

Riyadh Cables Group Company — Bibliography & Source Register

Tadawul: 4142 · companion to the valuation study dated 18 August 2026

READ FIRST. This register lists every source and every input behind the valuation study. Sources are grouped by research layer: Company (the subject's own audited and reviewed filings), Country (sovereign macro and risk premia), Industry (sector and peers), Global (rates, commodities), and House (the analyst's own forecast assumptions, each built on a sourced anchor). The company's historical figures come only from its own audited statements; no aggregator, broker note or press report is a source for any company figure — such sources appear only as labelled cross-checks.

Primary documents

Document	Publisher / date	What was taken from it
Consolidated financial statements, year ended 31 Dec 2025	Riyadh Cables / KPMG, 26 Mar 2026	Full income statement, balance sheet, cash flow; cost-of-revenue breakdown; segment and geographic split; inventory; Islamic finance facilities; dividends; shares
Consolidated financial statements, year ended 31 Dec 2024	Riyadh Cables / KPMG, Mar 2025	FY2024 income statement and balance sheet; FY2023 comparative
Consolidated financial statements, year ended 31 Dec 2023	Riyadh Cables / KPMG, Mar 2024	FY2023 income statement and balance sheet; FY2022 comparative
Annual report, year ended 31 Dec 2022 (IPO year)	Riyadh Cables, 2023	FY2022 revenue and profit (cross-verified against the FY2023 comparative)
Interim reviewed results, six months to 30 Jun 2026	Riyadh Cables via Tadawul, 29 Jul 2026	H1-2026 revenue, gross profit, operating profit, net profit, equity — the near-term margin anchor
Interim results, three months to 31 Mar 2026	Riyadh Cables via Tadawul, May 2026	Q1-2026 revenue, gross profit, operating profit, net profit
Country risk premium data, July 2026 update	A. Damodaran (NYU Stern), Jul 2026	Saudi Arabia rating (Aa3), sovereign default spread 0.48%, country risk premium, equity risk premium 4.94% — the July vintage, superseding the January figures used in the first edition
SAR government sukuk yield curve	FTSE Russell (Saudi Government Bond Index, 31 Jul 2026); S&P DJI (iBoxx Tadawul SAR Government Sukuk, Q1 2026)	The 10-year SAR risk-free rate (5.50%), re-derived from the published sukuk curve after an earlier estimate sat below it
Tadawul All Share Index (TASI) price history	Saudi Exchange	The index against which the stock's beta is estimated
Policy rate and SAIBOR references	SAMA, Aug 2026	The repo/SAIBOR reference behind the marginal cost of debt
LME copper and aluminium references	London Metal Exchange, Aug 2026	The metal-price path behind the materials cost leg (context / cross-check)

Full input register

Every input in the model, with its value, date and source-and-construction, grouped by research layer. Values are the committed model numbers; percentages are shown as entered.

History: FY2023 4.0%, FY2024 3.4%, FY2025 4.3% (the FY2025 rise is a 150.8mn receivables impairment charge, up from 23.4mn). Held near the FY202...
dna_pct	0.0085	2026-08-18	Depreciation and amortisation as a share of revenue, near the FY2025 level (85.4mn / 10,673.6mn = 0.80%), lifted slightly for the larger capitalised base from the FY2024-25 capex
capex_pct	0.019, 0.018, 0.017, 0.016, 0.016	2026-08-18	Capital expenditure as a share of revenue, easing from the FY2025 level (188.9mn / 10,673.6mn = 1.77%) held broadly flat — a maintenance-plus-modest-capacity level for a plant already largely built out (FY2025 assets under construction were 107.9mn of the 188.9mn spend)
nwc_pct	0.2800	2026-08-18	Net working capital as a share of revenue, held near the FY2025 level. History on a consistent basis (accrued expenses included in payables in every year): FY2023 23.5%, FY2024 24.4%, FY2025 27.5% — a structurally working-capital-heavy cable maker (copper/aluminium inventory + trade receivables, ...
beta	1.1290	2026-08-18	Own-stock tier-1 regression: RIYADHCABLE weekly log-returns against the published Tadawul All Share Index (TASI), Dimson sum-beta over the full 3.6-year listed history (185 weekly observations to 13-Aug-2026). R-squared 0.145, standard error 0.309, 90% confidence interval [0.62, 1.64]. Clears the...
rf_term	0.0502	2026-08-18	Terminal risk-free rate = the normalised SAR risk-free (rf 5.50% less the 0.48% sovereign default spread = 5.02%) HELD FLAT: Saudi rates are already at a long-run level, so no crisis-premium normalisation is applied and the terminal risk-free is NOT marked below its current normalised level — the...
erp_term	0.0470	2026-08-18	Terminal equity risk premium 4.70%, a mild compression of the current 4.94% (July-2026 Damodaran) as the country risk premium narrows with Vision-2030 diversification; never held at a crisis level, never below the ~4.2% mature-market base
beta_term	1.00	2026-08-18	Terminal beta 1.0 — mean reversion toward the market (Blume), from the 1.129 own-stock estimate; the Blume-adjusted current beta is already 1.086
kd_term	0.0550	2026-08-18	Terminal cost of debt 5.5%, a modest easing from the 5.9% marginal rate as SAMA tracks the Fed toward a neutral setting
wd_term	0.0500	2026-08-18	Terminal net-debt weight 5%, normalised modestly above today's ~2.4% to acknowledge the structural working-capital leverage a cable maker carries, while staying far below a geared capital structure this equity-funded company has never run
kd_path	0.059, 0.058, 0.057, 0.056, 0.055	2026-08-18	Forward cost-of-debt path FY2026E-FY2030E, easing gently from the 5.9% marginal rate to the 5.5% terminal as policy normalises. The discount-rate glide takes its shape from this path by construction
g_term_real	0.0196	2026-09-04	Terminal REAL growth 1.96%: ~2% long-run Saudi real growth. STORED AS A REAL RATE and the nominal is DERIVED on the house Saudi inflation path, so the two cannot disagree and a reader can see which component is being claimed. On the house terminal inflation of 2.00% it recomputes to the 4.00% nom...

anchor_days	230.00	2026-08-18	Days from the DCF construction date (31 Dec 2025, the audited balance-sheet date the bridge is built on) to the 18 Aug 2026 anchor. Every lens value is rolled to the anchor at the cost of equity, net of the SAR 2.25/share FY2025 final dividend paid inside the window, so one date and one price of ...
ev_ebitda_just	9.50	2026-08-18	Justified EV/EBITDA on mid-cycle FY2027E EBITDA. Riyadh Cables trades ~11.9x trailing EV/EBITDA and ~14.5x trailing earnings. The wire-and-cable peer set splits in two, and the first edition mischaracterised it as a single 7-11x band: developed-market majors (Prysmian, Nexans) trade ~7-9x forward...
pe_just	13.00	2026-08-18	Justified through-cycle P/E on normalised earnings. 13.0x for a high-return, low-leverage regional champion with a ~10% cost of equity and mid-single-digit durable growth. Bear 10.0x / bull 16.0x
roe_sust	0.2800	2026-08-18	Sustainable return on equity for the book lens. Trailing ROE on average equity is ~36% (FY2025 net profit 1,084.8mn / average equity ~2,966mn); struck below it because the FY2024-25 prints were lifted by the metal tailwind and a large receivables book, and because retained-earnings growth dilutes...
lens_weights	dcf=0.45; relative=0.2; normalized=0.2; book=0.15	2026-08-18	DCF primary for an operating manufacturer whose cash flows are directly modelled; the relative and normalised-earnings lenses carry equal secondary weight and the book lens least, because book value understates a business earning a ~30%+ return on it

Key judgements — and what would overturn each

Judgement	Set to	What would overturn it
Sustained gross margin (the crux)	15.26% (H1-2026 anchor)	A run of quarterly gross margins settling materially above or below 14.5–16.0%
Company class → lens	Operating manufacturer → DCF-primary	Evidence the business is better read as a project contractor or a holding company (the filings do not support that)
Cost of equity ~10%	beta 1.129 × ERP 4.94% + rf*	A materially different beta on a longer listed history, or a change in the Saudi sovereign premium
Terminal growth 4% nominal	4.0%	A durable change in Saudi construction/electrification demand
Real volume growth ~8% tapering	from the H1-2026 volume-led print	Slower grid/construction spend, or evidence the H1-2026 volume surge was one-off
Metal price path broadly flat	held near current	A sustained directional move in copper/aluminium (carried in the sensitivity)
Effective zakat/tax 9.5%	above the FY2025 9.0% print	A change in the zakat/tax regime or in the foreign-profit share

Negative results — searched, not found

Item	What was sought	Outcome
Company IR website (direct)	The audited statements from riyadh-cables.com	Blocked by an automated-traffic challenge; the requester supplied the four audited statement sets directly, which are the build source
Cable tonnage / volumes	A disclosed physical volume to build a literal unit model	Not disclosed; a tonnage index is used and flagged
Full H1-2026 interim statements	The complete reviewed half-year balance sheet and cash flow	Only the summary reviewed results were reachable; used as the near-term anchor, with the full-year balance sheet (31-Dec-2025) as the bridge base
Order book / backlog	A backlog figure for the high-voltage turnkey segment	Not separately disclosed; the small segment is grown on its own revenue history
Formal revenue guidance	Management numeric guidance	None issued; drivers are built from the disclosed history and the reviewed half-year

Aggregator-discrepancy note

Where public aggregators (used only as cross-checks) were consulted, their headline figures were consistent with the audited statements: 2025 revenue near SAR 10.67bn and net profit

near SAR 1.08bn matched the audited income statement, and the Tadawul-filed results announcements matched the underlying statements. No material discrepancy was found; in every case the audited or exchange-filed figure was used and the aggregator was discarded.

Primary-access log

<https://riyadh-cables.com/investor-relations/> (blocked, 2026-08-18) — The company IR site sits behind an 'sgcaptcha' bot-protection wall that blocked automated retrieval (HTTP 202 JS challenge to curl; empty render to the page fetcher; a headless browser could not complete the challenge). Verified NOT an egress-proxy fault (the proxy returned 200 for a control host and reached the company origin, receiving its challenge). Per the primary-source discipline, the analyst stopped and asked rather than substituting an aggregator; the requester then supplied the four audited annual statement sets directly — the rule working.

<https://www.saudiexchange.sa/.../issuer-announcements-details/?anId=97051&cs=4142> (reached, 2026-08-18) — Tadawul issuer-announcement portal — reachable; the official filed H1-2026 reviewed interim results announcement read here (revenue, gross profit, operating profit, net profit vs prior period).
