Testahil — Elsewedy Electric Company S.A.E. (EGX: SWDY)

Companion model · Independent Valuation Study · Educational analysis · Not investment advice

What this workbook is. A transparent companion to the SWDY valuation study. Every blue cell is an input; every black cell is a formula; green cells link across sheets.

IT IS FORMULA-DRIVEN. Every figure that can be derived arithmetically from a driver is a live formula, s you can change a blue cell on Assumptions and watch the model reprice: the cost of capital is built from the risk-free rate, beta and the premium rather than pasted; the discount factors compound from the glide and the income statement, balance sheet, cash flow, ratios and all four lenses chain off the same cells.

THREE THINGS ARE PASTED VALUES, and it is worth knowing exactly which. First, audited and disclose — the primary record, not a calculation. Second, the segment build: revenue and profit for the three segments the company itself discloses (Cables and its accessories, Constructions and infrastructure, Electrical products and digital solutions) are pasted for FY2025 and grown on their own drivers; only its OUTPUT is carried here and everything downstream of it is formula. Third, whole-model engine outputs, w each figure is a complete re-run of the entire valuation and so cannot be a single formula: the Monte Carlo price map, the sensitivity grids, the DCF scenario bear/bull bounds, the multi-leg currency-of-discounting alternative (its USD cost of capital IS a live formula; the leg-by-leg USD discounting is the engine's), and the expert-panel legs. Everything else — including every lens base value, the relative/normalised/book bear and bull bounds, and the anchor-date roll — is a live formula. Changing a driver reprices the model but does NOT redraw the engine outputs.

How revenue is built. Not as one growth rate. Each of the three disclosed segments is grown on its own driver — Cables on copper-price growth times FX-translation growth times a modest real-volume assumpti Constructions and Electrical products on a taper of their own recent revenue CAGR — because none of the audited filings discloses a tonnage, order-book or backlog figure to build a literal unit model from. Margins come from the same segment build; group EBITDA margin is an OUTPUT of it, not an input.

What it is not. It is not investment advice, a recommendation, or a price target. Values are model outputs shown as ranges.

Sourcing note, up front. FY2023, FY2024 and FY2025 all come from the company's own audited consolida financial statements — every income-statement, balance-sheet and segment line is the audited figure, not derivation or a triangulation. Segment revenue ties EXACTLY to consolidated revenue in every year (Note 5-3); segment profit reconciles to consolidated operating profit through an explicit, exactly-reconciling corporate cost load (Note 16 less G&A, net impairment, other expenses and other income). Every input is annotated where it appears and listed with source and date in the companion bibliography document.

Discount convention. Each explicit year is discounted at its own forward cost of capital, gliding 28.8% -> 17.2% on the same easing calendar as the interest forecast; the terminal value is capitalised at the terminal rate and discounted at the year-5 cumulative factor. One date, one price of time The glide fractions are not a free parameter: they are the cost-of-debt path's own cumulative progress, and the DCF sheet computes them in front of you.

The open question. This company earns just over half its revenue on a hard-currency-linked basis but reports, lists and borrows in Egyptian pounds. The primary model charges the full Egyptian cost of capital. The Fundamental Valuation sheet also shows what the same cash flows are worth if the hard-currency leg discounted at a hard-currency rate. Both are shown; they are not averaged.

Currency. EGP million unless stated. Spot EGP 130.00 (2026-09-03 close). Sheets: READ FIRST · Summary Fundamental Valuation · Assumptions · SOTP Bridge · Segments · Relative & Normalized · DCF · Income Statement · Balance Sheet · Cash Flow · Summary Financials · Monte Carlo · Sensitivity · Per-Share & Ratios · Peer & Sector.

separately. For FY2024 that residual is 22,828, which reconciles to the audited statements (prov isions 13,440 + 943, deferred tax 3,670, related parties 2,050 + 95, other liabilities 2,631 = 22,829). Ev ery line, including FY2025, is now the audited closing figure — no triangulation or roll-forward is used fo or any historical year.

Cash flow — historical markers and the forecast waterfall

EGP mn

EGP mn	FY2024	FY2025
EBITDA	31,601	28,363
Interest paid	-	(5,740)
Income tax paid	-	(8,299)
Operating cash flow after interest and tax	-	12,766
NOPAT	-	-
Add back depreciation and amortisation	-	-
Capital expenditure	(8,490)	(13,112)
Change in working capital	-	(2,358)
Free cash flow to the firm	**-**	**-**

Cash conversion — operating cash flow as a share of EBITDA, FY2025	45.0%

This single ratio is the crux of the valuation: the company earned far more EBITDA than it converted to

FY26E	FY27E	FY28E	FY29E	FY30E
37,965	43,447	48,113	52,750	57,496
25,171	28,815	31,922	35,009	38,170
4,625	5,282	5,833	6,381	6,940
(16,281)	(16,901)	(16,798)	(16,845)	(17,212)
(17,783)	(10,447)	(8,774)	(8,720)	(8,912)
(4,268)	**6,748**	**12,182**	**15,825**	**18,986**

cash, because growth was funded through working capital.

Summary financials — the eight-year picture

EGP mn unless stated. Every cell on this sheet is a link or a ratio; nothing is typed twice

EGP mn	FY2023	FY2024
Revenue	152,186	231,982
Revenue growth	-	52.4%
EBITDA	20,035	31,601
EBITDA margin	13.2%	13.6%
EBIT	17,739	29,342
Attributable profit	10,116	17,461
Free cash flow to the firm	-	-
Net bank debt	16,214	20,903
Invested capital	-	-
Return on invested capital	-	-

Return on invested capital is the DCF's NOPAT over the same year's invested capital, which is wh

Peer frame and sector context

No clean comparable exists; this is a sanity check, not an independent valuation

Company / frame	Market
Riyadh Cables	Saudi Arabia
Electro Cable Egypt	Egypt
European cable majors	Europe
Regional engineering and construction cor	Gulf and North Africa

Own multiples	Value
Trailing enterprise value / EBITDA	10.54x
Trailing price / earnings	16.06x
Trailing price / book	4.16x
Justified enterprise value / EBITDA appliec	6.50x
Justified price / earnings applied	9.00x

Relevance
nearest listed regional cable manufacturer
the only other listed Egyptian cable manufacturer
closest match on business model — cables plus projects
the right frame for the roughly 32% that is the Constructions and infrastructure segment

Caution
far smaller, no contracting arm, lighter balance sheet, pegged currency
much smaller, domestic, heavily levered, currently loss-making
developed-market cost of capital; no convertibility risk
project accounting and backlog quality are not comparable
