

Testahil — Alexandria Mineral Oils Company S.A.E. (EGX: AMOC)

Companion model · Independent valuation study · Educational analysis · Not investment advice

THIS EDITION IS BUILT ON THE AUDITED FINANCIAL STATEMENTS.

The consolidated statements for the transition period 1 July 2025 to 31 December 2025, audited by Crowe (Dr A. M. Hegazy & Co) with an UNQUALIFIED opinion signed at Giza on 18 February 2026; the limited-review statements for the six months to 31 December 2024; and the reviewed statements for the three months to 31 March 2026. Every company figure on the Assumptions sheet carries one of those three as its source, with the note number where the filing gives one.

WHAT THAT REPLACED. The first edition of this model was built without the filings, which could not be reached from the build environment. It triangulated revenue across press reports, reconstructed the balance sheet from four disclosed lines and a set of days assumptions, and BUILT a cost stack from house estimates of yields, energy intensity and a solved feedstock differential. All of that is gone. Twelve published assumptions were overturned, and the fair value moved from EGP 9.38 to the figure on the Summary sheet.

IT CALCULATES — IT DOES NOT STORE. Blue cells are inputs; black cells are formulas; green cells link across sheets. Change a blue cell and the model reprices: the cost of equity is built from the risk-free rate net of the sovereign default spread, beta and the equity premium; the glide fractions are derived from the cost-of-debt path and the discount factors compound; the waterfall chains gross profit to EBITDA to EBIT to NOPAT to free cash flow to present value; the terminal block chains reinvestment = growth over return; every ratio and per-share figure is a formula.

ONLY TWO CLASSES OF CELL ARE PASTED.

1. AUDITED AND DISCLOSED HISTORY — the primary record, not a calculation. Every one of these sits on the Assumptions sheet with its filing and note reference.
2. WHOLE-MODEL RE-RUNS — the bear and bull columns on Summary. Each is a complete revaluation of the model at a different set of drivers, which cannot be expressed as a formula inside a grid. THESE DO NOT REDRAW WHEN YOU CHANGE A DRIVER. Everything else does.

THREE THINGS TO KNOW BEFORE READING THE NUMBERS.

- THERE IS NO CLEAN AUDITED TWELVE-MONTH PERIOD. The year-end moved from 30 June to 31 December and the April-to-June 2025 quarter is not separately filed. The base year is the NINE contiguous audited months from 1 July 2025 to 31 March 2026, annualised by four thirds. That scaling is the only step between the filings and the base year and it is shown on Product and Cost.
- CAPITAL EXPENDITURE IS RUNNING BELOW DEPRECIATION. Cash paid for fixed assets and project construction was EGP 30.4mn in the audited half and EGP 65.0mn in the reviewed quarter. The plant is being run, not renewed. That single fact does more to this valuation than any assumption in it, and it cuts both ways: it lifts free cash flow now and it makes the terminal growth rate hard to defend, because $\text{growth} = \text{return} \times \text{reinvestment}$ implies a NEGATIVE steady-state rate on the recent record.

- THE COMPANY IS NET CASH. Cash of EGP 2,463.5mn against loans of EGP 21.0mn. Net debt therefore enters the bridge as a NEGATIVE, and the weighting on net debt RAISES the discount rate above the cost of equity rather than lowering it. A further EGP 508.8mn of deposits is PLEDGED against credit facilities and is deliberately NOT counted as free cash.

NO RATING AND NO PRICE TARGET. A fair-value range and a distribution.

Net profit after tax, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Non-controlling interest share of profit, three months to 31-Mar-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Net sales, six months to 31-Dec-2024 (comparative column). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales, six months to 31-Dec-2024 (comparative column). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Net profit after tax, six months to 31-Dec-2024. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Net sales, three months to 31-Mar-2025 (comparative column). Reviewed consolidated FS, three months to 31-Mar-2026

Cost of sales, three months to 31-Mar-2025 (comparative column). Reviewed consolidated FS, three months to 31-Mar-2026

Majority profit for the financial year to 30-June-2025, read off the opening column of the consolidated statement of changes in equity July-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — RAW MATERIALS, six months to 31-Dec-2025 (note 15-A). 90.7% of cost of sales and 85.1% of revenue: this single line item represents what the company is. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — salaries, six months to 31-Dec-2025 (note 15-A). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — other expenses, six months to 31-Dec-2025 (note 15-A): natural gas, operating electricity, operating water, spare parts maintenance, and the operating management and technical support contract with the Egyptian Projects Operations & Maintenance Company (EPROM). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — supporting materials (chemicals and additives), six months to 31-Dec-2025 (note 15-A). The previous edition estimated a charge at roughly five times the disclosed figure

Cost of sales — depreciation, six months to 31-Dec-2025 (note 15-A). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — raw materials, six months to 31-Dec-2024 (note 15-A comparative). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — salaries, six months to 31-Dec-2024 (note 15-A comparative). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — other expenses, six months to 31-Dec-2024. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — supporting materials, six months to 31-Dec-2024. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cost of sales — depreciation, six months to 31-Dec-2024. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Fixed assets net of accumulated depreciation at 31-Dec-2025 (note 6). Cost 2,740,810,692 less accumulated depreciation 1,847,794,405, the plant is 67% written down, and 273,466,121 of it is fully depreciated and still in use. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Projects under construction at 31-Dec-2025 (note 7): assets in development 376,746,526 (administrative building, warehouses, civil projects, ERP system) plus investment expenditure 30,576,677. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Inventory net of impairment at 31-Dec-2025 (note 9-A): work in process 792,134,042, finished goods 1,166,168,582, spare parts 309,298,239, supporting materials 283,470,554, raw materials 118,754,225, goods for resale 155,793,361. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Accounts receivable net at 31-Dec-2025 (note 9-B). 100% undue and unimpaired on the ageing analysis. Counterparties include Shell, ExxonMobil, Chevron, Total, TAQA/Castrol, Emarat Misr, OLA Energy and Petromine alongside the state companies. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Debtors and other debit balances net at 31-Dec-2025 (notes 9-C, 9-D). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cash at banks and on hand at 31-Dec-2025 (note 9-E): time deposits 883,351,250 plus current accounts 2,127,100,720 plus cash on hand 166,405, less expected credit losses 38,345,960, less PLEDGED deposits 508,750,050 which sit in other financial investments. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Other financial investments at 31-Dec-2025 — deposits PLEDGED against credit facilities, so not free cash (note 9-E). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Accounts and notes payable at 31-Dec-2025 (note 10-3). The previous edition modelled a trade payable of about 2.5bn funding the working capital cycle; the actual trade payable is under 8mn and the funding sits in the EGPC current account instead. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Creditors and other credit balances at 31-Dec-2025 (note 11): EGPC current account 1,132,353,505, deposits 70,891,867, miscellaneous taxes 47,021,719, dividends payable 517,250,000, miscellaneous creditors 148,226,091, customer advances 60,028,880. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Provisions at 31-Dec-2025 (note 10-1): tax disputes 904,609,345 and claims and disputes 16,831,008. A contingent liability worth EG a share that the previous edition never carried at all

Long-term loans at 31-Dec-2025 (note 20). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, Feb-2026

Short-term loans and facilities at 31-Dec-2025 (note 20). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Total assets at 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Total liabilities at 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Total AMOC (parent) equity at 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, Feb-2026

Non-controlling interest carrying amount at 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Total AMOC equity at 30-Jun-2025 (comparative column). Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Fixed-asset depreciation and right-of-use amortisation charged in the six months to 31-Dec-2025, per the cash-flow statement. The previous edition modelled depreciation at 1.1% of revenue, about 440mn a year against an actual near 150mn. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Fixed-asset depreciation and right-of-use amortisation, Q1-2026. Reviewed consolidated FS, three months to 31-Mar-2026

CASH PAID for projects under construction and fixed assets in the six months to 31-Dec-2025. The previous edition modelled capital expenditure at 1.45% of revenue — about 649mn in the first forecast year — against an actual of roughly a tenth of that. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cash paid for projects under construction and fixed assets, Q1-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Credit interest earned in the six months to 31-Dec-2025, per note 14-B and the cash-flow statement. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Credit interest earned in Q1-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Cash dividends PAID in the six months to 31-Dec-2025. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Cash dividends paid in Q1-2026. Reviewed consolidated FS, three months to 31-Mar-2026

Non-controlling interest as a share of group profit after tax, six months to 31-Dec-2025 — DISCLOSED, not inferred. AMOC holds 86% of Alexandria Wax Products S.A.E. (note 1-2). The previous edition inferred 3.0% from the gap between consolidated and standalone profit; the filing says 4.645%

Alexandria Petroleum Company holds 20.77% of AMOC (note 18, capital structure). The previous edition named the Egyptian General Petroleum Corporation as the 20% shareholder; EGPC is NOT a direct shareholder. Free float (public offering, individuals and other institutions) is 28.77%

Sales of products to the Egyptian General Petroleum Corporation in the six months to 31-Dec-2025 (note 19-3-B) — 76.5% of net sales. EGPC is also the dominant supplier, with 16.3bn of purchases in the same half. That two-sided relationship is the real governance factor; it is disclosed. Audited consolidated FS, transition period 1-Jul-2025 to 31-Dec-2025, Crowe unqualified, 18-Feb-2026

Note 14-A, audited transition period 1-Jul-2025 to 31-Dec-2025

Pass-through factor on the raw-material line: 1.0 means the feedstock charge moves one-for-one with realisation and volume, so the cost of the SPREAD per tonne is held flat in real terms and the margin neither widens nor narrows by assumption. Setting it below 1.0 is the way to express spread widening; the study leaves it at parity and sensitises it

Egypt 10-year local-currency government bond yield, 22.31% (house cost-of-capital reference, cached 21-Jul-2026 print, re-verified 01-Jul-2026)

Egypt credit-default-swap-implied sovereign default spread, Damodaran January-2026 country-premium file, CDS column. Netted out the local-currency risk-free rate so sovereign default risk is not charged twice

Damodaran original country-premium file, Egypt row, CDS column, last updated 5 January 2026 — total equity risk premium

Damodaran adjusted default spread on the rating basis, January-2026 — the alternative construction, disclosed for the audit trail

Damodaran original country-premium file, Egypt row, rating basis, January-2026 — the alternative

Own-stock tier-1 regression: AMOC weekly log-returns against a 33-name equal-weight Egyptian Exchange composite built from the covered library, five-year window. R-squared 0.312, $n = 257$, standard error 0.087, 90% confidence interval [0.797, 1.084]. Passes the usability gate comfortably and is NOT a weak instrument: the interval spans 0.29x the point estimate, well inside the 2x flag

Marginal cost of debt. The gross book is EGP 25mn — 0.06% of revenue — of short-dated Egyptian-pound facilities, so the rate is taken from the corridor lending rate of 20.00% plus a 200bp corporate spread rather than pretended to be observable. The integrity gate below computes what this input is actually WORTH to the answer

Yield earned on the cash pile. Egyptian treasury bills and corporate deposits price a few points under the 19.50% policy rate net of the withholding on interest

Terminal risk-free rate, norm-built: the central bank's own stated medium-term inflation target of 5% plus the standard ~5.5pp emergency market real-rate convention. Never a raw historical average and never backed out of a price

Terminal equity risk premium, normalised below the currently elevated crisis-era level toward the rating-class norm; never held flat in perpetuity

Terminal cost of debt: the midpoint of the 14-16% long-run Egyptian corporate-borrowing norm, with no name-specific reason to deviate

Terminal debt weight, normalised. The company is net cash today and has been for years; a terminal structure carrying a tenth of capital debt is already generous to the valuation and avoids capitalising the current zero-leverage position into perpetuity

Terminal growth, 5% — the standing centre for established names in this market once currency turbulence has passed, sensitised 3-5% EGP-nominal rate struck against an EGP-nominal terminal risk-free rate

Egypt corporate income tax 22.5%. AMOC is a downstream processor and is taxed at the ordinary corporate rate, not the ~40.55% rate that applies to exploration and production concessions

Long-run Egyptian nominal growth used as the terminal ceiling for the domestic leg

Justified enterprise-value-to-EBITDA multiple on mid-cycle 2028E EBITDA. The company's own trailing multiple is around 4.6x on the constructed 2025 base. Group I base-oil refiners and independent lube processors trade 4-6x; 4.5x holds the name at its own trailing multiple rather than assuming a re-rating. Bear 3.5x / bull 6.0x

Justified through-cycle price-to-earnings multiple on normalised earnings. Trailing is about 7.5x on the constructed 2025 base. A single asset processor with a 20% state shareholder, an administered feedstock relationship and an Egyptian cost of equity near 28% does not earn a premium multiple. Bear 5.5x / bull 9.5x

Expert 1's justified price/earnings multiple. Struck below the main normalised lens deliberately: it is an independent opinion, not a re the house view

Sustainable return on equity for the book lens. Trailing return on average parent equity is about 33%; the sustainable rate is struck because the reported figure is flattered by a heavily written-down asset base that will have to be renewed

Revenue and cost of sales, built off the audited notes

Note 14-A gives eight product lines with tonnes AND value. Note 15-A gives the cost stack in five the cost composition is as filed.

NOTE 14-A — AS FILED, 6 MONTHS TO 31-DEC-2025

Product line	Tonnes
Base and special oils	54,968.980
Paraffin wax	41,774.200
Gas oil	171,684.881
Naphtha	41,430.857
Liquefied petroleum gas	23,735.778
Fuel oil (mix)	460,153.600
Heavy fuel oil	14,327.520
Waste	7.820
TOTAL	808,083.636
Specialty slate (oils and wax)	

Every realisation in column D is one disclosed number divided by another. The previous edition of this mode solved crack multiple. None of that is needed: the note states tonnes and value for eight lines, and fuel oil (n

Discounted cash flow — the waterfall and the terminal block

The cost of capital slides from an explicit-window rate to a terminal rate, each year discounted at

COST OF CAPITAL	
Risk-free rate less sovereign default spread	18.91%
COST OF EQUITY, explicit window	27.76%
Net debt (negative = net cash)	-2,442,544,928
Market capitalisation	11,752,650,000
Debt weight (NEGATIVE — the company is net cash)	-26.24%
Equity weight	126.24%
Cost of net debt, after tax	13.21%
WEIGHTED COST OF CAPITAL — explicit window	31.58%
Terminal cost of equity	17.08%
WEIGHTED COST OF CAPITAL — terminal	16.54%

THE GLIDE AND THE WATERFALL	
	2026
Cumulative progress along the cost-of-debt path	0.000
Forward cost of capital	31.58%
Cumulative discount factor	0.7600
EBIT	1,491,142,612
NOPAT = EBIT x (1 - effective tax)	1,161,320,416
add back depreciation and amortisation	147,630,507
less capital expenditure (ACTUAL run rate, inflated)	145,555,119
Net working capital	1,942,448,255
less change in net working capital	208,295,966
FREE CASH FLOW TO THE FIRM	955,099,839
PRESENT VALUE OF FREE CASH FLOW	725,879,235

THE TERMINAL BLOCK	
Invested capital at the end of the window	4,197,692,349
Terminal return on invested capital	35.36%
Required reinvestment rate = growth / return	14.14%
TERMINAL VALUE	11,039,668,387
Present value of the terminal block	3,942,086,284
Present value of the explicit window	2,776,541,390
ENTERPRISE VALUE	6,718,627,673
TERMINAL VALUE AS A SHARE OF ENTERPRISE VALUE	58.67%

t its own forward rate. Capital expenditure is held at the ACTUAL cash run rate from th

re filings, inflated.

Enterprise value to equity

Minorities come off the OPERATING enterprise value, before the cash is added. The cash belongs

	EGP
ENTERPRISE VALUE (the operating assets)	6,718,627,673
Minority share of group profit — DISCLOSED (note: 86.45% of the wax	4.645%
less minority interests, ON THE ENTERPRISE VALUE	312,050,946
Operating assets attributable to shareholders	6,406,576,728
less net debt (negative = net cash ADDED in full)	-2,442,544,928
EQUITY ATTRIBUTABLE TO SHAREHOLDERS	8,849,121,656
FAIR VALUE PER SHARE (EGP)	6.85
TERMINAL VALUE AS A SHARE OF ENTERPRISE VALUE	58.67%
Spot price (EGP)	9.10
Implied against spot	-24.7%
MEMO — pledged deposits, NOT counted as free cash	508,750,050
MEMO — tax-disputes and claims provision (note 10-1), NOT deducted	921,440,353

Two disclosed balances sit beside this bridge and neither is inside it. The pledged deposits are real cash but are not free and are excluded from net debt. The tax-disputes provision is a liability the company has recognized because the earnings the model discounts are struck after the tax charge that provision relates to, but a reader should subtract it and the per-share figure is given so they can.

s to the parent and is added in full.
