What this workbook is

THE WORKBOOK CALCULATES

Pasted cell class 1 of 3 — audited and disclosed history

Pasted cell class 2 of 3 — the unit build's output

Pasted cell class 3 of 3 — whole-model re-runs

Blue means input, black means formula

The contested judgement is carried both ways

Currency and units

Basis and date

Egyptian International Pharmaceutical Industries Company (EIPICO)

An educational valuation model of a listed Egyptian pharmaceutical manufacturer, built from the company's statements. It is not investment advice, it contains no rating and no price target, and it expresses value as a

Every figure that can be derived from a driver is a live formula. Change a driver on the Assumptions sheet and the glide, the discount factors, the cash-flow waterfall, the terminal block, the three statements, the bridge. This claim is tested, not asserted: a driver test perturbs each input in place, re-evaluates the whole workbook, and the headline moves in the right direction.

The FY2023, FY2024 and FY2025 columns of the Income Statement, Balance Sheet and Cash Flow sheets, and operating statistics on Segments. Where a line is both disclosed and derivable, the DISCLOSED figure is carried over from the pasted cell.

The FY2024 and FY2025 pack volumes and realised prices per pack on the Segments sheet. These come from disclosed pack counts against the revenue note's channel split; flattened into a grid the reconciliation would be a formula. Everything downstream of them — every forecast year — is a formula.

The Monte Carlo percentile map and touch ladder, and the Sensitivity grids. Each of those cells is a COMPLETE model at a different input, or a full 50,000-path simulation. THEY DO NOT REDRAW WHEN A DRIVER CHANGES. Those two sheets is a formula.

Blue type is a pasted number. Black type is calculated in the sheet.

The credit-loss and provision charge is the study's single most consequential contested judgement. Frame A treats it as a cost of doing business; Frame B treats it as normalising. Both run all the way through to a value per share at the end. They are never averaged into one number.

Egyptian pounds. Money in millions unless a row says otherwise; per-share figures in pounds; packs and units in millions.

Audited CONSOLIDATED financial statements. Share price 130.05 at 2026-08-06; 168.755750 million shares outstanding as of 31 December.
