

READ FIRST

What this workbook is

THE WORKBOOK CALCULATES

Pasted cell class 1 of 4 — audited and disclosed history

Pasted cell class 2 of 4 — the unit build's output

Pasted cell class 3 of 4 — whole-model re-runs

Pasted cell class 4 of 4 — the measured-error multipliers

Blue means input, black means formula

The contested judgement is carried both ways

Currency and units

Basis and date

Egyptian International Pharmaceutical Industries Company (EIPICO)

An educational valuation model of a listed Egyptian pharmaceutical manufacturer, built from the company's statements. It is not investment advice, it contains no rating and no price target, and it expresses value as a

Every figure that can be derived from a driver is a live formula. Change a driver on the Assumptions sheet and the glide, the discount factors, the cash-flow waterfall, the terminal block, the three statements, the bridge. This claim is tested, not asserted: a driver test perturbs each input in place, re-evaluates the whole workbook, and the headline moves in the right direction.

The FY2023, FY2024 and FY2025 columns of the Income Statement, Balance Sheet and Cash Flow sheets, and operating statistics on Segments. Where a line is both disclosed and derivable, the DISCLOSED figure is carried over from the pasted cell.

The FY2024 and FY2025 pack volumes and realised prices per pack on the Segments sheet. These come from disclosed pack counts against the revenue note's channel split; flattened into a grid the reconciliation would be a formula. Everything downstream of them — every forecast year — is a formula.

The Monte Carlo percentile map and touch ladder, and the Sensitivity grids. Each of those cells is a COMPLETE model at a different input, or a full 50,000-path simulation. THEY DO NOT REDRAW WHEN A DRIVER CHANGES. The formula on those two sheets is a formula.

The factors behind the far-year ranges at the foot of the Income Statement sheet. They are a measurement of how our own projections have landed from what the company later reported, so they are an observation and not something to derive. The ranges they produce ARE formulas and move with the projection above them.

Blue type is a pasted number. Black type is calculated in the sheet.

The credit-loss and provision charge is the study's single most consequential contested judgement. Frame A treats it as a cost of doing business; Frame B treats it as normalising. Both run all the way through to a value per share and a price. They are never averaged into one number.

Egyptian pounds. Money in millions unless a row says otherwise; per-share figures in pounds; packs and units in millions.

Audited CONSOLIDATED financial statements. Share price 127.30 at 2026-09-03; 168.755750 million shares outstanding as of 31 December.

SUMMARY VALUATION TABLE	EGP / share
Discounted cash flow — Frame A	101.42
Discounted cash flow — Frame B	121.61
Book value and sustainable return	82.66
Relative multiples	61.57
Normalised earnings power	84.33
CENTRE — FRAME A (the cash-flow lens, unweighted)	101.42
CENTRE — FRAME B (the cash-flow lens, unweighted)	121.61
Field low to field high	61.57
Market price	127.30

KEY FIGURES	
Market capitalisation (EGP mn)	21,483
Net debt (EGP mn)	7,364
Enterprise value (EGP mn)	28,851
FY2025 revenue (EGP mn)	9,441
FY2025 EBITDA (EGP mn)	2,484
FY2025 attributable profit (EGP mn)	1,442
Trailing price / earnings	14.9x
Trailing enterprise value / EBITDA	11.6x
Cost of equity	25.92%
Weighted average cost of capital, year one	23.04%
Terminal weighted average cost of capital	14.36%
Terminal value as a percentage of enterprise value	81.0%
Dividend per share proposed for FY2025 (EGP)	3.50
Dividend yield at the market price	2.7%

Against the market price	Note
-20.3%	<i>Terminal value 81% of core enterprise value, 71% of total</i>
-4.5%	<i>Terminal value 81% of core enterprise value, 72% of total</i>
-35.1%	<i>Justified 2.23 times book</i>
-51.6%	<i>Three multiples averaged on the sheet</i>
-33.8%	<i>Three-year average margin</i>
-20.3%	<i>A range, not a target. No rating is expressed anywhere in this workbook.</i>
-4.5%	<i>TWO CENTRES, NEVER AVERAGED INTO ONE. Which one you use is a judgement about the debtor book, and it is yours to make rather than ours to bury.</i>
121.61	

Lens	Value (EGP/share)
Discounted cash flow — Frame A (provision charge permanent)	101.42
Discounted cash flow — Frame B (provision charge normalising)	121.61
Book value and sustainable return	82.66
Relative multiples	61.57
Normalised earnings power	84.33
CENTRE — FRAME A (the cash-flow lens, unweighted)	101.42
CENTRE — FRAME B (the cash-flow lens, unweighted)	121.61
Memo — the retired weighted blend this edition replaced, on Frame A	89.13
Low of the field	61.57
High of the field	121.61
Market price	127.30
Market price relative to the Frame A centre	25.5%
Market price relative to the Frame B centre	4.7%

Weight	How it is built
50.0%	<i>Five explicit years of free cash flow to the firm, discounted on a glide from the current to the terminal cost of capital, plus a terminal value on the growth-over-return reinvestment identity.</i>
50.0%	<i>The identical model with the single contested judgement resolved the other way. Published beside Frame A, never averaged into it.</i>
20.0%	<i>Book value per share multiplied by (sustainable return less growth) over (perpetual cost of equity less growth). EVERY term is live: the sustainable return reads the forecast return-on-equity path, and the perpetual cost of equity reads beta, the terminal risk-free rate and the terminal premium.</i>
15.0%	<i>Three lenses triangulated ON THE SHEET, EACH APPLIED TO THE EARNINGS OF ITS OWN PERIOD — the forward multiple this model's own economics justify on forward earnings, and the company's own four-year mean and a cost-of-equity-adjusted struck peer reference on trailing earnings.</i>
15.0%	<i>The three-year average operating margin applied to forecast revenue, capitalised at the perpetual cost of equity on the payout that the growth rate permits.</i>
	<i>The centre of each frame IS its own cash-flow read. The three lenses that do not turn on the contested judgement are published beside it and averaged into neither.</i>
	<i>THE TWO CENTRES ARE NOT AVERAGED. One number covering both frames is a straight average of them, which is exactly what this study says it never does.</i>
	<i>Printed so the change is visible rather than only described. Its weights had never been tested out of sample, and one of the four readings it carried is not a lens this class uses at all.</i>

Board report, capital and shareholders table

Board report

Audited — the capital increase completed during the year

Board report, eleven-year profit table

Capital note (13): issued capital of EGP 1,687,557,500 at EGP 10 nominal a share

Egyptian statutory rate

Above statutory to allow for the solidarity contribution and disallowed items

Not capacity-constrained at 65% utilisation

Hard-currency export growth was 10% in FY2025

Administered prices track inflation, no real gain

Competitive generic export pricing

Small line, idle-capacity utilisation

Partial real-rate reversal as domestic inflation converges

Cost of sales note (26)

Cost of sales note (26)

Cost of sales note (26), wages plus benefits plus social insurance

Cost of sales note (26)

Cost of sales note (26)

disclosure — the audited split is shown for completeness, but depreciation is EXCLUDED from the escalated unit cost by design and enters exactly once, from the property roll-forward. This row drives nothing and is meant to drive nothing

Applied THROUGH the exchange-rate path, never a domestic index

The balance is made in-house

Minimum-wage resets run above consumer prices

Subsidy reform, ABOVE consumer prices

Applied only to genuinely domestic lines

Disclosed 12.9% -> 12.4% -> 10.7%

Rising with the biosimilar pipeline

Held near the FY2025 level

Permanent, at the three-year average

Normalising as the book seasons

Falls as the construction cycle completes

The plant was licensed in December 2025 and enters service

About a sixteen-year blended life

An eight-month strategic stockpile, stated policy

Distributor-concentrated book plus export terms

Audited FY2025 implies 54 days

EGP 3.50 a share proposed for FY2025 on attributable profit

House cost-of-capital reference print

Country risk-premium file, Egypt row, read live

Same file, same row

Same file — the alternative

Same file — the alternative

Own-stock weekly regression against a 36-name local composite, five years; R-squared 0.235, n = 257

Sovereign yield plus 250 basis points

Dollar and euro term loans

Carries foreign-currency debt at its LOCAL-EQUIVALENT cost

Borrowings note (17), by lender and currency

NOT a cost of debt: the first point is the normalised risk-free rate. Only the SHAPE of this row enters the model — the discount-rate glide rebases it to its own endpoints, so the levels cancel

What the profit and loss account actually bears — NOT the marginal cost of debt above. Calibrated to the first quarter of 2026

<i>A sourced 5% medium-term inflation target plus an UNSOURCED 5.5-point real convention. The real leg is an assertion, it is the widest single lever in the study, and it is an open item — see the terminal grid</i>
<i>Normalised toward the rating-class norm</i>
<i>Long-run Egyptian norm</i>
<i>Long-run norm</i>
<i>Today's net debt over market capitalisation plus net debt. Not an assumption; the earlier edition's 20% was neither this nor the book reading below</i>
<i>disclosure — the BOOK reading, published beside the market reading above rather than chosen between in silence. The valuation uses the market reading, because a weighted average cost of capital weights market values: this row drives nothing</i>
<i>Pound-nominal, against a 5% terminal inflation rate — about zero in real terms</i>
<i>Three disclosed years, reconciled to this model's own income statement: 74.508, 151.581, 512.085 — mean 246.058. The first quarter of 2026 annualises to 52.5, but the auditor states two holdins' statements were not received so that quarter is evidence, not a run-rate</i>
<i>Below the Gulf listed range for a minority, unlisted, non-controlled stake</i>
<i>MARKET DATA, cross-check layer. The MIDPOINT of the only two disclosed observations (26.7x and 16.0x) — NOT a median of a peer set, and the peers are not named, so it cannot be rebuilt from their filings</i>
<i>The ONE difference the peer multiple is adjusted for, registered here rather than typed inside the adjustment so a reader can see what the adjustment is made of</i>

Return on average equity, FY2030E	27.80%
Sustainable return — the mean of the last three forecast years	27.11%
Payout the growth rate permits = 1 less growth over the sustainable return	74.2%

FY2026E attributable earnings per share — Frame A	8.03
FY2026E attributable earnings per share — Frame B	8.42
Average of the two frames — the FORWARD earnings base	8.22
TRAILING attributable earnings per share, FY2025, on the count in issue today	8.54

THE COMPANY'S OWN TRADED MULTIPLE HISTORY	
Year	Year-end close
2022	28.08
2023	36.50
2024	45.91
2025	77.50
Four-year mean	
Trailing multiple today — on the share count IN ISSUE	127.30

Trailing multiple today — on the AUDITED WEIGHTED-AVERAGE count for FY2025	127.30
--	--------

THE THREE MULTIPLES, EACH ON THE EARNINGS OF ITS OWN PERIOD	
Justified forward multiple from this model, on FY2026E earnings	8.24x
The company's own four-year mean multiple, on trailing earnings	6.57x
Struck peer reference, cost-of-equity adjusted, on trailing earnings	7.12x
AVERAGE OF THE THREE — the relative lens	7.31x

NORMALISED EARNINGS POWER	
Three-year average operating margin	22.9%
FY2027E revenue	13,825
Normalised operating profit	3,166
Normalised earnings per share	10.23
Payout the growth rate permits	74.2%
NORMALISED EARNINGS POWER VALUE	84.33

Value (EGP/share)	Note
-------------------	------

The forecast path RISES through the window rather than settling, so the sustainable return is the mean of its last three years — read from the path here, never typed

Averaging the two frames' EARNINGS is not averaging the two VALUATIONS: the frames are published as two separate centres and are never averaged into one

The base for the two TRAILING multiples below. A trailing multiple applied to forward earnings would mismatch the periods

Attributable EPS	Price / earnings
5.92	4.74x
5.53	6.60x
7.37	6.23x
8.90	8.71x
	6.57x
8.54	14.90x

8.90	14.31x

67.77	<i>A FORWARD multiple, applied to FORWARD earnings — built from this model's own sustainable return and perpetual cost of equity</i>
56.15	<i>A TRAILING multiple, applied to TRAILING earnings — year-end closes against audited attributable profit, each year on its own weighted-average share count</i>
60.80	<i>A TRAILING multiple, applied to TRAILING earnings. The midpoint of the two disclosed observations, not a median of a peer set; those companies face a cost of equity near 10%, not this one</i>
61.57	

*TWO SHARE
COUNTS,
BOTH
PUBLISHED.
The capital
increase
from
148.755750
to
168.755750
million
shares
completed
during
FY2025, so
that year
has a
weighted-
average
count of
162.016024
million and a
closing
count of
168.755750
million. Both
readings of
the trailing
multiple are
legitimate;
neither is
stated alone.*

EGP million	FY2026E	FY2027E
Revenue	11,442	13,825
EBITDA	3,022	3,666
EBITDA margin = EBITDA / revenue	26.4%	26.5%
Less depreciation and amortisation	-304	-425
EBIT = EBITDA less depreciation and amortisation	2,718	3,241
Tax rate — the EFFECTIVE rate the business bears, not the statutory rate	23.50%	23.50%
NOPAT = EBIT x (1 less the tax rate)	2,079	2,479
Add back depreciation and amortisation	304	425
Less capital expenditure	-1,430	-622
Less the increase in working capital	-1,114	-1,133
FREE CASH FLOW TO THE FIRM	-161	1,149
Discount rate	23.04%	20.71%
Discount factor	0.8128	0.6733
PRESENT VALUE OF FREE CASH FLOW TO THE FIRM	-131	773

TERMINAL BLOCK	
Invested capital at FY2030E — property, construction, working capital and intangibles	20,644
Return on invested capital, FY2030E — the model's OWN, read from the rows above	19.17%
Terminal depreciation catch-up — the parked construction balance at the depreciation rate	213
Terminal NOPAT, on FY2030E money = final-year NOPAT less the depreciation the parked construction balance has never been charged. It is NOT grown here: the terminal value row below grows the whole free cash flow one year	3,794
Plus book depreciation (terminal NOPAT is already net of it)	423
Less maintenance at current cost — book depreciation escalated over half the useful life the company itself discloses	-675
Less the capital behind real growth	0
Less inflation on working capital	-755
Terminal free cash flow to the firm	2,787
Terminal discount rate	14.36%
Terminal growth	7.0%
TERMINAL VALUE — the free cash flow above, grown one year and capitalised	40,533

Present value of the terminal value	17,403
--	---------------

Sum of the present values of forecast free cash flow	4,089
CORE ENTERPRISE VALUE	21,492
Terminal value as a percentage of CORE enterprise value	81.0%
Terminal value as a percentage of TOTAL enterprise value (both are published)	71.1%

FRAME B — THE SAME MODEL WITH THE CONTESTED JUDGEMENT RESOLVED THE OTHER WAY

EBIT on Frame B = Frame A EBIT plus the difference in the provision charge	2,803	3,441
NOPAT on Frame B	2,145	2,632
Free cash flow to the firm on Frame B	-96	1,302
Present value of free cash flow on Frame B	-78	877
Return on invested capital, FY2030E — Frame B's own	21.30%	
Terminal NOPAT on Frame B, on FY2030E money, less the parked construction depreciation — not grown here, for the same reason as Frame A	4,233	
Terminal free cash flow on Frame B — the same construction as Frame A: NOPAT plus book depreciation, less maintenance at current cost, less growth capital, less inflation on working capital	3,227	
Terminal value on Frame B	46,932	
Core enterprise value on Frame B	24,900	
VALUE PER SHARE ON FRAME B	121.61	

FY2028E	FY2029E	FY2030E	Terminal
16,179	18,523	20,911	
4,307	4,933	5,595	
26.6%	26.6%	26.8%	
-446	-437	-423	
3,861	4,496	5,172	
23.50%	23.50%	23.50%	
2,953	3,439	3,957	
446	437	423	
-566	-593	-627	
-942	-944	-911	
1,891	2,340	2,841	
18.17%	16.05%	14.36%	
0.5698	0.4910	0.4294	
1,078	1,149	1,220	

This is what sets terminal reinvestment. It is not an assumption and there is no cell to type it into.

Construction still parked at FY2030E has never entered the depreciable base. A perpetuity cannot capitalise profit on capital it never charges.

4,192	4,950	5,747

Profit attributable to the holding company	822	1,096
Earnings per share (EGP)	5.53	7.37

YEARS THREE TO FIVE AS RANGES — the method replayed on this company's own past, year by year, and scored against what was later reported

MULTIPLY the projection by the factor: above one means the outturn came in ABOVE the projection. The basis is a SPAN — the widest and the narrowest of the readings behind it, never a percentile.

Revenue — low of the range

Revenue — high of the range

Cost of sales — low of the range

Cost of sales — high of the range

Gross profit — low of the range

Gross profit — high of the range

Profit for the year — low of the range
Profit for the year — high of the range
Depreciation and amortisation — low of the range
Depreciation and amortisation — high of the range
<i>The fourth and fifth forecast years carry no measured range: the replay covers three years ahead and no further, and none is invented for them.</i>

	ZERO IN EVERY FORECAST COLUMN, BY CONSTRUCTION — gross borrowings are the funding plug. The earlier edition never computed this row at all and its forecast columns were out by up to 6.6% of total assets. The three audited columns carry small residuals (-4.1, +0.2, +0.4 on assets of 10.0bn to 18.3bn, under 0.05%) from grouping the filed statement into these line captions; they are shown rather than suppressed.

Peer multiples are MARKET DATA and sit in the cross-check layer. No pe	
Listed Saudi Arabian generics manufacturer	26.70x
Regional and international generic manufacturers, mid-cap	16.00x
STRUCK REFERENCE USED — the midpoint of the two above	21.35x
The subject company today	14.90x
The subject company's own four-year mean	6.57x
Discount of the subject to the struck reference	-30.2%

SECTOR OPERATING BENCHMARKS (the subject, computed here)

Gross margin, FY2025	44.0%
EBITDA margin, FY2025	26.3%
Return on average equity, FY2025	26.5%
Capacity utilisation, FY2025	65.3%
Cash conversion cycle, FY2025 (days)	343
Export share of revenue, FY2025	31.4%

Basis	Provenance
Peer figure is used to build any historical number for the subject company.	
Trailing price / earnings	Public-comparables service, 2025 basis — cross-check only. This company is not named and its financial statements are not published here, so this multiple cannot be rebuilt from its filings
Trailing price / earnings	Range observed across the peer set — cross-check only
Trailing price / earnings	NOT a median of a disclosed peer set: two observations have a midpoint, and this cell computes it. The lens runs a 13-26 times band around it
Trailing price / earnings	Computed in this sheet from the audited attributable profit and the market price
Trailing price / earnings	Computed from year-end closes and audited profit — entirely primary
	The peers face a cost of equity near 10%; this company's perpetual cost of equity is 14.9% and its current cost of equity 24.8%. The discount is not an anomaly to be closed.
