (FY2024: 60.4, FY2023: 46.4) — the disclosed history's own trend, tapered
cargo g	[0.05, 0.05, 0.05, 0.05, 0.05]	2026-08-09	Cargo revenue growth on FY2025's 186.9 — belly-capacity grows with the fleet
svc g	[0.04, 0.04, 0.04, 0.04, 0.04]	2026-08-09	Service revenue growth on FY2025's 223.3 (ground handling, training, IT services to the JV network)
hotel g	[0.03, 0.03, 0.03, 0.03, 0.03]	2026-08-09	Hotel operations growth on FY2025's 59.8 (Centro Sharjah + Radisson Blu Dubai Marina)
lease g	[0.1, 0.1, 0.08, 0.06, 0.05]	2026-08-09	Aircraft-lease-rental revenue growth on FY2025's 219.8 — the leased-out fleet (17 aircraft to JV airlines) grows with Abu Dhabi's ~40% capacity expansion, Fly Jinnah, Egypt at the raised 49%, and the Saudi DMM launch
staff per pax	[84.4, 86.9, 89.5, 92.2, 94.9]	2026-08-09	Direct staff cost per passenger, AED, +3%/yr on FY2025's 81.9 (FY2024: 78.9, FY2023: 76.6) — UAE aviation wage drift, its own labour escalator, partly offset by scale
maint per pax	[63.8, 66.3, 69, 71.7, 74.6]	2026-08-09	Maintenance cost per passenger, AED, +4%/yr on FY2025's 61.3 (FY2023: 43.4 — the step-up is the ageing ceo fleet plus sector-wide MRO inflation; neos relieve it only gradually). Its own MRO escalator
other per pax	[41.5, 41.5, 41.5, 41.5, 41.5]	2026-08-09	Other direct costs per passenger (other operating 30.4 + wet-lease 9.1 + insurance 1.2 + amortisation 0.8, FY2025), AED, held FLAT: the FY2025 wet-lease spike (118.5 vs 15.0 in FY2024) unwinds as owned neos arrive, absorbing the other lines' inflation
ga g	[0.05, 0.05, 0.05, 0.05, 0.05]	2026-08-09	Cash G&A growth (FY2025 cash G&A = 316.3 less 40.1 depreciation = 276.2) — scale plus wage drift
sm pct	0.0146	2026-08-09	S&M held at FY2025's 1.46% of revenue (FY2024: 1.53%)
dna path	[720, 810, 900, 980, 1,060.0]	2026-08-09	Depreciation and amortisation, AED mn, FY26E-FY30E — grows with the OWNED fleet: FY2025's 621.8 steps up as loan-financed neo deliveries (5 in FY2025, ~3-4/yr assumed owned henceforth) enter the depreciable base; leased deliveries enter ROU depreciation similarly. Fleet-driven, not a revenue ratio
capex path	[2,000.0, 1,900.0, 1,900.0, 1,950.0, 2,000.0]	2026-08-09	Fleet capex including pre-delivery payments, AED mn. FY2025 actual: 2,327.6 (a catch-up year: 5 owned aircraft + PDP build). Forward: ~3-4 owned aircraft/yr at ~AED 185mn each plus a continuing PDP ladder on the 120-aircraft order; leased deliveries (the majority) do NOT pass through capex (additions to lease liabilities: 472.2 FY2025, 538.9 FY2024). The owned/leased delivery split is NOT disclosed — FLAGGED as the build's weakest driver and sensitised heavily
nwc pct	-0.64	2026-08-09	Operating working capital as a share of revenue, held at the historical band: (inventories + current receivables) less (current payables + deferred income + maintenance provisions + staff benefits) = -65.3% (FY23), -62.2% (FY24), -66.6% (FY25) of revenue. An airline sells tickets before it flies and accrues maintenance/end-of-service liabilities — growth RELEASES cash. -64% is the three-year centre, not the best year
assoc g	[0.02, 0.18, 0.18, 0.15, 0.12]	2026-08-09	Share-of-JV/associate-profit growth path on FY2025's 189.975: FY2026 held near-flat (the JV hubs absorbed the same H1 disruption; Air Arabia DMM start-up costs begin), then +18/+18/+15/+12% as Abu Dhabi (+40% capacity plan), Fly Jinnah, Egypt (49%) and DMM ramp. The 100%-basis FY2025 P&Ls (Note 12) grew 77% (Abu Dhabi) and 80% (Jinnah) y/y

other g	[0.08, 0.08, 0.08, 0.07, 0.06]	2026-08-09	Other-income growth on FY2025's 197.1 (management fees from the JV network 86.9 + misc) — fee income scales with JV activity
payout	[1, 0.9, 0.85, 0.85, 0.85]	2026-08-09	Dividend payout on attributable profit: FY2025's AED 0.30/share = 86% of EPS 0.35, DPS raised 5 fils every year since FY2022 (0.15/0.20/0.25/0.30). FY2026 held at 0.30 (100% of a dip-year EPS, funded by net cash), then ~85-90%
beta used	0.812	2026-08-17	Tier-1 OWN-STOCK regression against the index the binding beta rule RESOLVES for this stock's exchange, not one this study picked: market_index_path('AE','DFM') -> FTSE ADX General (FADGI). 5-year weekly window to 24-Jul-2026: beta 0.812, R-squared 0.135, n=260, SE 0.128, CI90 [0.60, 1.02] — clears the usability gate. The exchange is DFM on primary evidence (FY2025 statements Note 1; FY2025 annual report; Q1-2026 interim Note 1) and the market code alone does not resolve, since AE spans ADX and DFM. FADGI applies under a REGISTERED INTERIM SUBSTITUTION (no DFM General series is registered); the note is quoted in full in the report, as an interim regressor requires.
beta alt benchmark	1.086	2026-08-17	CROSS-CHECK, published not adopted: the same own-stock 5-year weekly regression against a DFM General series (DFMGI) held in the repo but NOT registered as a regressor — beta 1.086, R-squared 0.402, n=258, SE 0.083, CI90 [0.95, 1.22]. It has the higher explanatory power, and registering it is exactly the amendment the interim note anticipates ('replace with a DFM index when one is supplied') — but that amendment travels on its own branch with both protocol files in sync, so until it lands this is a priced cross-check, not the basis. An earlier edition of this study adopted it; corrected here
kd path	[0.054, 0.052, 0.051, 0.05, 0.05]	2026-08-09	Forward marginal Kd, easing ~50bp with the Fed/CBUAE path over five years — the discount-rate glide takes its shape from this path by construction
kd term	0.05	2026-08-09	Terminal AED cost of debt: long-run UAE sovereign norm ~4.0% + 100bp corporate spread
rf term	0.04	2026-08-09	Terminal risk-free rate, norm-built: ~2% UAE/US long-run inflation (CBUAE projects 1.8-2.0%) + ~2pp real — the mature-market neutral-rate convention for a hard-pegged currency. Never a historical average, never backed out of a price
erp term	0.0475	2026-08-09	Terminal equity risk premium: between the mature-market 4.23% and today's UAE 4.87% — the Aa2 country premium is small and kept
wd term	0.1	2026-08-09	Terminal debt weight D/(D+E) on a GROSS basis, ~today's 10.2% gross weight held: the airline runs structurally net-cash but carries secured aircraft debt and IFRS-16 leases permanently
g term	0.025	2026-08-09	Terminal growth 2.5%, AED-nominal against a 4.0% terminal risk-free that embeds ~2% inflation — about 0.5pp real, for a carrier whose home market (Sharjah 19.5mn airport pax +13.9% in 2025) is still structurally growing. Sensitised 1.5-3.5%
roe sust	0.18	2026-08-09	Sustainable return on equity for the book lens. Trailing ROE on average attributable equity: 19.9% (FY2025), 18.9% (FY2024) — struck slightly below the record year
jv pe	15	2026-08-09	Capitalisation multiple for the JV/associate airline network in the ALTERNATIVE bridge framing: the share of profit (189.975, growing double-digit) at 15x — a growth-LCC multiple in line with Jazeera and above the mature peers. The BASE framing carries the audited carrying value 363.386 instead. THE CONTESTED JUDGEMENT, published both ways, never averaged
lens weights	dcf=0.45; relative=0.2; normalized=0.2; book=0.15	2026-08-09	DCF primary for an operating airline with a disclosed unit history; relative and normalised secondary; book least — an airline's book equity understates a slot/brand/JV franchise
anchor days	219	2026-08-09	Days from the DCF construction date (31-Dec-2025, the audited balance-sheet date) to the anchor 7-Aug-2026. All lens values are rolled to the anchor at the cost of equity, net of the AED 0.30 FY2025 dividend paid inside the window

3 Judgement calls — and what would overturn each

Judgement	What was decided	What would overturn it
The fuel path (dual-framed)	Base follows the official US energy-agency curve (relief from 2027); the airline association's high-fuel assumption is priced in full as the alternative	Two consecutive quarters of realised jet fuel above ~$150/bbl would make the high-fuel framing the base
Which market index the beta is measured against	The FTSE Abu Dhabi general index. The listing itself is Dubai — note 1 of the 2025 statements, the 2025 annual report and the Q1-2026 interim all state it, and the company is Sharjah-domiciled with portfolio holdings on both exchanges, so the venue was read off the filing rather than inferred. No Dubai general-index series is held for measuring betas, so this share stands on the Abu Dhabi index like every other company measured this way. The Dubai-index regression is the cross-check: a HIGHER beta (1.086 against 0.812) and a LOWER value (AED 3.51 against 4.35 on the cash-flow lens), published in full	A Dubai general-index series being adopted for this purpose would replace the measurement outright — on this share it is the stronger fit (R^2 0.40 against 0.14) and it is already computed and published here, so the substitution is the open question, not the arithmetic
The JV network (dual-framed)	Base carries the audited AED 363mn carrying value; the alternative capitalises the AED 190mn profit share at 15×	Consolidated disclosure, a venture dividend policy, or a Saudi launch date would justify promoting the capitalised framing
Passenger path −1.6% then +8–9%/yr	Q1-2026 actual (−11%) plus phased airspace restoration, then fleet-led growth at held ~85–86% load factor	H1-2026 passengers below ~5.9mn consolidated, or a load factor below 84%, would cut the recovery slope
Fare give-back in FY2027 (−1.6%)	The Q1-2026 yield spike is treated as scarcity pricing that regional capacity will compete away	Yields holding through two post-restoration quarters would remove the give-back
Fleet capex ~AED 1.9–2.0bn/yr	Approximately 3–4 owned aircraft a year plus the pre-delivery ladder; the owned/leased split is NOT disclosed and this is the build's weakest driver — sensitised ±30%	Any financing-plan disclosure for the neo ramp
Tax at the statutory 15%	Above the realised 8.8–11.6% prints — deliberate conservatism under the new minimum-tax regime	A third year of a sub-12% effective rate with a disclosed structural driver
Sustainable return on equity 18%	Below the 19.9% record year, which carried a scarcity-yield tailwind	Two more years above 20% through a normal capacity environment
Working capital at −64% of revenue	The three-year audited centre, not the best year	A structural change in ticket-sale timing or maintenance-provision policy
Justified multiples 7.5× / 13×	The global LCC centre, above the mature Europeans, below Jazeera	A durable re-rating of the sector, or Air Arabia losing its net-cash position
Terminal growth 2.5% against a 4.0% terminal risk-free	About half a point real for a still-growing home market	Sharjah airport capacity saturating without a second-hub answer

4 Negative results, and one discrepancy inside a primary document

What was searched for	Outcome (dated 09-Aug-2026)
Seat capacity / available seat-kilometres / stage length, any document	Not disclosed anywhere in four years of filings or presentations — passengers × per-passenger rates is the finest level the company's own record supports; said in the study
Fuel hedge ratios or hedged volumes	The accounts disclose instruments and fair values to 2028 but never the hedged share

Owned-versus-leased split of forward aircraft deliveries	Not disclosed; the capex driver is an assumption and is flagged as the weakest in the build
A UAE sovereign credit-default-swap premium in the January-2026 country dataset	The dataset publishes no UAE value in that column — the rating basis is the only published construction and is used alone, stated openly
Q2/H1-2026 results	Not yet published as of 9 August 2026 — the first catalyst to watch

Discrepancy recorded, not repaired: in the FY2025 filing's restated FY2024 revenue disaggregation, the six contract-revenue lines sum to total revenue (AED 6,765.9mn) while the printed contract-revenue subtotal is AED 6,616.4mn — the aircraft-lease-rental line (AED 149.4mn) is the difference. The study uses the passenger and baggage lines as printed and records the footing inconsistency here. Additionally, the FY2022–FY2024 statement PDFs are image scans: they were machine-read, and every figure carried into the model was cross-checked against the following year's typed comparative column.

This edition responds to four external audits (9-10 Aug-2026): every accepted finding is implemented and the full 71-row finding-by-finding response, with receipts and prices, is in the study repository. Extracts of the decisive filing passages (the finance-sublease note, the operating-lease lessor note, the tax reconciliation, the fleet allocation) are quoted in the response so the next auditor can tie them without machine-reading the scanned PDFs.

The regression index history (DFM General Index) ends 16-Jul-2026, three weeks before the stock series — the beta window is truncated to the overlap, costing 3 of ~260 weekly observations; recorded rather than papered over.
