

Testahil — Savola Group Company (Tadawul: 2050)

Companion model · Independent Valuation Study · Educational analysis · Not investment advice

What this workbook is. A transparent companion to the Savola Group valuation study. Every blue cell is an input; every black cell is a formula; green cells link across sheets.

IT IS FORMULA-DRIVEN. Every figure that can be derived arithmetically from a driver is a live formula, so you can change a blue cell on Assumptions and watch the model reprice: the cost of capital is built from the risk-free rate net of the sovereign spread, beta and the premium rather than pasted; the discount factors compound; and the segment build, income statement, balance sheet, cash flow, ratios and all four lenses chain off the same cells.

THREE THINGS ARE PASTED VALUES, and it is worth knowing exactly which. First, audited and disclosed history — the primary record, not a calculation: the FY2023-FY2025 statements, the FY2025 category volumes, revenues and gross profits, and the H1-2026 actuals. Second, nothing else of the build: the forecast itself is LIVE — category volumes compound off growth drivers, revenue is volume x revenue per tonne, gross profit is volume x gross profit per tonne, Panda revenue is stores x sales per store, and every margin on the Segments sheet is an OUTPUT of those lines, never an input. Third, whole-model engine outputs, where each figure is a complete re-run of the entire valuation and so cannot be a single formula: the Monte Carlo price map, the sensitivity grids, the DCF scenario bear/bull bounds, the Framing B fair value, and the CDS-basis fair value. Changing a driver reprices the model but does NOT redraw those engine outputs.

How revenue is built. Not as one growth rate. Edible oil, sugar and pasta are volume x price: thousand tonnes compound on their own growth paths (anchored on the disclosed H1-2026 actuals: oil +16.1%, sugar +7.2%, pasta +3.0%) and carry their own revenue-per-tonne paths. Nuts & spices carries a revenue path with the July-2026 Mehbaj acquisition folded in small and flagged (its consideration is undisclosed). Panda is stores x sales-per-store: the store path follows the company's own 20-plus-per-year guidance, and sales density carries the measured H1-2026 decline, fading in Framing A and persisting in Framing B. Herfy and Al Kabeer are revenue glides anchored on H1-2026 actuals.

How cost is built, and why no group margin is an input. Each category carries its own gross profit per tonne — anchored on the H1-2026 actuals, with the second half held BELOW the first on the company's own replacement-cost warning and the July-2026 vegetable-oil price rise — and its own operating-cost ratio measured from FY2025. Segment EBITDA and the group margin are therefore OUTPUTS computed on the Segments sheet.

Leases are debt, and charged once. The lease liability (SAR 3.95bn audited) is deducted in the bridge and carries its measured 5.86% effective rate inside the cost of capital; the cash-flow waterfall charges a steady-state lease replacement equal to right-of-use depreciation, and new store leases are non-cash additions that grow the liability and the asset together on the Balance Sheet.

The contested judgement — Panda's expansion. The model is computed BOTH WAYS and never averaged: Framing A lets sales density stabilise as the store-refresh programme and e-commerce mature; Framing B holds the measured H1-2026 density erosion forever. Both fair values sit side by side on the Fundamental Valuation sheet, in the study's summary table, and in an expert's range.

Discount convention, stated. The five explicit years are discounted at the explicit-window cost of capital at full-year END-of-period factors; the terminal value, dated at the end of year five, is discounted at the year-five factor and uses terminal weights re-based toward equity. The bridge is dated 31-Dec-2025 and rolled to the 18-Aug-2026 anchor at the cost of equity, net of the SAR 1.70 dividend whose ex-date (07-May-2026) falls inside that window.

Sourcing note, up front. FY2023, FY2024 and FY2025 come from the company's own audited consolidated financial statements read from savola.com/investors; Q1-2026 from the reviewed interim statements; the H1-2026 actuals from the company's own earnings release and investor presentation (06-Aug-2026). Every input is listed with source and date in the companion bibliography document.

Currency. SAR million unless stated. Spot SAR 25.30 (18-Aug-2026 close). Sheets: READ FIRST · Summary · Fundamental Valuation · Assumptions · SOTP Bridge · Segments · Relative & Normalized · DCF · Income Statement · Balance Sheet · Cash Flow · Summary Financials · Monte Carlo · Sensitivity ·

Book value and sustainable return	17.50	20.27	23.04	15.0%	3.04	(19.9%)
Weighted central	20.92	28.02	32.82	100.0%		10.7%
Span across lenses (min/max — NOT weighted)	15.02		40.94			
Contested judgement, other way — Framing B (density persists)		22.10				(12.6%)
Terminal value share of DCF enterprise value		75.6%				
Expert panel median		19.82				(21.6%)
Market price (18-Aug-2026 anchor)		25.30				

Key figure	Value
Shares issued (mn)	300
Market capitalisation (SAR mn)	7,590
FY2025 revenue (SAR mn, audited)	26,081
FY2025 operating EBITDA (SAR mn)	2,351
FY2026E revenue (SAR mn)	27,060
FY2026E EPS (SAR)	2.44
Cost of capital — explicit window	7.97%
Cost of capital — terminal	8.46%
Terminal growth	2.5%
Net debt, 30-Jun-2026 (company definition, SAR mn)	851

Fundamental valuation — four lenses, the contested judgement, the panel

Lens / step	Basis	SAR per share
Discounted cash flow (Framing A)	five-year FCFF +	26.20
bear	Framing B densit	15.02
bull	volume beats + C	32.29
Relative multiples	peer-mix P/E, con	30.90
Normalised earnings power	mid-cycle margin	36.39
Book value and sustainable return	justified P/B on	20.27
Weighted central		28.02

THE CONTESTED JUDGEMENT — PANDA'S EXPANSION, BOTH WAYS

Framing A: density stabilises as CXR and e-commerce mature	26.20
Framing B: the measured H1-2026 density erosion persists (engine re-run)	22.10
The judgement is worth (Framing A less Framing B, per share)	4.10
CDS-basis fair value (same model, CDS sovereign basis; engine re-run)	24.76

EXPERT PANEL

Expert	Method	Base (SAR/shar	Low	High
Expert 1	segment sum-of-t	34.79	28.56	41.02
Expert 2	two-stage dividen	18.22	16.41	21.14
Expert 3	residual income /	19.82	19.94	23.14
Panel median		19.82		

The risk-free construction, priced both ways

No direct 10-year SAR quote was accessible; the base uses UST10Y (4.68%, FRED) + the Jan-2026 sovereign issue spread (85bp).

Discounting at −50bp / +50bp instead is an engine re-run worth the

28.81

23.86

Assumptions — every input in the model

Blue cells are inputs. Change one and the model reprices: everything downstream is a formula.

Input	2026E	2027E	2028E	2029E	2030E

Enterprise value to equity — the bridge

Non-operating assets in; loans, leases, benefits, restoration, other net liabilities and minorities out; Herfy's 51% NCI at ITS OWN market price

Step	SAR mn	Per share (SAR)
Present value of the five forecast years		3,293
Present value of the terminal value		10,177
Enterprise value (operating)		13,470
Government sukuk and other non-current investments		676
Current investments (T-bills, Almarai FVTPL)		86
Kinan at capitalized earnings (annualized H1-2026 share / cost of equity)		650
Investment property		158
Cash and cash equivalents		904
Less loans and borrowings		(1,894)
Less lease liabilities		(3,952)
Less employee benefits liabilities		(748)
Less asset-restoration provision		(165)
Less other net liabilities (tax/zakat accruals, deferred tax, net)		(333)
Less Herfy's 51% NCI at Herfy's own market price		(511)
Less other non-controlling interests at book		(515)
Equity value attributable to owners	7,825	26.21

Terminal value as a share of enterprise value 75.6%

Kinan alternatives: carrying value 435.5 (floor) · share of net assets 600.9 (disclosed) · capitalized earnings (used). The Tiryaki 15% stake (received Q1-2026, carried ~272) postdates the valuation date and is left out of the bridge.

Segments — the unit build; every margin is an output

Volumes compound on their drivers; revenue = volume x price; gross profit = volume x GP/tonne; Panda = stores x sales per store

Food Processing unit build	2026E	2027E	2028E	2029E	2030E
Oil volume (k MT)	1,487	1,547	1,593	1,633	1,666

Group EBITDA margin (output, never an input)	8.8%	8.8%	8.7%	8.7%	8.7%

FY2025 bases shown on Assumptions; H1-2026 actuals in the study text. The four category revenues foot to the audited Food-Processing segment revenue (13,279.9) and the four gross profits to the audited segment gross profit (1,689.2).

Relative, normalised and book lenses

The peer-mix multiple is computed from quoted peers, discounted for the conglomerate/Egypt mix, and applied to model earnings

PEER-MIX MULTIPLE

Processing-leg P/E = median (NADEC, Wilmar)	12.70x
Retail-leg P/E = median (Al Othaim, BinDawood)	19.60x
Mix-weighted peer P/E	15.81x
Applied multiple after the disclosed discount	12.64x

RELATIVE LENS

FY2026E earnings per share (model)	2.44	
Relative lens value = applied multiple x FY2026E EPS	30.90	
bear (30% discount) / bull (10% discount)	27.04	34.77

NORMALISED EARNINGS POWER

Mid-cycle revenue (FY2027E)	28,349		
Normalised EBITDA at the mid-cycle margin	2,608		
Normalised net profit (same D&A, finance, tax and minority frame)	859		
Normalised EPS	2.88		
Normalised lens value = applied multiple x normalised EPS	36.39	31.84	40.94

BOOK VALUE AND SUSTAINABLE RETURN

Book value per share (audited FY2025 equity)	18.47		
Sustainable return on equity (FY2026E recurring / FY2025 equity)	11.24%		
Justified price-to-book = $(ROE - g) / (K_e - g)$	1.10		
Book lens value = justified P/B x book value per share	20.27	17.50	23.04

Crosswalk: the dividend-discount P/E implied by this study's own cost of equity, payout and growth is 8.1x — far below the 15.8x the market pays the peer set. That gap (the price of capital) is why the DCF sits below the peer-anchored lenses and it is examined in the study rather than averaged away

DCF — the waterfall, the cost of capital built in-sheet, and the terminal

NOPAT = EBIT x (1 – combined zakat/tax); lease replacement equals right-of-use depreciation; leases carry a debt weight

SAR mn	2026E	2027E	2028E	2029E	2030E
Revenue	27,060	28,349	29,726	31,029	32,131
EBITDA	2,392	2,485	2,596	2,707	2,802
EBITDA margin	8.8%	8.8%	8.7%	8.7%	8.7%
Less depreciation and amortisation	(1,223)	(1,265)	(1,313)	(1,353)	(1,387)
EBIT	1,169	1,220	1,283	1,354	1,414
NOPAT = EBIT x (1 – combined zakat/tax rate)	941	982	1,033	1,090	1,138
Add back depreciation and amortisation	1,223	1,265	1,313	1,353	1,387
Less capital expenditure	(810)	(900)	(880)	(860)	(850)
Less lease replacement (= right-of-use depreciation)	(559)	(584)	(607)	(629)	(647)
Less increase in net working capital	(38)	(49)	(52)	(49)	(42)
Free cash flow to the firm	757	714	806	905	987
Discount factor (compounding at the explicit cost of capital)	0.9262	0.8579	0.7946	0.7359	0.6816
Present value of free cash flow	701	613	641	666	673

TERMINAL BLOCK

Terminal growth	2.5%
Terminal return on invested capital	10.5%
Terminal reinvestment = g / return on capital	23.8%
Terminal NOPAT (year five grown one year)	1,167
Terminal free cash flow = NOPAT x (1 – reinvestment)	889
Terminal value at end of year five	14,930
Present value of the terminal value	10,177
Present value of the five explicit years	3,293
Terminal value share of enterprise value	75.6%
Enterprise value (operating)	13,470

COST OF CAPITAL — BUILT, NOT PASTED (v2: rf net of the sovereign spread; both ERP bases shown)

Observed 10Y SAR construction	5.53%
Less sovereign default spread (rating basis)	-0.51%
Normalized risk-free rate rf*	5.02%
Beta (own stock vs TASI, five-year weekly)	1.087
Equity risk premium (rating basis)	5.01%
Cost of equity = rf* + beta x ERP	10.47%

Cost of loans (blend of SAR / EGP-parity / other tranches)	5.88%
Cost of leases (measured effective rate)	5.86%
Market capitalisation = spot x shares issued	7,590
Capital base = equity + loans + leases	13,436
