

Testahil · Source register Saudi Telecom Company (Tadawul: 7010) · edition 05-09-2026

Where every number came from. This register accompanies the valuation study and the companion model. Each input carries the source it was taken from, the type of that source, and the date the source itself bears — not the date it was read.

What this study is built on

The company's own audited and reviewed financial statements, and its own earnings presentations. Nothing historical in this study comes from a data vendor, a broker or a press report, and the register below is what makes that checkable rather than asserted: every dated historical names the company document it was read from, with its note.

The company's own investor-relations channel was attempted first, before any aggregator, and the attempt is logged whether or not it succeeded. Reached through www.stc.com.sa/sitemap.xml after four direct URL guesses had each returned the site's own 404 page under an HTTP 200. Carries every earnings presentation and call transcript back to 2017. The financial statements come from the same group site at www.stc.com/content/dam/groupsites/en/pdf/.

Three figures about this register, all computed from it: it carries 176 inputs, of which 175 come from this company's own documents and 9 of those from the investor-relations channel specifically — which is the split a reviewer needs, because it says how much of what is known about the company rests on material no financial statement carries. The three most recent fiscal years and every disclosed period of the study year come from the statements themselves.

1 Input register — every figure the model consumes

Grouped by research layer, then by name. Four fields on every row, with no orphan numbers: what it is, what it is worth, where it came from, and the date that source carries.

#	Input	Value	Layer	Source — the document and its note	Source date

2 Source catalogue — the documents relied on

Every document named in the register above, with what it was used for. The list is closed: a row in the table above citing a document not on this list would have failed the register's own assertion.

Document	Kind	What it carries	Date it bears	Inputs drawn
Saudi Telecom Company, audited consolidated financial statements for the year ended 31 December 2025	AUDITED FINANCIAL STATEMENTS	The consolidated income statement, balance sheet and cash-flow statement with the FY2024 comparatives; note 9's reconciliation of segment revenue to net profit, which is the only place those lines appear together; note 26's borrowings book, facility by facility, in five currencies; note 33(a)'s movement of the zakat provision, which names the prior-year reversal on its own line; and the accounting-policies note carrying the disclosed asset lives the terminal is built on.	2025-12-31	153
Saudi Telecom Company, audited consolidated financial statements for the year ended 31 December 2024	AUDITED FINANCIAL STATEMENTS	The FY2023 column wherever a line was regrouped afterwards — the one-filing-per-column discipline this study keeps, so a column is never two groupings in one place — and note 27's borrowings comparative.	2024-12-31	153
Saudi Telecom Company, audited consolidated financial statements for the year ended 31 December 2023	AUDITED FINANCIAL STATEMENTS	The FY2023 position as originally reported, for the point-in-time cross-check.	2023-12-31	153
Saudi Telecom Company, reviewed condensed consolidated interim financial statements for the six months ended 30 June 2026	REVIEWED INTERIM STATEMENTS	The reviewed 30 June 2026 balance sheet the enterprise-to-equity bridge stands on, the half's income statement, its financing cash flows, and the share count footed against its own stated capital and par value.	2026-06-30	13
Saudi Telecom Company, fourth-quarter and full-year 2025 earnings presentation	EARNINGS PRESENTATION (investor-relations channel)	Subscribers by category and the operating measures no financial statement carries, for the segments built as volume times price.	2025-12-31	7
Saudi Telecom Company, second-quarter and half-year 2026 earnings presentation	EARNINGS PRESENTATION (investor-relations channel)	The same measures for the study year's disclosed halves, and the capital expenditure guidance this study SCORES rather than consumes.	2026-06-30	2

A note on the guidance row. Management publishes a capital-expenditure band and an earlier edition of this study took its forecast path straight from it. A forward target leans the same way an optimistic model does, so guidance is SCORED against what happens and never consumed as an input; the path this study uses is measured from the filings instead, and the guidance is recorded here as a document read rather than as a driver.

3 Figures that are DERIVED rather than sourced

A derived figure is arithmetic on sourced ones, and an identity is not an assumption — but the two must not be allowed to look alike, so each is named here with the identity that produces it.

Figure	Value	The identity that produces it, and from what
Normalised risk-free rate	4.54%	The observed sovereign yield of 5.52% less this sovereign's own default spread of 0.98%. Country risk is charged exactly once and it is charged inside the equity risk premium, so it is removed here rather than counted twice.
Equity beta	0.7093	A 4.94-year weekly regression of this stock against the published index of the exchange it is listed on, the Tadawul All Share Index as of 2026-09-08: 254 observations, R-squared 30.3%, standard error 0.1022. Produced by the house regression routine, not by a study-local script.
Cost of equity	9.03%	The normalised risk-free rate plus beta times the equity risk premium of 5.72%, on the market basis this study names as central.
Marginal cost of debt	4.860%	The company's own latest issue, weighted by the tranches' own sizes: SAR 2,812,000 thousand for 5 years at 4.489%; SAR 4,688,000 thousand for 10 years at 5.083%.
Weighted cost of capital	8.53%	Market-value equity, never book: the latest known close of SAR 43.86 on 2026-09-03 times 4,993,024 thousand shares outstanding — issued capital of SAR 50,000,000 thousand in shares of SAR 10 each, which divides to the 5,000,000 thousand shares note 17 of the reviewed 30 June 2026 interim itself states, less 6,976 thousand held in treasury. Debt is the borrowings total from the LATEST DISCLOSED balance sheet, 30 June 2026, SAR 23,536,554 thousand, which reproduces from the same interim's own financing cash flows to twelve basis points.
Terminal growth	2.00%	Terminal inflation of 2.0% from the house macro path plus a STATED real growth of 0.0%. It is derived rather than chosen, and the real component is written down as the number it is rather than buried inside a nominal rate nobody can falsify.
Effective tax rate on operating profit	8.03%	The three filed years' zakat and income-tax charge over their operating profit, with the prior-year provision reversal of SAR 1,324,787 thousand that note 33(a) names put BACK — carrying that reversal forward instead would read 5.02% and would assume the company keeps discovering it has over-provided, for ever.
Implied asset life in the terminal	20.86 years	Derived from the company's own property, plant and equipment note. It is a DISCLOSED life, not one this desk chose, and it is what the terminal maintenance charge is built on rather than the reciprocal of an inflation rate.
Share count	4,993.024 mn	Issued capital divided by the par value the same document states, footed against the count that document itself gives, less treasury. Today's count is never carried back to a past period.

4 Research trail — the four levels, and what came back empty

Before any forecast driver was set, the research ran at four levels: the world, the country, the industry and the company. Every finding carries its source and that source's own date.

#	Level	What was found	Source	Kind	Source date
1	Global	The riyal is pegged to the dollar at 3.75, so Saudi Arabia imports United States monetary policy and TODAY IS ALREADY THE TERMINAL for the cost of capital; the house macro path calls the regime pegged and the schedule is flat by construction	The International Monetary Fund's World Economic Outlook database, and the sovereign quote carried on the house macro path for Saudi Arabia at its own as-of date	regulator official	2026-07-31
2	Global	This business has no commodity input in the sense the category means: its cost of revenues is handsets and equipment, interconnection, wages, a regulated levy and maintenance, and note 35 discloses all seven lines. The nearest thing to a global price input is imported device and network equipment cost, which is the largest single line at SAR 14,195,531 thousand, 18.2% of revenue	the FY2025 audited consolidated financial statements, note 35, cost of revenues by nature	company official	2026-02-25
3	Global	Global telecom demand growth is in data volume rather than in revenue per user, and this company's own record shows the same shape: a subscriber base compounding at 6.00% a year against revenue per subscriber falling 3.86%	the fourth-quarter and full-year 2025 earnings presentation and the full-year 2024 earnings presentation, subscriber charts, cross-checked against note 9 segment revenue	company ir	2026-02-25
4	Global	Negative search — nothing found (Searched the FY2025 audited statements and the FY2025 and H1-2026 earnings presentations for sanctions, export controls, supply-chain disruption or tariffs. Two hits in the statements, neither a risk disclosure: one lists 'supply chain and other related services' among a subsidiary's permitted activities, and one records a 2017 Kuwaiti court ruling on a regulatory tariff decree. No supply-chain or sanctions exposure is disclosed anywhere in the three documents.)	negative search	search	2026-09-05
5	Country	Saudi consumer-price inflation ran 2.5% (2023), 1.5% (2024) and 2.0% (2025) and the published projection ladder is 2.3 / 2.1 / 2.0 / 2.0 / 2.0 to 2030, terminating at 2.0%; the riyal is pegged so devaluation risk is a regime question rather than a rate	International Monetary Fund, World Economic Outlook database, series PCPIPCH, Saudi Arabia (SAU), read live from the datamapper API	regulator official	2026-09-05
6	Country	GOVERNMENT CHARGES ARE A DISCLOSED COST LINE OF SAR 5,417,576 thousand, 7.0% of revenue, and licences and frequency spectrum are carried at SAR 5,941,321 thousand net book value with named expiry dates running 2029, 2032, 2033, 2034, 2037 and 2039 in Saudi Arabia alone. A SAR 1,124,590 thousand 600MHz block expiring 2039 was added in FY2025	the FY2025 audited consolidated financial statements, notes 12 and 35	company official	2026-02-25
7	Country	Negative search — nothing found (Searched the FY2025 audited statements and both 2026 interim sets for any fiscal or political event with a stated effect on this company — a change in the zakat or income-tax basis, a subsidy, a state directive. The tax note records ordinary zakat and income tax and a FY2025 CREDIT of SAR 466,436 thousand against a FY2024 charge of 1,191,564, a swing of 1.66bn that the statements do not attribute to a policy change. Nothing else is disclosed.)	negative search	search	2026-09-05
8	Industry	Saudi mobile subscribers rose 26.47mn to 28.34mn to 30.0mn across the three filed year ends and fixed 5.57mn to 5.72mn to 6.0mn; the latest disclosed point is 30.3mn and 6.1mn at H1-2026. Penetration is already far above one mobile line per person, so the volume line cannot extend at 6% indefinitely	the full-year 2024 earnings presentation, the fourth-quarter and full-year 2025 earnings presentation and the second-quarter 2026 earnings presentation, subscriber charts	company ir	2026-08-05
9	Industry	Revenue per subscriber fell from SAR 1,536.1 a year to 1,457.5 to 1,420.0 across the three filed years — a decline of 3.86% a year compounding, which with 6.00% volume growth multiplies back to exactly the +1.91% the audited segment revenue reports	note 9 segment revenue divided by the subscriber counts in the earnings presentations; the study's own unit-economics module checks the identity three ways	company ir	2026-02-25
10	Industry	Negative search — nothing found (Searched the FY2025 audited statements and the FY2025 and H1-2026 earnings presentations for any named competitor, market-share figure or new entrant. ZERO hits across all three documents for 'competitor', 'market share', 'Mobily' or 'Zain'. This company does not disclose its competitive position in any document this study holds, and no peer multiple or share figure is therefore used anywhere in the model.)	negative search	search	2026-09-05

11	Industry	Fixed-wireless broadband is disclosed as a separate subscriber category and is flat at 0.5mn while fixed-wired grows 1.30mn to 1.4mn, so within this company's own disclosure the substitution runs toward fibre rather than away from it. A direct-to-mobile satellite partnership with AST SpaceMobile is disclosed as a partnership rather than as a revenue line	the fourth-quarter and full-year 2025 earnings presentation, subscriber categories and the partnership summary	company ir	2026-02-25
12	Industry	Negative search — nothing found (The same search as the new-entrants category and with the same result: no named competitor appears in any of the three documents, so no competitor capacity or price move can be cited. Recorded as an evidenced absence rather than closed by moving a finding about this company's own operations into a row about its competitors.)	negative search	search	2026-09-05
13	Company	Management publishes a capital-expenditure band of 15.0% to 17.5% of revenue and a dividend policy of SAR 0.55 a quarter locked to the third quarter of 2027	the fourth-quarter and full-year 2025 earnings presentation and the delivered study's own record of the policy	company ir	2026-02-25
14	Company	FY2025 audited: revenue 77,818,675, gross profit 37,699,689, EBITDA 24,469,435, EBIT 14,438,264, total assets 157,476,669, borrowings 15,191,428, cash and equivalents 13,376,071. Every line foots to its own note	the FY2025 audited consolidated financial statements, audited by Deloitte and Touche & Co.	company official	2026-02-25
15	Company	FY2023 exists on TWO bases and both are held: as originally reported, revenue 72,336,611 with TAWAL as a segment; as restated on a continuing basis in the FY2024 filing, 71,777,161 with TAWAL a discontinued operation. The bridge between them foots to the riyal — less TAWAL's 3,343,350, plus the 3,076,148 of eliminations that went with it, less note 49's 292,248 reclassification	the FY2023 audited consolidated financial statements note 9 and the FY2024 audited consolidated financial statements notes 9 and 49	company official	2024-02-25
16	Company	The Q1-2026 reviewed interim and its earnings presentation are published, as are the H1-2026 set and an H1-2026 earnings call transcript	the first-quarter 2026 interim statements and the investor-relations presentations page	company ir	2026-05-01
17	Company	H1-2026 reviewed: total assets 166,996,964, long-term borrowings 22,094,126 and short-term 1,442,428, lease liabilities 2,258,902, cash 18,940,773, equity attributable 84,986,806, minority 2,726,349. Share capital is SAR 50,000,000 thousand in shares of SAR 10, which divides to the 5,000,000 thousand shares note 17 states, less 6,976 thousand in treasury	the reviewed half-year 2026 interim statements, reviewed, notes 15 and 17	company official	2026-08-05
18	Company	TWO ONE-OFFS INSIDE THE COST LINE, each named in its own filing's footnote: SR 1,500 million of withholding-tax provision reversed into FY2024's network access charges and SR 724 million of provision reversed into FY2023's government charges. Separately, international sukuk of SAR 7,500 million was issued in the first half of 2026 in two tranches at 4.489% and 5.083%, and TAWAL was contributed to DIIC in February 2025 for 43.06% of it	the FY2025 audited consolidated financial statements note 35, the FY2024 audited consolidated financial statements note 36, the reviewed half-year 2026 interim statements note 15 and the FY2025 audited consolidated financial statements note 8.1.1	company official	2026-08-05
19	Company	The direct holding in Telefonica rose from 4.97% to 9.97% during 2025 after regulatory approval, and the forward agreement that had given synthetic exposure to the extra 5% was terminated. It is irrevocably designated at fair value through other comprehensive income and carried at SAR 8,513,430 thousand at 30 June 2026	the FY2025 audited consolidated financial statements note 9.1 and the reviewed half-year 2026 interim statements note 9.1	company official	2026-08-05

A NEGATIVE RESULT IS A RESULT. 4 of the 19 findings above are searches that came back empty, and they are printed rather than left out — a question asked and answered with nothing is evidence, while a question never asked looks identical to one that found nothing.

5 How each forecast driver was set

The house standard is to build at the finest level the disclosure supports — volume times price on a disclosed unit, with cost per unit and the margin as an OUTPUT. Where the disclosure stops short of that, the driver drops to the finest sourced level and the gap is STATED rather than filled.

Driver	Level built at	Why, and what the disclosure supports	Sweep findings behind it
stc segment revenue (two thirds of group)	derived	Volume times price on disclosed units: subscribers by category from the earnings presentations, revenue per subscriber derived against the audited segment revenue, each half faded to zero real and multiplied.	F08, F09, F14
the other twelve segments' revenue	segment	Each grows at its own measured two-year real rate from note 9, deflated by the published inflation prints,	F14, F15, F05

		fading to zero real. No unit data is disclosed for any of them, so this is the finest sourced level available and the gap is flagged rather than filled.	
cost of revenues	not built per unit	Note 35 discloses all seven lines by nature for three years and each is a different driver class. The model currently holds each segment's disclosed gross margin, and the seven-line build is registered as the next correction rather than claimed here.	F02, F06, F18
competitive position and peer multiples	top down	No named competitor, market share or peer figure appears in any document this study holds, so no relative multiple is taken from peers. The relative lens uses this company's OWN trailing EV/EBITDA at three year ends instead.	F10, F12, F14
spectrum renewal cost inside the explicit window	top down	The first Saudi spectrum expiry falls in 2029, inside the forecast window, and no renewal cost is disclosed anywhere. Carried inside the capital-expenditure ratio measured from the filings rather than modelled separately, and named as a gap.	F06, F07, F14

6 The judgements, and what would overturn each

Every input above is sourced or derived. What follows is not: these are the decisions this study made where the evidence permits more than one answer. Each is stated with the observation that would show it wrong.

Judgement	What this study decided	What would overturn it
Which lens is the answer	The cash-flow model is the central and the others are cross-checks published beside it. No weights are applied anywhere.	A calibration finding, out of sample, that some blend of the lenses beats the primary alone. Until that exists the typed blend stays retired, because a number produced by averaging several methods is a new method with parameters nobody tested.
What the bear and bull move	Exactly one driver: capital expenditure as a multiple of the depreciation of the base being renewed, across the 1.054 to 1.252 span this company's own three filed years ran. The cost of capital, terminal growth, terminal risk-free rate, inflation ladder and margin path are IDENTICAL across all three reads.	Evidence that a second driver moves independently of capital intensity by enough to matter. Note that the previous edition moved three levers at once, which makes each case unattributable — a bear that also changes the discount rate is valuing the company in a different economy.
The capital-intensity path	Measured from the filings at 1.161 times depreciation, the three filed years' own mean, and held flat.	Two more years of filed capital spending outside that range, which would say the data-centre build has changed the company's intensity rather than sitting inside its history. Management's own guidance is deliberately NOT the test: it is scored against what happens, never consumed.
The margin path	HELD, not built: each segment carries its own disclosed gross margin from the filings, with an SG&A share applied against it, so the resulting path runs 32.06% in the first forecast year and 31.77% in the last — flat, and slightly down. The house standard is a margin that falls OUT of a cost built per unit, and note 35 discloses all seven cost lines by nature for three years, so the disclosure would support one. This model does not yet consume it, and that gap is stated here rather than dressed as a cost build.	A cost line moving differently from the driver it is attached to. The model is not permitted to assume the mix improvement an upward glide would represent, so the risk here is a margin that FALLS rather than one that fails to rise.
The debt tax shield	The statutory rate, not the 8.03% effective rate the filed years bore. An effective rate is the average a company paid; a shield is the marginal rate an authority allows on the income-tax portion of its base, and the two are not required to agree.	The split of this company's base between zakat and income tax by ownership, which is not disclosed and which would place the true shield below the statutory rate. The whole span is worth 0.79%% of the answer — below this house's materiality line for a contested judgement — and it is flagged rather than filled.
The sovereign quote's age	Accepted deliberately at 36 days against a 14-day bound, and disclosed rather than used quietly.	A fresher sovereign quote. Refreshing it is a macro-path task that moves every Saudi study at once, not a lever inside this one.
The forecast balance sheet	NOT BUILT, and the reason is a defect in the filing rather than a gap in the model: the latest reviewed balance sheet does not add up in its own current column, while every prior-year column foots exactly.	A corrected interim, or the FY2026 audited statements. Solving for the figures that would make it foot would be inventing them, and the previous edition's forecast balance sheet was filled with grouped estimates chosen to make a balance-check row read zero — a check that cannot fail is not a check.
