

PALM HILLS DEVELOPMENTS

Sources, inputs and judgements · edition of 30 August 2026

This document accompanies the valuation study. It lists every document the study was built on, every input with its value, its date and how it was constructed, every judgement with what would overturn it, and everything that was tried and rejected. It exists so that a reader can check the study rather than trust it.

1 Primary documents

Document	Period	Publisher	Used for
Consolidated financial statements	FY2025	Palm Hills Developments	the entire reported base: income statement, balance sheet and cash-flow statement
Consolidated financial statements	FY2024 (comparative column)	Palm Hills Developments	prior-year balance sheet and cash flow
Consolidated financial statements	FY2023	Palm Hills Developments	revenue and gross profit
Consolidated financial statements	1Q2026	Palm Hills Developments	the most recent reported quarter
Results release	1Q2026	Palm Hills Developments	order book, new sales, the land-plot launch
Results release	FY2024	Palm Hills Developments	units, new sales, deliveries, construction spend, land bank
Results release	FY2023	Palm Hills Developments	units, cash from operations, construction spend
Country risk premium file	read 30 Aug 2026	Damodaran, NYU Stern	Egypt equity risk premium and sovereign default spread, both bases
EGX30 index series	to 22 Jul 2026	Egyptian Exchange	the regressor for the beta
World Development Indicators	read 30 Aug 2026	World Bank	Egyptian inflation, exchange rate and urban population

All company documents were obtained from the company's own investor relations result centre.

2 Full input register

Every input in the study, grouped by research layer. Provenance A is the company's own audited statements or its own results releases; B is an exchange or regulator source; C is a credible third party. No reported historical in this study is below A.

Market

Input	Value	Unit	Date	Tier	Source and construction
shares outstanding bn	2.8599	bn shares	2025-12-31	A	Share capital per FY2025 balance sheet and the share count carried on the covered-name record
spot	15.2	EGP/share	2026-08-23	B	Egyptian Exchange closing price for PHDC, 23 August 2026

3 Judgements, and what would overturn each

Judgement	What was decided	What would overturn it
Discount rate	Cost of capital rebuilt bottom-up at 26.25% on the rating basis and 25.24% on the swap basis, replacing the previous edition's 18%.	A sustained fall in the Egyptian sovereign yield, or evidence that the company borrows materially below sovereign plus 250 basis points.
Cash conversion is the crux	Value is driven by the share of revenue reaching operating cash, measured across its full observed range rather than assumed.	Two further years clustering within about two points of the mean would collapse the range and make this an ordinary input.

Judgement	What was decided	What would overturn it
Revenue is capacity-limited, not sales-limited	The order book is more than seven times revenue, so delivery capacity binds and is what is grown.	A collapse in new sales sustained long enough to bring the order book below about three years of revenue.
Cost accrues on the same clock as revenue	Both legs accrue with completion, so gross margin is an output.	Evidence that the company recognises cost on handover for a material part of its book.
Per-project economics are not used	The previous edition's project price and cost table is not disclosed by the company and is not reused.	Project-level disclosure of unit mix, area, price and cost.
Peer multiples are not published	Only measures obtainable for every peer on the same basis are shown.	Consistent, obtainable peer financial statements.

4 Negative results — what was tried and rejected

Attempt	Why it was rejected
Recover the missing FY2024 unit count by summing the disclosed regional unit series	On the four years where the company total IS disclosed, the sum overstates it by about a third because the regional charts overlap. FY2024 and FY2025 unit counts are therefore absent rather than inferred.
Use the accounting cost of debt	Finance cost of EGP 3,347.5mn on average gross borrowings of about EGP 26,700mn implies 12.5%, far below the sovereign, because much of the balance does not bear interest and part of the charge is capitalised. A historical rate is not a marginal rate.
Read the FY2025 statements at a single scan resolution	Neither resolution is reliable throughout: at one, notes receivable long term read 801.3 against a true 54,801.3; at the other, fixed assets read 5.0 against a true 4,522.0. Every component list is instead required to sum to the subtotal the company printed.
Source peer earnings and book multiples from an aggregator	The pages carry no financial tables. An invented multiple would look authoritative and mean nothing.
Obtain a live Egyptian sovereign yield from the exchange or the central bank	Both publish through interfaces this study could not read. The yield used is a dated market quote and is flagged as 24 days old.

5 Where two sources disagree

Item	One source	The other	Which is used
FY2024 cash from operations	EGP 4,854.8mn — FY2025 audited statements, comparative column	EGP 3,131.9mn — the company's own FY2024 results release	the audited statements
FY2023 revenue	EGP 17,462.1mn — FY2023 audited statements	EGP 17,454.6mn — FY2024 results release comparative	the audited statements; the difference is 0.04%

Item	One source	The other	Which is used
FY2016 new sales	EGP 8,194mn as first reported	EGP 8,467mn in later releases	as first reported, for any measurement anchored at that date
FY2015 revenue	EGP 3,560.6mn as filed	EGP 3,641.7mn restated after the 2016 accounting-policy change	both, kept apart; the restatement is a change of basis, not an error

6 What is not disclosed

Gap	Statement
Cash Flow Statement Detail	The FY2025 cash-flow statement is published in its three totals only (operating EGP 1,424.2mn, investing EGP -4,031.7mn, financing EGP 5,628.8mn); no line-by-line statement is posted. Working capital on the two audited balance sheets rose EGP 20,084.7mn in 2025 while net profit plus depreciation less operating cash implies a rise of EGP 3,146.2mn — a wedge of EGP 16,938.5mn, 46.8% of revenue, which CANNOT be decomposed from what is disclosed and is therefore not decomposed. It is why the projection is published in two framings rather than one. Closed by: the full FY2025 cash-flow statement.
Fy2025 Results Release	PHD has published FY2025 consolidated statements but NO FY2025 full-year results release. The release is where units sold, new sales, deliveries and construction spend are disclosed, so FY2025 has audited financials and NO operating drivers. Closed by: the FY2025 release, or the company confirming the figures directly.
H1 2026 Results	As at this build date (30-Aug-2026) no 2Q/H1-2026 statements or release are posted to the result centre; the newest disclosure of any kind is 1Q2026 (posted 25-Jun-2026). The study's information set therefore ends at 1Q2026. Closed by: the H1-2026 filing.
Securitisation Pricing	The EGP 2.015bn securitisation of 4-Feb-2026 discloses tranche sizes, tenors and national-scale ratings but NO coupon on any tranche, so the company's own marginal cost of debt cannot be read. Closed by: the offering circular or a disclosed coupon.
Per Project Pricing	The company does not disclose per-project unit mix, average unit area, price per square metre or construction cost per square metre. The 11-Jun-2026 edition carried a full per-project table of those figures; they are NOT sourced to any company document. This study does not reuse them. Closed by: an investor presentation or project-level disclosure carrying unit economics.
Backlog Cost To Complete	Remaining construction cost against the EGP 263bn backlog is not disclosed as a single figure. It is inferred in the model from the realised gross margin and flagged where used.
