

Read this first

THE RULE

IT CALCULATES. IT DOES NOT STORE.

Exactly ONE class of cell is pasted in this workbook: a figure read off an audited or disclosed filing, or a statement that defines each sensitivity grid point. Everything else is a live formula.

The previous edition also pasted its sensitivity grids, its beta sweep and its bear and bull columns, on the spreadsheet. That was 27.6% of the file, and it was the part a reader would most want to interrogate. Three of those pasted

The Sensitivity sheet now writes the entire forecast engine out again, in formulas, once for every grid point.

WHAT IS AUDITED AND WHAT IS NOT

The base year is the twelve months to 30 June 2026. The first half of it — July to December 2025 — is AUDITED. The second half is REPORTED: a disclosure to the Egyptian Exchange dated 29-30 July 2026, not a filing. Half of this base year

The gross profit of that reported half is NOT used as released. Run through the company's own first-quarter earnings report and profit the same release reports. The gross profit used here is solved from the profit line, which passes two

THE ONE OPERATING INPUT THAT IS NOT READ OFF A FILING

Note 15-A discloses the cost stack for the company and not by line. The processing-intensity weights on Assets are registered, dated and sensitised like every other input rather than hidden inside a formula.

re the blue cells on Assumptions, and the blue lever cells

odel re-run and a re-run cannot be written inside a grid.
roduce.

ptions and every sensitivity cell in the file moves with it.

ified opinion. The second half — January to June 2026 —
study says so wherever it uses it.

ed figure implies a profit after tax about 12.6% above the
Base Year rows 13 to 17 show the whole test.

ement, and the per-line margins depend on them. They

Summary — the answer, and every lens behind it

Nothing on this sheet is typed. Every figure points at the sheet that computed it, so a driver can

	Bear
Discounted cash flow	1.65
Relative multiples	9.88
Normalised earnings power	9.88
Book value and sustainable return	5.27
CENTRAL — the cash-flow lens	1.65

Market price at the valuation date	13.50
Central against price	67.2%
Shares in issue, millions	1,291.5
Market capitalisation at the valuation date	17,435

WHERE THE VALUE SITS	
Present value of the explicit five years	9,308
Present value of the terminal block	18,411
Terminal share of enterprise value	66.4%
Net cash added in the bridge	3,002

The bear and bull columns of each lens are the blue cells here and the only pasted figures on the sheet: each formula across them, because the defect being closed was a sheet that labelled a row weighted and then the

anged on Assumptions moves this page too.

Base	Bull	Weight
22.57	31.27	45.0%
12.59	15.30	20.0%
12.98	16.09	20.0%
7.13	8.15	15.0%
22.57	31.27	

ch is a complete re-run of the model at that scenario, computed in compute.py and reprodu
ok the minimum and maximum across four lenses.

iced in formulas on the Sensitivity sheet. The central row is a live

Four lenses, one bridge, one valuation date

Lens 2 is on the TRAILING metric so it borrows no discount factor from lens 1. Lens 3 cash added at face outside the multiple. Lens 4 uses the same cost-of-equity glide lens

Base-year EBITDA	2,951
Enterprise value at spot	14,434
The company's OWN trailing EV/EBITDA	4.89x
Justified multiple = trailing x (1 + re-rating)	4.89x

LENS 1 — discounted cash flow	22.57
LENS 2 — relative multiples, on the trailing metric	16,258
LENS 3 — normalised earnings power, DISCOUNTED	5,030
LENS 4 — book value and sustainable return	4.70

CENTRAL — the cash-flow lens	22.57
against spot	67.2%
the retired 45/20/20/15 blend, published beside the answer an	16.34

ONE CLASS PRIMARY IS THE CENTRAL. The cash-flow lens is the answer; the relative, normali. above is kept visible and unused: three of the four lenses value a refiner on reported earnings an labelled a row "weighted central" and then took the minimum and maximum across all four lense two and a half times too wide.

is forward-dated and is therefore DISCOUNTED to the valuation date at the cost
1 uses. All formulas.

12.59		
2.775	12.98	
20.83%	1.52x	7.13

sed-earnings and book rows are cross-checks and the range across them is an ENVELOPE,
d historical-cost book, and averaging them into the answer imports every weakness of the
s, both of which came from the cash-flow lens alone, so the word "weighted" applied to the

of equity, with net

*not a spread around a weighted estimate. The blend on the row
weakest at a weight nobody tested out of sample. An earlier edition
centre and not to the ends and the published spread was about*

Assumptions — every driver, with the filing it was read from

Blue cells are the ONLY pasted values in this workbook. Every one is a figure read off a model re-run; those re-runs are now written out as live formula blocks on the Sensitivity

stated house judgement. There is no third class: the previous edition also pasted its sensitivity grids and its bear and driver here and watch every one of them move.

Source

AMOC closing price on the Egyptian Exchange, 3 September 2026

Issued and paid-up capital EGP 1,291,500,000 at EGP 1 par = 1,291,500,000 shares (note 18-L, share split in the Commercial Register 24-Jan-2018)

Net sales, six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025
Feb-2026

Cost of sales, six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025
18-Feb-2026

Net sales, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
attached (note 14-A / 15-A)

Cost of sales, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
report attached (note 14-A / 15-A)

Gross profit, six months to 30-Jun-2026 — 12.43% of net sales. Reviewed consolidated financial statements
2026 limited review report attached (note 14-A / 15-A)

General and administrative expenses, six months to 30-Jun-2026. Reviewed consolidated financial statements
Jun-2026 limited review report attached (note 14-A / 15-A)

Marketing and selling expenses, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
2026 limited review report attached (note 14-A / 15-A)

Other expenses, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
report attached (note 14-A / 15-A)

Formed provisions, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
review report attached (note 14-A / 15-A)

Expected credit losses formed, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
limited review report attached (note 14-A / 15-A)

Finance expenses, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
review report attached (note 14-A / 15-A)

Other operating income, six months to 30-Jun-2026, of which credit interest 134,944,385. Reviewed consolidated financial statements, six months to 30-Jun-2026
limited review report attached (note 14-A / 15-A)

Net profit after tax, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
review report attached (note 14-A / 15-A)

Non-controlling interest, six months to 30-Jun-2026. Reviewed consolidated financial statements, six months to 30-Jun-2026
limited review report attached (note 14-A / 15-A)

Majority's share, six months to 30-Jun-2026 — EPS 1.46, and MORE than the whole preceding fiscal year's EPS. Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Salaries inside cost of sales, TWELVE months to 30-Jun-2026 (note 15-A, both filed halves added). Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Raw materials inside cost of sales, TWELVE months to 30-Jun-2026 (note 15-A, both filed halves added). Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Supporting materials inside cost of sales, TWELVE months to 30-Jun-2026 (note 15-A, both filed halves added). Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Depreciation inside cost of sales, TWELVE months to 30-Jun-2026 (note 15-A, both filed halves added). Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Other cost of sales inside cost of sales, TWELVE months to 30-Jun-2026 (note 15-A, both filed halves added). Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Depreciation and right-of-use amortisation, TWELVE months to 30-Jun-2026 — the audited transition half's plus the reviewed half's. Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Payments for projects under construction and fixed assets, TWELVE months to 30-Jun-2026 — both cash-flows. Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Credit interest earned, six months to 30-Jun-2026 (note 14-B). Reviewed consolidated financial statements, six months to 30-Jun-2026, limited review report attached (note 14-A / 15-A)

Net sales, six months to 30-Jun-2026. Half-year results for 1-Jan to 30-Jun-2026, disclosed to the Egyptian Exchange 29-30 July 2026. REPORTED, NOT AUDITED — a press release, not a filing

Net profit after tax, six months to 30-Jun-2026. Half-year results for 1-Jan to 30-Jun-2026, disclosed to the Egyptian Exchange 29-30 July 2026. REPORTED, NOT AUDITED — a press release, not a filing

Gross profit, six months to 30-Jun-2026, AS RELEASED. This study does NOT use this figure: run through the 2026 expense run rates it implies a profit after tax about 12.6% above the profit the same release reports. The figure used is SOLVED from the release's own profit line, which two independent coherence tests confirm. Half-year results for 1-Jan to 30-Jun-2026, disclosed to the Egyptian Exchange 29-30 July 2026. REPORTED, NOT AUDITED — a press release, not a filing

Net sales, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Cost of sales, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

General and administrative expenses, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Marketing and selling expenses, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Other operating expenses, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Other revenue, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Provisions formed, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Expected credit losses formed, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Finance cost, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

General and administrative expenses, six months to 31-Dec-2025 (note 15-B). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Marketing and selling expenses, six months to 31-Dec-2025 (note 15-C). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Other operating expenses, six months to 31-Dec-2025 (note 15-D): compensation and fines 101,393,395, director board transport and attendance 2,225,414. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Provisions formed charged in the six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Fixed-asset depreciation and right-of-use amortisation charged in the six months to 31-Dec-2025, per the current previous edition modelled depreciation at 1.1% of revenue, about 440mn a year against an actual near 150mn. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Fixed-asset depreciation and right-of-use amortisation, Q1-2026. Reviewed consolidated FS, three months to 31-Mar-2026

CASH PAID for projects under construction and fixed assets in the six months to 31-Dec-2025. The previous edition modelled capital expenditure at 1.45% of revenue — about 649mn in the first forecast year — against an actual of 150mn. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cash paid for projects under construction and fixed assets, Q1-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Credit interest earned in the six months to 31-Dec-2025, per note 14-B and the cash-flow statement. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Credit interest earned in Q1-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Employees' profit share and board bonuses deducted in arriving at earnings per share (note 16). A real disbursement that the previous edition of this study did not model at all. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Net profit after tax, six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Non-controlling interest share of profit, six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Non-controlling interest share of profit, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Current income tax, six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Deferred tax CREDIT, six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Current income tax, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Deferred tax EXPENSE (negative = charge), three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Revenue from investments — dividend from Alexandria Specialized Petroleum Products Co (note 14-C). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025. Crowe unqualified, 18-Feb-2026

Sales value by product line, EGP, TWELVE months to 30-Jun-2026 — the audited transition half (note 14-A FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026) plus the reviewed half (note 14-B FS, transition period 1-Jan-2026 to 30-Jun-2026, Crowe unqualified, 18-Feb-2026) plus the reviewed half (note 14-A / 15-A). Foots to 14-B.

Cost of sales — RAW MATERIALS, six months to 31-Dec-2025 (note 15-A). 90.7% of cost of sales and 85.1% of sales value. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — salaries, six months to 31-Dec-2025 (note 15-A). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — other expenses, six months to 31-Dec-2025 (note 15-A): natural gas, operating electricity, spare parts, maintenance, and the operating management and technical support contract with the Egyptian Project Maintenance Company (EPROM). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — supporting materials (chemicals and additives), six months to 31-Dec-2025 (note 15-A). The company estimated this charge at roughly five times the disclosed figure

Cost of sales — depreciation, six months to 31-Dec-2025 (note 15-A). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Fixed assets net of accumulated depreciation at 30-Jun-2026 (note 6). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Fixed assets at COST at 31-Dec-2025 (note 6), before accumulated depreciation of 1,847,794,418. The gross replacement-capex line has to be built on; the net figure is what the terminal return is flattered by. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Projects under construction at 30-Jun-2026 (note 7). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Inventory net of impairment at 30-Jun-2026 (note 9-A). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Accounts receivable net at 30-Jun-2026 (note 9-B). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Debtors and other debit balances net at 30-Jun-2026 (notes 9-C, 9-D). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Accounts and notes payable at 30-Jun-2026 (note 10-3). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Creditors and other credit balances at 30-Jun-2026 (note 11). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Dividends payable at 30-Jun-2026 (note 11) — HALF the 517,250,000 standing six months earlier, because the other half was largely paid. Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Provisions at 30-Jun-2026 (note 10-1) — a recognised liability, carried in full in the bridge. Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Cash and cash equivalents at 30-Jun-2026 (note 9-E). UP from 2,463,522,365 six months earlier AFTER paying dividends. Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Other financial investments at 30-Jun-2026 — deposits PLEDGED against facilities, not free cash. Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Financial asset through OCI at 31-Dec-2025 — 104,000 shares, 5.20% of ASCPC, fair value 69,608,696 (note 10-2). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Long-term loans at 30-Jun-2026 (note 20). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Short-term loans and facilities at 30-Jun-2026 (note 20). Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Total AMOC (parent) equity at 30-Jun-2026 — EGP 4.70 a share, against 4,790,695,948 six months earlier. Audited consolidated FS, six months to 30-Jun-2026, limited review

Non-controlling interest carrying amount at 30-Jun-2026. Reviewed consolidated FS, six months to 30-Jun-2026, limited review

Egypt corporate income tax 22.5%. AMOC is a downstream processor and is taxed at the ordinary corporate rate that applies to exploration and production concessions

Pass-through factor on the raw-material line: 1.0 means the feedstock charge moves one-for-one with real prices. The gross SPREAD per tonne is held flat in real terms and the margin neither widens nor narrows by assumption. 1.0 is the way to express spread widening; the study leaves it at parity and sensitises it

Terminal growth, 7% — INFLATION ONLY, and no real growth at all. It is set equal to the central bank's p which is the same 7% embedded in this study's own terminal risk-free rate. The previous edition used 5% 12.5% nominal rate, which is a business shrinking about 2% a year in real terms for ever — an assumption a plant serving a population growing 1.6% a year. Zero real growth is still the conservative end: it assumes grows a tonne

Sustainable return on equity for the book lens. Trailing return on average parent equity is about 33%; the struck below it because the reported figure is flattered by a heavily written-down asset base that will have

Justified through-cycle price-to-earnings multiple on normalised earnings. Trailing is about 7.5x on the cor single-asset processor with a 20% state shareholder, an administered feedstock relationship and an Egypt 28% does not earn a premium multiple. Bear 5.5x / bull 9.5x

Re-rating applied to the company's OWN trailing enterprise-value to EBITDA multiple in the relative lens. at the multiple the market already pays it. The justified multiple is no longer a free number — it is DERIVE multiple times one plus this figure, so it cannot drift away from the company's own pricing without the dri previous edition set 4.5x by hand and justified it as 'holding the name at its own trailing level' against a sta 'around 4.6x'; the model's own output was different, so the stated justification was false whichever way the Holding at zero re-rating makes the lens a statement about the BRIDGE — what the disclosed claims on the rather than a dismissed view on the multiple

Processing intensity by product line, relative weights, used to allocate the note 15-A conversion stack (sal materials, other, depreciation) across the eight disclosed lines. Base oils are the reference at 1.00: they pa vacuum distillation, solvent extraction, dewaxing, hydrofinishing. Paraffin wax carries 1.15 for the addition steps. Gas oil, naphtha and LPG are light ends drawn off the front of the process and carry 0.25/0.20/0.15. oil are the residue, sold substantially as produced, at 0.05. THIS IS THE ONLY OPERATING INPUT IN TH READ OFF A FILING, and it exists because note 15-A discloses the cost stack for the company and not by rather than hidden in a formula, and the valuation is sensitised to it

The five annual totals have the same footing and are ESCALATED rather than removed, because the bear case is anchored to them. FLAT ASSUMPTION HERE, IT IS ALREADY THE OPTIMISTIC ONE: the base year is the transition half annualised tonnes, which is 12.5% ABOVE the five-year mean of 1,437 and above every full year in the record. Holding rebound printed in one half persists. The bear case cuts tonnage harder than that mean requires and the line

Volume growth by audited product line: FLAT, every line, every year. The previous edition grew every line fuel oil +3.0% in year one) and justified the ranking from the value growth printed between two disclosed own audited annual record for FY2021-FY2025 says the opposite: total sales tonnage ran 1,492 / 1,548 / 1,548 thousand tonnes, a fall of 18.5% from the FY2022 peak, and six of the eight lines shrank over FY2022-FY2025 grew. THE PER-LINE COMPOUND RATES ARE NO LONGER PRINTED [08-09-2026]. This note used to give a decimal place, and NOTHING IN THIS REPOSITORY CARRIES THE SERIES THEY COME FROM: the three two December-2025 statements and one June-2025, note 14-A gives one half's tonnage by line with a value FY2022 to FY2024 per-line tonnage is in filings this study does not hold. The prose check caught one of the three were unflagged rather than verified. A figure this desk cannot source is a figure it does not print, so — six lines down, two up, and that is what the argument needs — and the decimals go. The five annual totals have the same footing and are ESCALATED rather than removed, because the bear case is anchored to them. This note used to give a decimal place, and NOTHING IN THIS REPOSITORY CARRIES THE SERIES THEY COME FROM: the three lines from two December-2025 statements and one June-2025, note 14-A gives one half's tonnage by line with a value for FY2022 to FY2024 per-line tonnage is in filings this study does not hold. The prose check caught one of the three were unflagged rather than verified. A figure this desk cannot source is a figure it does not print, so — six lines down, two up, and that is what the argument needs — and the decimals go. The five annual totals have the same footing and are ESCALATED rather than removed, because the bear case is anchored to them. FLAT ASSUMPTION HERE, IT IS ALREADY THE OPTIMISTIC ONE: the base year is the transition half annualised tonnage, which is 12.5% ABOVE the five-year mean of 1,437 and above every full year in the record. Holding the rebound printed in one half persists. The bear case cuts tonnage harder than that mean requires and the line is

Cumulative-year Egyptian inflation factors applied to the pound-denominated cost legs — salaries inside cost of line, administrative and marketing expense, and capital expenditure. The three HISTORICAL years are as the FORECAST years are the single Egyptian inflation path this series uses for every Egyptian company it values rather than set for this study: no valuation here sets an inflation rate of its own, because a company cannot value the economy the study beside it does not recognise. The path is the central bank's published disinflation ladder and published points are labelled as interpolated where they are

Cumulative-year Egyptian inflation factors applied to the pound-denominated cost legs — salaries inside cost of line, administrative and marketing expense, and capital expenditure. The three HISTORICAL years are as the FORECAST years are the single Egyptian inflation path this series uses for every Egyptian company it values rather than set for this study: no valuation here sets an inflation rate of its own, because a company cannot value the economy the study beside it does not recognise. Egypt 10-year local-currency government bond yield, 22.31% (house cost-of-capital reference, cached 21-Jan-2026)

Egypt credit-default-swap-implied sovereign default spread, Damodaran January-2026 country-premium file, 22.31% — out of the local-currency risk-free rate so sovereign default risk is not charged twice

Damodaran original country-premium file, Egypt row, CDS column, last updated 5 January 2026 — total cost of capital

Own-stock tier-1 regression, AMOC weekly log-returns against raw_indices/EG/EGX30.csv — the published AMOC is listed on, series as of 2026-09-08, resolved by beta_regression.own_stock_beta() rather than hand-calculated. $\beta = 0.236$, $n = 256$, standard error 0.175, 90% confidence interval [0.619, 1.193]. Passes the usability gate. The previous edition's 0.9405, which was regressed against a 33-name equal-weight composite of the covered companies, is a coverage artefact rather than a market, and a source-integrity failure whatever number it produced. The company name and it is made because the provenance was wrong, not because the answer was.

Yield earned on the cash pile. Egyptian treasury bills and corporate deposits price a few points under the 20% — the 20% withholding on interest

Marginal cost of debt: the Egyptian ten-year sovereign yield this study discounts with, plus a 200bp corporate borrowing premium. The book is EGP 25mn — 0.06% of revenue — of short-dated Egyptian-pound facilities, so no observable marginal cost of debt. The rate is built rather than pretended to be observed. It replaces a build off the 20.00% corridor lending rate, which is below the sovereign, which a same-currency corporate cannot be. The integrity gate below computes WORTH to the answer

The central bank's own stated inflation target, 7% (+/-2pp) on average for the fourth quarter of 2026, falling to 5% in the fourth quarter of 2028

Terminal real risk-free rate. It is NOT set by this study: it is read from the single long-run view of the Egyptian economy. The study in this book discounts on, so one company cannot quietly hold a different one. The terminal NOMINAL rate is an input either — it is that same shared view's own figure, this real rate plus the central bank's inflation target, or the terminal horizon — so the single most terminal-value-sensitive number in the model can be set neither by the company nor by the study alone. TWO EDITIONS OF THIS LINE ARE RETIRED. The first hardcoded 10.50% by adding 5.5pp to the 5% target, while describing it as 'the' medium-term target. The second, adopted 06-Aug-2026, derived the rate corrected for inflation convention typed into this file, so when the house convention moved from 5.5% to 3.5% — the retired figure was 10.50% policy stance rather than a long-run real rate — this study went on discounting at 12.50% while every company went on at 10.50%. Two readers of one economy must not disagree

Terminal equity risk premium, normalised below the currently elevated crisis-era level toward the rating-agency level, flat into perpetuity

Terminal cost of debt: the midpoint of the 14-16% long-run Egyptian corporate-borrowing norm, with no normalisation deviate

Terminal debt weight, normalised. The company is net cash today and has been for years; a terminal structural debt weight in capital in debt is already generous to the valuation and avoids capitalising the current zero-leverage position

Forward cost-of-debt path 2026E-2030E, following the central bank's own disinflation path toward the long-run corporate-borrowing norm. This path is what sets the SHAPE of the cost-of-capital glide; it is not a second-guess

Forward cost-of-debt path 2026E-2030E, following the central bank's own disinflation path toward the long-run corporate-borrowing norm. This path is what sets the SHAPE of the cost-of-capital glide; it is not a second

Terminal return on invested capital, at REPLACEMENT cost	46.24%
Required reinvestment = growth / return	15.14%
Terminal value	44,926
PV of the terminal block	18,411
ENTERPRISE VALUE	27,719
plus net cash	3,002
Enterprise value including cash	30,720
less minority — on the WHOLE enterprise, cash included	910
less the tax-disputes provision	997
less dividends payable — declared, out of working capital	258
plus non-operating investments and pledged deposits	595
EQUITY ATTRIBUTABLE	29,150
VALUE PER SHARE, EGP	22.57

1, in formulas

and its builder could not express a re-run inside a grid. Three of the pasted rows volume row whose label described a different scenario from the one it ran. None

Per share, and the multiples the answer implies

What the central and the market price each imply, on the same base-year figures. E

Central, EGP

Market price, EGP

Book value per share, EGP

Base-year revenue per share, EGP

Base-year EBITDA per share, EGP

Dividend declared and payable, per share, EGP

Multiple

Price / book

Enterprise value / base-year EBITDA

Enterprise value / base-year revenue

Yield on the dividend already declared and payable

RETURNS

Trailing return on equity

Terminal return on invested capital, at replacement cost

Required reinvestment rate in the terminal year

Terminal growth

every cell is a formula off the Summary and Income Statement sheets.

Sector context — a refiner and lubricant base-oil producer

The comparator basis is the company's OWN traded multiple and a stated re-rating, EGP valuation would price a different cost of capital. That is a gap and it is named a

Comparator basis

The company's own trailing enterprise value / EBITDA

Justified multiple, after the stated re-rating

WHAT ACTUALLY DRIVES A PROCESSOR

Indicator

Throughput, million tonnes

Gross profit per tonne, EGP

EBITDA per tonne, EGP

Gross margin

Capital expenditure as a share of revenue

The crude slate is bought from a single counterparty at a disclosed formula and the refined price is set by a market clearing mechanism — not a price/earnings ratio struck on a different tax regime and a different currency

cer

not a peer set: no Egyptian listed refiner discloses a comparable base-oil split, as is one rather than filled.
