

Testahil — Emirates Integrated Telecommunications Company PJSC (DFM: DU)

Companion model · Independent Valuation Study · Educational analysis · Not investment advice

What this workbook is. A transparent companion to the du valuation study. Every blue cell is an input; every black cell is a formula; green cells link across sheets.

IT IS FORMULA-DRIVEN. Every figure that can be derived arithmetically from a driver is a live formula, so you can change a blue cell on Assumptions and watch the model reprice: the cost of capital is built from the risk-free rate net of the sovereign spread, beta and the premium rather than pasted; the discount factors compound from the glide; and the income statement, balance sheet, cash flow, ratios and all four lenses chain off the same cells.

THREE THINGS ARE PASTED VALUES, and it is worth knowing exactly which. First, audited and disclosed history — the primary record, not a calculation. Second, the unit build's output: forecast revenue for the four segments the company itself discloses (Mobile, Fixed, Wholesale, ICT and associated telecom services). Mobile and Fixed are built bottom-up as subscribers x ARPU — the driver table is shown on the Segments sheet — and Wholesale and ICT are grown at segment level because the company discloses no unit KPIs for them; only the build's OUTPUT (segment revenue per year) is pasted, and everything downstream of it is formula. Third, whole-model engine outputs, where each figure is a complete re-run of the entire valuation and so cannot be a single formula: the Monte Carlo price map, the sensitivity grids, and the DCF scenario bear/bull bounds. Everything else — including every lens base value, the relative/normalised/book bear and bull bounds, and the anchor-date roll — is a live formula. Changing a driver reprices the model but does NOT redraw the engine outputs.

How revenue is built. Not as one growth rate. Mobile = average subscriber base x blended ARPU x 12; the subscribers-x-ARPU frame reproduces the audited FY2025 mobile segment to within 0.1%. Fixed = subscriber base x implied revenue per subscriber (a consumer-plus-enterprise blend, so an intensity metric, not a tariff). Wholesale and ICT are grown on their own paths — the war-hit roaming/transit recovery and the data-centre ramp respectively. Contribution margins are the audited Note 38 rates; the opex stack below them carries ONE escalator per cost class. Group EBITDA margin is an OUTPUT of all of this, not an input.

The contested judgement — the required return. This is the one judgement that moves the answer more than any other, so it is computed BOTH WAYS on the Fundamental Valuation sheet and never averaged. Framing 1 takes du's own measured beta and capitalises the terminal at the Gordon rate. Framing 2 refuses the re-rating that implies and holds du's CURRENT trailing EV/EBITDA into perpetuity instead. The gap between them is the study, and it is published, not resolved. (The post-2026 fiscal regime was the prior edition's contested judgement; it is no longer contested — du disclosed the 2027-2029 extension itself on 24 July 2026 on the same structure, with the AED 1.8bn combined floor retained. A reversion after 2029 is still priced, as a named tail, on the same sheet.)

What it is not. It is not investment advice, a recommendation, or a price target. Values are model outputs shown as ranges.

Sourcing note, up front. FY2023, FY2024 and FY2025 all come from the company's own audited consolidated financial statements read from investors.du.ae, and H1-2026 from the KPMG-reviewed interims — every income-statement, balance-sheet and segment line is the filed figure. Segment revenue ties EXACTLY to consolidated revenue in every year (Note 38). du carries ZERO drawn borrowings in every year studied; the only debt-like item is IFRS-16 lease liabilities, and the bridge treats them as debt. Every input is annotated where it appears and listed with source and date in the companion bibliography document.

Leases are debt, and charged once. du has no drawn borrowings; its only debt-like item is the IFRS-16 lease liability. That liability is deducted in the enterprise-to-equity bridge and carries a debt weight in the cost of capital, so NO lease charge belongs in the cash-flow waterfall as well — perpetual renewal is already paid for in the terminal, where invested capital includes the right-of-use asset and terminal reinvestment maintains it. The right-of-use book is held flat because a new lease creates an asset and a liability together and is non-cash.

Discount convention, stated. Each explicit year is discounted at its own forward cost of capital, at full-year END-of-period factors, gliding 6.41% -> 6.17% on the AED risk-free path (du has no debt whose cost could define the glide); the terminal value, a value dated at the end of year five, is discounted at the year-five factor. A mid-year convention would raise the answer and is not adopted.

One date, one price of time: the bridge is dated 31-Dec-2025 and rolled to the 07-Aug-2026 anchor at the cost of equity, net of the AED 0.66 of dividends whose EX-dates fall in that window (the 0.40 final, paid 28-Apr-2026, and the 0.26 interim, ex 31-Jul-2026).

Currency. AED million unless stated. Spot AED 12.30 (2026-08-07 close). Balance-sheet and bridge anchors

Lease liabilities at FY2025 (AED mn, audited — the only debt-like item)	1,939
Cash and term deposits at FY2025 (AED mn, audited)	2,250
Equity-accounted investees at carrying value (AED mn)	0.5
Forecast dividend payout ratio (FY2024 actual 98%, FY2025 ~100%)	98.0%
Yield on cash and term deposits (audited FY2025 effective)	3.3%
Lease interest rate (audited FY2025 effective)	3.6%
Dividends gone ex between 31-Dec-2025 and the anchor (AED/share)	0.66
Days from the 31-Dec-2025 valuation date to the 07-Aug-2026 anchor	219

Lens inputs

Justified price/earnings (GCC telecom peer median)	12.90x
Peer benchmark dividend yield	4.9%
Sustainable return on equity	27.0%
Weight — discounted cash flow	45.0%
Weight — relative	25.0%
Weight — normalised	20.0%
Weight — book	10.0%

Enterprise value to equity — the bridge

du has no drawn borrowings and no minority interests: the bridge is leases out, cash and deposits in

Step	AED mn	Per share (AED)	
Present value of the five forecast years		13,622	3.01
Present value of the terminal value		68,235	15.05
Enterprise value		81,857	18.06
Less lease liabilities (the only debt-like item)		(1,939)	(0.43)
Plus cash and term deposits		2,250	0.50
Plus equity-accounted investees at carrying value		1	0.00
Equity value		82,168	18.13

Terminal value as a share of enterprise value 83.4%

No minority interests: every subsidiary is wholly owned (the two H1-2026 Cayman SPVs are 100%-held); non-controlling interests do not appear on the audited balance sheet.

Segments — the unit build and the margin stack

FY2025 disclosed revenue and contribution margins; forecast segment revenue is the unit build's OUTPUT (pasted, blue) and everything below it is formula

Segment	FY2025 revenue	Share	FY2025 margin	FY26E	FY27E	FY28E	FY29E	FY30E
Mobile	7,075	44.5%	60.8%	7,209	7,331	7,568	7,776	7,970
Fixed	4,380	27.5%	85.8%	4,806	5,069	5,325	5,564	5,790
Wholesale	2,568	16.1%	86.4%	2,548	2,586	2,638	2,690	2,744
ICT and associated telecom services	1,883	11.8%	19.4%	2,031	2,255	2,480	2,703	2,920
Total revenue	15,905	100.0%		16,593	17,240	18,011	18,734	19,424

Contribution — revenue x the margin path	FY26E	FY27E	FY28E	FY29E	FY30E
Mobile	4,383	4,457	4,601	4,728	4,846
Fixed	4,123	4,349	4,569	4,774	4,968

Terminal value as a share of enterprise value	83.4%
Enterprise value (AED mn)	81,857
Equity value (AED mn)	82,168
Fair value per share at 31-Dec-2025 (AED)	18.13

COST OF CAPITAL — BUILT HERE, NOT ASSUMED

Risk-free rate — Jan-2031 AED T-bond (longest liquid AED tenor)	4.48%
Less UAE sovereign default spread (removed to avoid double-counting)	0.04%
Risk-free rate net of the sovereign spread	4.44%
Beta (DU weekly vs the FTSE ADX General, 5 years)	0.488
Equity risk premium (UAE total, rating basis)	4.29%
Cost of equity, explicit window	6.53%
Marginal cost of debt (AED sovereign + GCC telecom spread)	5.10%
Cost of debt after tax (interest shields both fiscal legs)	2.88%
Market capitalisation (AED mn)	55,755
Lease liabilities — the only debt-like item (AED mn)	1,939
Debt weight (leases / (leases + market capitalisation))	3.36%
Equity weight	96.64%
Cost of capital, explicit window	6.41%
Terminal risk-free rate	4.30%
Terminal risk-free net of the sovereign spread	4.26%
Terminal cost of equity	6.35%
Terminal cost of debt	4.90%
Terminal cost of debt after tax	2.77%
Terminal debt weight	5.00%
Terminal cost of capital	6.17%

The glide — inherited from the AED risk-free path, FY26E	FY27E	FY28E	FY29E	FY30E	
AED risk-free path	4.48%	4.44%	4.39%	4.35%	4.30%
Glide fraction — cumulative progress of the easing	0.00%	22.22%	50.00%	72.22%	100.00%

Note: row 16 above is the explicit-window cost of capital walked down to the terminal rate by the glide fraction on row 58. du carries no debt whose cost could define the glide, so the cost-of-money path itself (the AED risk-free path) does — the shape is inherited, not a second free parameter.

THE ANCHOR ROLL — one date, one price of time

Anchor accretion factor — (1 + cost of equity)^(days to anchor / 365)	1.0387
Fair value per share at the 07-Aug-2026 anchor (AED)	18.17

The bridge on row 32 is dated 31-Dec-2025 (the audited balance-sheet date it nets leases and cash at). Row 63 rolls it to the anchor at the cost of equity, net of the AED 0.40 final FY2025 dividend paid 28-Apr-2026. Every lens on every sheet is rolled the same way. The H1-2026 interim dividend of AED 0.26 (declared 23-Jul-2026, unpaid at the anchor) stays in the share.

Income statement – three years historical, five years forecast

AED mn, consolidated. History is the audited record; every forecast line is a formula

Net profit	1,668	2,488	2,905	3,127	3,223	3,371	3,511	3,662
Earnings per share (AED)	0.37	0.55	0.64	0.69	0.71	0.74	0.77	0.81
Dividend per share (AED)	0.34	0.54	0.64	0.68	0.70	0.73	0.76	0.79

Notes: FY2024-25 are the audited IFRS 18 face (EBITDA is printed); FY2023 predates IFRS 18 – its by-nature split is not shown (“-”) and its EBITDA is derived from audited components and flagged. The historical profit-before-royalty line is the printed figure (small net-impairment items keep it from being a three-line sum; the forecast has none). FY2023 royalty is the old-regime charge (15% of regulated revenue + 30% of regulated profit); no corporate income tax existed before 2024.

Balance sheet – condensed

Notes to the financial statements are an integral part of the financial statements. An analysis of the financial statements is available on the company website.

AED mn	FY2023	FY2024	FY2025	FY2026	FY2027	FY2028	FY2029	FY2030
Property, plant and equipment	9,723	9,838	10,289	10,887	11,403	11,860	12,173	12,432
of which depreciation charge (minus)	1,544	1,569	1,558	1,629	1,723	1,805	1,877	1,927
Right-of-use assets	1,597	1,607	1,515	1,515	1,515	1,515	1,515	1,515
Intangible assets (net of goodwill)	1,111	847	878	963	1,051	1,083	1,109	1,127
of which amortisation charge (minus)	209	210	246	251	278	298	313	320
Goodwill	413	413	413	413	413	413	413	413
Net working capital (royalty accrual excluded)	(963)	(1,220)	(1,822)	(1,188)	(1,152)	(1,203)	(1,251)	(1,297)
Cash and term deposits	1,307	2,283	2,256	2,021	1,895	1,850	1,970	2,147
Lease liabilities (the only debt-like item)	2,105	1,999	1,939	1,939	1,939	1,939	1,939	1,939
Total equity	9,243	9,878	10,146	10,211	10,275	10,343	10,413	10,486
Net cash after lease liabilities	(168)	205	211	82	(64)	(89)	31	208
Lease liabilities / EBITDA	0.36x	0.31x	0.28x	0.25x	0.24x	0.23x	0.22x	0.21x

Notes to the CONDENSED layout – reconciliation, population, contract balances and the royalty accrual are noted inside the working capital line, as the sheet does not list to total assets. The FY2023 payable line still contained the royalty accrual (AED 1,822mn, separately disclosed from FY2024), it is excluded here in every year as the series is like-for-like. The lease book is held flat (amortisation + depreciation), the FY2023 payable balance is carried unchanged. Cash and term deposits roll forward from profit less the –80% payout – the FY-2026 interest term deposits at 30 Jan 2026 after the AED 4.1bn equity plus dividend outflow) show exactly the mechanics and year.

Cash flow — historical markers and the forecast waterfall

AED mn

AED mn	FY2024	FY2025	FY26E	FY27E	FY28E	FY29E	FY30E
EBITDA	6,470	7,338	7,772	8,066	8,428	8,761	9,077
Federal royalty and income tax paid	(1,929)	(1,883)					
Net cash generated from operating activities	4,637	5,230					
Purchase of PP&E and intangibles	(1,920)	(2,353)					
NOPAT	-	-	3,124	3,224	3,375	3,516	3,665
Add back depreciation and amortisation	-	-	2,235	2,352	2,448	2,530	2,582
Capital expenditure	-	-	(2,572)	(2,586)	(2,612)	(2,529)	(2,525)
Memo — lease replacement, NOT deducted (leases are-	-	-	355	350	345	340	335
Change in working capital	-	(158)	46	43	52	48	46
Free cash flow to the firm	-	-	2,833	3,033	3,263	3,566	3,768
Dividends paid	(1,858)	(2,629)	(3,064)	(3,158)	(3,303)	(3,441)	(3,589)
Cash conversion — operating cash flow as a share of EBITDA, FY2025		71.3%					

du converts EBITDA to operating cash at over 70% AFTER the 43.6% fiscal take — the negative-working-capital model means growth releases cash. The constraint on equity cash flow is the ~100% payout plus the data-centre capex ramp, which is why term deposits fell to nil at 30-Jun-2026.

Summary financials — the eight-year picture

AED mn unless stated. Every cell on this sheet is a link or a ratio; nothing is typed twice

AED mn	FY2023	FY2024	FY2025	FY26E	FY27E	FY28E	FY29E	FY30E
Revenue	13,636	14,636	15,905	16,593	17,240	18,011	18,734	19,424
Revenue growth	-	7.3%	8.7%	4.3%	3.9%	4.5%	4.0%	3.7%
EBITDA	5,800	6,470	7,338	7,772	8,066	8,428	8,761	9,077
EBITDA margin	42.5%	44.2%	46.1%	46.8%	46.8%	46.8%	46.8%	46.7%
EBIT	3,601	4,316	5,170	5,537	5,714	5,980	6,231	6,495
Net profit	1,668	2,488	2,905	3,127	3,223	3,371	3,511	3,662
Free cash flow to the firm	-	-	-	2,833	3,033	3,263	3,566	3,768
Net cash after lease liabilities	(168)	285	311	82	(44)	(89)	31	208
Invested capital	-	11,536	12,025	12,671	13,212	13,668	13,959	14,190
Return on invested capital (average capital)	-	-	-	25.3%	24.9%	25.1%	25.5%	26.0%

Invested capital = PP&E + right-of-use assets + intangibles + goodwill + net working capital (negative for du). FY2023 is not shown because goodwill was not disclosed as a separate line that year.

Probabilistic price map

A map of price dispersion. It carries no view on value and is never blended with the valuation. Each figure is an engine output, not a formula.

Horizon	5th	25th	Median	75th	95th	P(above spot)
One month — to 2026-09-07	10.85	11.71	12.28	12.89	13.88	49.2%
Three months — to 2026-11-09	9.82	11.26	12.26	13.35	15.32	49.0%

Level event	One month	Three months
Finishes 10% or more above spot	9.1%	21.9%
Finishes 10% or more below spot	7.9%	21.0%
Touches 10% above spot at any point	15.2%	40.5%
Touches 10% below spot at any point	12.8%	37.9%

Engine setting	Value
Simulated paths	50,000
Annualised volatility (3-month anchor)	28.1%
Spot price (AED)	12.30
Anchor date	2026-08-07

Sensitivity — what the valuation needs the world to do

AED per share. Each cell is a complete re-run of the model, including the unit build, so these grids are engine outputs rather than formulas and do NOT redraw when a driver is changed.

Terminal cost of capital (rows) x terminal growth (columns)

	1.5%	2.0%	2.5%	3.0%	3.5%
5.17%	19.07	21.38	24.55	29.17	36.54

Lease liabilities / EBITDA	0.36x	0.31x	0.26x	0.25x	0.24x	0.23x	0.22x	0.21x
Working capital / revenue	(7.1%)	(8.3%)	(6.7%)	(6.7%)	(6.7%)	(6.7%)	(6.7%)	(6.7%)

Operating KPIs (company-disclosed history, house forecast)

Mobile subscribers, end of year ('000)	-	8,916	9,704	9,450	9,760	10,010	10,240	10,450
Fixed subscribers, end of year ('000)	-	682	735	760	790	815	838	858
Blended mobile ARPU (AED/month)	-	65.8	63.3	63.4	63.6	63.8	64.0	64.2

Subscriber and ARPU history are the company’s own year-end prints; FY2023 is not shown because the KPI series in the current disclosure pack starts at Q4-2024. The Q2-2026 actual mobile base is 9,280k after the war quarter (total base –412k on the quarter), which is the base the forecast recovers from.

Peer frame and sector context

Aggregator multiple reads, labelled cross-check — never a build source. du computed from its own audited figures

Company	Market	Trailing P/E	Dividend yield	Relevance / caution
e& (EAND)	UAE (ADX)	~20.7x	~4.8%	the other half of the duopoly; scale, international assets and a higher multiple regional benchmark payer; the yield anchor for the cross-check
stc	Saudi Arabia	~18.9x	~5.2%	
Mobily	Saudi Arabia	~15.5x	~2.9%	closest structural analogue — the #2 operator that closed the gap; the justified P/E multi-market; softer growth, lower multiple
Ooredoo	Qatar	~12.5x	~4.6%	
Zain	Kuwait	~9x	~6-7%	levered multi-market; the low end of the bracket
Omantel	Oman	~11.4x	~6.7%	small-market incumbent; yield-heavy
Deutsche Telekom / Vodafone	Developed markets	n/m	3.4% / n/m	the developed-market bracket: slower growth, more leverage, lower returns
du own multiples (computed live)		Value		
Trailing price / earnings		19.19x		
Trailing enterprise value / EBITDA		7.56x		
Trailing dividend yield (FY2025 DPS / spot		5.2%		
Justified price / earnings applied		12.90x		

Peer EV/EBITDA was not reliably sourceable from public aggregators at the sweep date (net-debt figures missing); the relative lens therefore runs on P/E and dividend yield, both sourced, and that limitation is stated rather than papered over.
